Introduction ::

Background:

Globally, the 20th century was marked by: (a) two devastating world wars; (b) the Great Depression of the 1930s; (c) the end of vast colonial empires; (d) rapid advances in science and technology, from the first airplane flight at Kitty Hawk, North Carolina (US) to the landing on the moon; (e) the Cold War between the Western alliance and the Warsaw Pact nations; (f) a sharp rise in living standards in North America, Europe, and Japan; (g) increased concerns about the environment, including loss of forests, shortages of energy and water, the decline in biological diversity, and air pollution; (h) the onset of the AIDS epidemic; and (i) the ultimate emergence of the US as the only world superpower. The planet's population continues to explode: from 1 billion in 1820, to 2 billion in 1930, 3 billion in 1960, 4 billion in 1974, 5 billion in 1988, and 6 billion in 2000. For the 21st century, the continued exponential growth in science and technology raises both hopes (e.g., advances in medicine) and fears (e.g., development of even more lethal weapons of war).

Geography ::

Geographic overview:

The surface of the earth is approximately 70.9% water and 29.1% land. The former portion is divided into large water bodies termed oceans. The World Factbook recognizes and describes five oceans, which are in decreasing order of size: the Pacific Ocean, Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean.

The land portion is generally divided into several, large, discrete landmasses termed continents. Depending on the convention used, the number of continents can vary from five to seven. The most common classification recognizes seven, which are (from largest to smallest): Asia, Africa, North America, South America, Antarctica, Europe, and Australia. Asia and Europe are sometimes lumped together into a Eurasian continent resulting in six continents. Alternatively, North and South America are sometimes grouped as simply the Americas, resulting in a continent total of six (or five, if the Eurasia designation is used).

North America is commonly understood to include the island of Greenland, the isles of the Caribbean, and to extend south all the way to the Isthmus of Panama. The easternmost extent of Europe is generally defined as being the Ural Mountains and the Ural River; on the southeast the Caspian Sea; and on the south the Caucasus Mountains, the Black Sea, and the Mediterranean. Portions of Azerbaijan, Georgia, Kazakhstan, Russia, and Turkey fall within both Europe and Asia, but in every instance the larger section is in Asia. These countries are considered part of both continents. Armenia and Cyprus, which lie completely in Western Asia, are geopolitically European countries.

Asia usually incorporates all the islands of the Philippines, Malaysia, and Indonesia. The islands of the Pacific are often lumped with Australia into a "land mass" termed Oceania or Australasia. Africa's northeast extremity is frequently delimited at the Isthmus of Suez, but for geopolitical purposes, the Egyptian Sinai Peninsula is often included as part of Africa.

Although the above groupings are the most common, different continental dispositions are recognized or taught in certain parts of the world, with some arrangements more heavily based on cultural spheres rather than physical geographic considerations.

Natural hazards:

large areas subject to severe weather (tropical cyclones); natural disasters (earthquakes, landslides, tsunamis, volcanic eruptions)

volcanism: the world is home to more than 1,500 potentially active volcanoes, with over 500 of these having erupted in historical times; an estimated 500 million people live near these volcanoes; associated dangers include lava flows, lahars (mudflows), pyroclastic flows, ash clouds, ash fall, ballistic projectiles, gas emissions, landslides, earthquakes, and tsunamis; in the 1990s, the International Association of Volcanology and Chemistry of the Earth's Interior, created a list of 16 volcanoes worthy of special study because of their great potential for destruction: Avachinsky-Koryaksky (Russia), Colima (Mexico), Etna (Italy), Galeras (Colombia), Mauna Loa (United States), Merapi (Indonesia), Nyiragongo (Democratic Republic of the Congo), Rainier (United States), Sakurajima (Japan), Santa Maria (Guatemala), Santorini (Greece), Taal (Philippines), Teide (Spain), Ulawun (Papua New Guinea), Unzen (Japan), Vesuvius (Italy)

Environment - current issues:

large areas subject to overpopulation, industrial disasters, pollution (air, water, acid rain, toxic substances), loss of vegetation (overgrazing, deforestation, desertification), loss of wildlife, soil degradation, soil depletion, erosion; global warming becoming a greater concern

Geography - note:

the world is now thought to be about 4.55 billion years old, just about one-third of the 13.7-billion-year age estimated for the universe

Economy ::

Economy - overview:

In 2010, world output - and per capita income - began to recover from the 2008-09 recession, the first global downturn since 1946. Gross World Product (GWP) grew 4.6%, largely on the strength of rebounding exports, which rose about 20% from the level of 2009. Growth was not evenly distributed across countries, however. Lower income countries - those with per capita incomes below \$30,000 per year - averaged 6.3% growth, while higher income countries - with per capita incomes above \$30,000 - averaged just 2.8% growth. And countries with current account surpluses averaged 6.0% growth, while those with current account deficits averaged just 3.4% growth. Among large economies, China (+ 10.1%), Taiwan (+ 8.3%), India (+ 8.3%), Brazil (+ 7.5%), and South Korea (+ 6.1%) recorded the biggest GDP gains - China also became the world's largest exporter. Continuing uncertainties in mortgage and financial markets resulted in slower growth in Japan (+ 3.0%), the US (+ 2.8%), and the European Union (+ 1.7%). In 2010, global unemployment continued to creep upwards, reaching 8.8% - underemployment, especially in the developing world, remained much higher. Global gross fixed investment stabilized at about 23% of GWP, after a significant drop in 2009. World trade appears to be returning to pre-2009 patterns, with current account surpluses or deficits rising for a majority of countries. World external debt, however, dropped again in 2010 - about 5% from the 2009 level,

as many countries reduced borrowing. Many, if not most, countries pursued expansionary monetary and fiscal policies. The global money supply, both narrowly and broadly defined, increased roughly 10%, as countries tried to keep interest rates low; the global budget deficit stabilized at roughly \$3.5 trillion, as countries tried to rein in spending and slow the rise of public debt.

The international financial crisis of 2008-09 presents the world economy with a major new challenge, together with several long-standing ones. The fiscal stimulus packages put in place in 2009-10 required most countries to run budget deficits - government balances have deteriorated for 14 out of every 15 countries. Treasuries issued new public debt - totaling \$5.5 trillion since 2008 - to pay for the additional expenditures. To keep interest rates low, many central banks monetized that debt, injecting large sums of money into the economies. As economic activity picks up, central banks will face the difficult task of containing inflation without raising interest rates so high they snuff out further growth. At the same time, governments will face the difficult task of spurring current growth and employment without saddling their economies with so much debt that they sacrifice long-term growth and financial stability.

Long-standing challenges the world faces are several. The addition of 80 million people each year to an already overcrowded globe is exacerbating the problems of underemployment, pollution, waste-disposal, epidemics, water-shortages, famine, over-fishing of oceans, deforestation, desertification, and depletion of non-renewable resources. The nation-state, as a bedrock economic-political institution, is steadily losing control over international flows of people, goods, funds, and technology. Internally, central governments often find their control over resources slipping as separatist regional movements - typically based on ethnicity - gain momentum, e.g., in many of the successor states of the former Soviet Union, in the former Yugoslavia, in India, in Iraq, in Indonesia, and in Canada. Externally, central governments are losing decisionmaking powers to international bodies, most notably the EU. The introduction of the euro as the common currency of much of Western Europe in January 1999, while paving the way for an integrated economic powerhouse, poses economic risks because the participating nations are culturally and politically diverse and have varying levels and rates of growth of income, and hence, differing needs for monetary and fiscal policies. In Western Europe, governments face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. Because of their own internal problems and priorities, the industrialized countries

devote insufficient resources to deal effectively with the poorer areas of the world, which, at least from an economic point of view, are becoming further marginalized. The terrorist attacks on the US on 11 September 2001 accentuated a growing risk to global prosperity, illustrated, for example, by the reallocation of resources away from investment to anti-terrorist programs. Wars in Iraq and Afghanistan added new uncertainties to global economic prospects.

Despite these challenges, the world economy also shows great promise. Technology has made possible further advances in all fields, from agriculture, to medicine, alternative energy, metallurgy, and transportation. Improved global communications have greatly reduced the costs of international trade, helping the world gain from the international division of labor, raise living standards, and reduce income disparities among nations. Much of the resilience of the world economy in the aftermath of the financial crisis resulted from government leaders around the globe working in concert to stem the financial onslaught, knowing well the lessons of past economic failures.

Transnational Issues ::

Disputes - international:

stretching over 250,000 km, the world's 322 international land boundaries separate 194 independent states and 71 dependencies, areas of special sovereignty, and other miscellaneous entities; ethnicity, culture, race, religion, and language have divided states into separate political entities as much as history, physical terrain, political fiat, or conquest, resulting in sometimes arbitrary and imposed boundaries; most maritime states have claimed limits that include territorial seas and exclusive economic zones; overlapping limits due to adjacent or opposite coasts create the potential for 430 bilateral

maritime boundaries of which 209 have agreements that include contiguous and non-contiguous segments; boundary, borderland/resource, and territorial disputes vary in intensity from managed or dormant to violent or militarized; undemarcated, indefinite, porous, and unmanaged boundaries tend to encourage illegal cross-border activities, uncontrolled migration, and confrontation; territorial disputes may evolve from historical and/or cultural claims, or they may be brought on by resource competition; ethnic and cultural clashes continue to be responsible for much of the territorial fragmentation and internal displacement of the estimated 6.6 million people and cross-border displacements of 8.6 million refugees around the world as of early 2006; just over one million refugees were repatriated in the same period; other sources of contention include access to water and mineral (especially hydrocarbon) resources, fisheries, and arable land; armed conflict prevails not so much between the uniformed armed forces of independent states as between stateless armed entities that detract from the sustenance and welfare of local populations, leaving the community of nations to cope with resultant refugees, hunger, disease, impoverishment, and environmental degradation

Refugees and internally displaced persons:

the United Nations High Commissioner for Refugees (UNHCR) estimated that in December 2006 there was a global population of 8.8 million registered refugees and as many as 24.5 million IDPs in more than 50 countries; the actual global population of refugees is probably closer to 10 million given the estimated 1.5 million Iraqi refugees displaced throughout the Middle East (2007)

Trafficking in persons:

current situation: approximately 800,000 people, mostly women and children, are trafficked annually across national borders, not including millions trafficked within their own countries; at least 80% of the victims are female and up to 50% are minors; 75% of all victims are trafficked into commercial sexual exploitation; almost two-thirds of the global victims are trafficked intra-regionally within East Asia and the Pacific (260,000 to 280,000 people) and Europe and Eurasia (170,000 to 210,000 people)

Tier 2 Watch List: Algeria, Angola, Argentina, Azerbaijan, Bahrain, Bangladesh, Belize, Burundi, Cambodia, Cameroon, Central African Republic, China, Cote d'Ivoire, Democratic Republic of the Congo, Djibouti, Dominican Republic, Egypt, Equatorial Guinea, Federated

States of Micronesia, Gabon, Ghana, Guatemala, Guinea, Guinea-Bissau, Guyana, India, Iraq, Latvia, Lebanon, Lesotho, Libya, Mali, Moldova, Montenegro, Nicaragua, Pakistan, Philippines, Qatar, Republic of the Congo, Russia, Saint Vincent and the Grenadines, Senegal, Sri Lanka, Tajikistan, Tunisia, Turkmenistan, Ukraine, United Arab Emirates, Uzbekistan, Venezuela, Yemen

Tier 3: Burma, Chad, Cuba, Eritrea, Fiji, Iran, Kuwait, Malaysia, Mauritania, Niger, North Korea, Papua New Guinea, Saudi Arabia, Sudan, Swaziland, Syria, Zimbabwe (2009)

Illicit drugs:

cocaine: worldwide coca leaf cultivation in 2007 amounted to 232,500 hectares; Colombia produced slightly more than two-thirds of the worldwide crop, followed by Peru and Bolivia; potential pure cocaine production decreased 7% to 865 metric tons in 2007; Colombia conducts an aggressive coca eradication campaign, but both Peruvian and Bolivian Governments are hesitant to eradicate coca in key growing areas; 551 metric tons of export-quality cocaine (85% pure) is documented to have been seized or destroyed in 2005; US consumption of export quality cocaine is estimated to have been in excess of 380 metric tons

opiates: worldwide illicit opium poppy cultivation continued to increase in 2007, with a potential opium production of 8,400 metric tons, reaching the highest levels recorded since estimates began in mid-1980s; Afghanistan is world's primary opium producer, accounting for 95% of the global supply; Southeast Asia - responsible for 9% of global opium - saw marginal increases in production; Latin America produced 1% of global opium, but most was refined into heroin destined for the US market; if all potential opium was processed into pure heroin, the potential global production would be 1,000 metric tons of heroin in 2007

Afghanistan

Introduction ::

Background:

Ahmad Shah DURRANI unified the Pashtun tribes and founded Afghanistan in 1747. The country served as a buffer between the British and Russian Empires until it won independence from notional British control in 1919. A brief experiment in democracy ended in a 1973 coup and a 1978 Communist counter-coup. The Soviet Union invaded in 1979 to support the tottering Afghan Communist regime, touching off a long and destructive war. The USSR withdrew in 1989

under relentless pressure by internationally supported anti-Communist mujahedin rebels. A series of subsequent civil wars saw Kabul finally fall in 1996 to the Taliban, a hardline Pakistani-sponsored movement that emerged in 1994 to end the country's civil war and anarchy. Following the 11 September 2001 terrorist attacks in New York City and Washington, D.C., a US, Allied, and anti-Taliban Northern Alliance military action toppled the Taliban for sheltering Osama BIN LADIN. The UN-sponsored Bonn Conference in 2001 established a process for political reconstruction that included the adoption of a new constitution, a presidential election in 2004, and National Assembly elections in 2005. In December 2004, Hamid KARZAI became the first democratically elected president of Afghanistan and the National Assembly was inaugurated the following December. Karzai was re-elected in August 2009 for a second term. Despite gains toward building a stable central government, a resurgent Taliban and continuing provincial instability - particularly in the south and the east - remain serious challenges for the Afghan Government.

Flag description:

three equal vertical bands of black (hoist side), red, and green, with the national emblem in white centered on the red band and slightly overlapping the other two bands; the center of the emblem features a mosque with pulpit and flags on either side, below the mosque are numerals for the solar year 1298 (1919 in the Gregorian calendar, the year of Afghan independence from the UK); this central image is circled by a border consisting of sheaves of wheat on the left and right, in the upper-center is an Arabic inscription of the Shahada (Muslim creed) below which are rays of the rising sun over the Takbir (Arabic expression meaning "God is great"), and at bottom center is a scroll bearing the name Afghanistan; black signifies the past, red is for the blood shed for independence, and green can represent either hope for the future, agricultural prosperity, or Islam

note: Afghanistan had more changes to its national flag in the 20th century than any other country; the colors black, red, and green appeared on most of them

National anthem:

name: "Milli Surood" (National Anthem)

lyrics/music: Abdul Bari JAHANI/Babrak WASA

note: adopted 2006; the 2004 constitution of the post-Taliban government mandated that a new national anthem should be written containing the phrase "Allahu Akbar" (God is Great) and mentioning the names of Afghanistan's ethnic groups

Economy ::

Economy - overview:

Afghanistan's economy is recovering from decades of conflict. The economy has improved significantly since the fall of the Taliban regime in 2001 largely because of the infusion of international assistance, the recovery of the agricultural sector, and service sector growth. Despite the progress of the past few years, Afghanistan is extremely poor, landlocked, and highly dependent on foreign aid, agriculture, and trade with neighboring countries. Much of the population continues to suffer from shortages of housing, clean water, electricity, medical care, and jobs. Criminality, insecurity, weak governance, and the Afghan Government's inability to extend rule of law to all parts of the country pose challenges to future economic growth. Afghanistan's living standards are among the lowest in the world. While the international community remains committed to Afghanistan's development, pledging over \$67 billion at four donors' conferences since 2002, the Government of Afghanistan will need to overcome a number of challenges, including low revenue collection, anemic job creation, high levels of corruption, weak government capacity, and poor public infrastructure.

Albania

>

Introduction ::

Background:

Albania declared its independence from the Ottoman Empire in 1912, but was conquered by Italy in 1939. Communist partisans took over the country in 1944. Albania allied itself first with the USSR (until 1960), and then with China (to 1978). In the early 1990s, Albania ended 46 years of xenophobic Communist rule and established a multiparty democracy. The transition has proven challenging as successive governments have tried to deal with high unemployment,

widespread corruption, a dilapidated physical infrastructure, powerful organized crime networks, and combative political opponents. Albania has made progress in its democratic development since first holding multiparty elections in 1991, but deficiencies remain. International observers judged elections to be largely free and fair since the restoration of political stability following the collapse of pyramid schemes in 1997; however, there have been claims of electoral fraud in every one of Albania's post-communist elections. In the 2005 general elections, the Democratic Party and its allies won a decisive victory on pledges to reduce crime and corruption, promote economic growth, and decrease the size of government. The election, and particularly the orderly transition of power, was considered an important step forward. Albania joined NATO in April 2009 and is a potential candidate for EU accession. Although Albania's economy continues to grow, the country is still one of the poorest in Europe, hampered by a large informal economy and an inadequate energy and transportation infrastructure.

Economy ::

Economy - overview:

Albania, a formerly closed, centrally-planned state, is making the difficult transition to a more modern open-market economy. Macroeconomic growth averaged around 6% between 2004-08, but declined to about 3% in 2009-10. Inflation is low and stable. The government has taken measures to curb violent crime, and recently adopted a fiscal reform package aimed at reducing the large gray economy and attracting foreign investment. The economy is bolstered by annual remittances from abroad representing about 15% of GDP, mostly from Albanians residing in Greece and Italy; this helps offset the towering trade deficit. The agricultural sector, which accounts for over half of employment but only about one-fifth of GDP, is limited primarily to small family operations and subsistence farming because of lack of modern equipment, unclear property rights, and the prevalence of small, inefficient plots of land. Energy shortages because of a reliance on hydropower, and antiquated and inadequate infrastructure contribute to Albania's poor business environment and lack of success in attracting new foreign investment needed to expand the country's export base. The completion of a new thermal power plant near Vlore has helped diversify generation capacity, and plans to

upgrade transmission lines between Albania and Montenegro and Kosovo would help relieve the energy shortages. Also, with help from EU funds, the government is taking steps to improve the poor national road and rail network, a long-standing barrier to sustained economic growth.

Transnational Issues ::

Disputes - international:

the Albanian Government calls for the protection of the rights of ethnic Albanians in neighboring countries, and the peaceful resolution of interethnic disputes; some ethnic Albanian groups in neighboring countries advocate for a "greater Albania," but the idea has little appeal among Albanian nationals; the mass emigration of unemployed Albanians remains a problem for developed countries, chiefly Greece and Italy

Illicit drugs:

increasingly active transshipment point for Southwest Asian opiates, hashish, and cannabis transiting the Balkan route and - to a lesser extent - cocaine from South America destined for Western Europe; limited opium and expanding cannabis production; ethnic Albanian narcotrafficking organizations active and expanding in Europe; vulnerable to money laundering associated with regional trafficking in narcotics, arms, contraband, and illegal aliens

Algeria

Introduction ::

Background:

After more than a century of rule by France, Algerians fought through much of the 1950s to achieve independence in 1962. Algeria's primary political party, the National Liberation Front (FLN), was established in 1954 as part of the struggle for independence and has largely dominated politics since. The Government of Algeria in 1988 instituted a multi-party system in response to public unrest, but the surprising first round success of the Islamic Salvation Front (FIS) in

the December 1991 balloting spurred the Algerian army to intervene and postpone the second round of elections to prevent what the secular elite feared would be an extremist-led government from assuming power. The army began a crackdown on the FIS that spurred FIS supporters to begin attacking government targets, and fighting escalated into an insurgency, which saw intense violence between 1992-98 resulting in over 100,000 deaths - many attributed to indiscriminate massacres of villagers by extremists. The government gained the upper hand by the late-1990s, and FIS's armed wing, the Islamic Salvation Army, disbanded in January 2000. Abdelaziz BOUTEFLIKA, with the backing of the military, won the presidency in 1999 in an election widely viewed as fraudulent, was reelected to a second term in 2004, and overwhelmingly won a third term in 2009 after the government amended the constitution in 2008 to remove presidential term limits. Longstanding problems continue to face BOUTEFLIKA, including large-scale unemployment, a shortage of housing, unreliable electrical and water supplies, government inefficiencies and corruption, and the continuing activities of extremist militants. The Salafist Group for Preaching and Combat (GSPC) in 2006 merged with al-Qai'da to form al-Qai'da in the Lands of the Islamic Maghreb, which has launched an ongoing series of kidnappings and bombings targeting the Algerian Government and Western interests.

Economy ::

Economy - overview:

Algeria's economy remains dominated by the state, a legacy of the country's socialist post-independence development model. Gradual liberalization since the mid-1990s has opened up more of the economy, but in recent years Algeria has imposed new restrictions on foreign involvement in its economy and largely halted the privatization of state-owned industries. Hydrocarbons have long been the backbone of the economy, accounting for roughly 60% of budget revenues, 30% of GDP, and over 95% of export earnings. Algeria has the eighth-largest reserves of natural gas in the world and is the fourth-largest gas exporter. It ranks 16th in oil reserves. Thanks to strong hydrocarbon revenues, Algeria has a cushion of \$150 billion in foreign currency reserves and a large hydrocarbon stabilization fund. In addition, Algeria's external debt is extremely low at about 1% of GDP. Algeria has struggled to develop industries outside of hydrocarbons in part because of high costs and an inert state bureaucracy. The government's efforts to diversify the economy by attracting foreign and domestic investment outside the energy sector have done little to reduce high poverty and youth unemployment rates. In 2010, Algeria began a five-year, \$286 billion development program to update the country's infrastructure and provide jobs. The costly program will boost Algeria's economy in 2011 but worsen the country's budget deficit. Long-term economic challenges include diversification from hydrocarbons, relaxing state control of the economy, and providing adequate jobs for younger Algerians.

Telephones - mobile cellular:

Telephone system:

general assessment: privatization of Algeria's telecommunications sector began in 2000; three mobile cellular licenses have been issued and, in 2005, a consortium led by Egypt's Orascom Telecom won a 15-year license to build and operate a fixed-line network in Algeria; the license will allow Orascom to develop high-speed data and other specialized services and contribute to meeting the large unfulfilled demand for basic residential telephony; Internet broadband services began in 2003

domestic: a limited network of fixed lines with a teledensity of less than 10 telephones per 100 persons is offset by the rapid increase in mobile-cellular subscribership; in 2009, combined fixed-line and mobile-cellular teledensity was roughly 100 telephones per 100 persons

Transnational Issues ::

Disputes - international:

Algeria, and many other states, rejects Moroccan administration of Western Sahara; the Polisario Front, exiled in Algeria, represents the Sahrawi Arab Democratic Republic; Algeria's border with Morocco remains an irritant to bilateral relations, each nation accusing the other of harboring militants and arms smuggling; Algeria remains concerned about armed bandits operating throughout the Sahel who sometimes destabilize southern Algerian towns; dormant disputes include Libyan claims of about 32,000 sq km still reflected on its maps of southeastern Algeria and the FLN's assertions of a claim to Chirac Pastures in southeastern Morocco

Refugees and internally displaced persons:

refugees (country of origin): 90,000 (Western Saharan Sahrawi, mostly living in Algerian-sponsored camps in the southwestern Algerian town of Tindouf)

IDPs: undetermined (civil war during 1990s) (2007)

Trafficking in persons:

current situation: Algeria is a transit country for men and women trafficked from sub-Saharan Africa to Europe for the purposes of commercial sexual exploitation and involuntary servitude; criminal networks of sub-Saharan nationals in southern Algeria facilitate transit by arranging transportation, forged documents, and promises of employment

tier rating: Tier 2 Watch List - Algeria is placed on the Tier 2 Watch List because it does not fully comply with the minimum standards for the elimination of trafficking, however, it is making significant efforts to do so; in January 2009, the government approved new legislation that criminalizes trafficking in persons for the purposes of labor and sexual exploitation representing an important step toward complying with international standards; despite these efforts, the government did not show overall progress in punishing trafficking crimes and protecting trafficking victims and continued to lack adequate measures to protect victims and prevent trafficking (2009)

American Samoa

Introduction ::

Background:

Settled as early as 1000 B.C., Samoa was "discovered" by European explorers in the 18th century. International rivalries in the latter half of the 19th century were settled by an 1899 treaty in which Germany and the US divided the Samoan archipelago. The US formally occupied its portion - a smaller group of eastern islands with the excellent harbor of Pago Pago - the following year.

Economy ::

Economy - overview:

American Samoa has a traditional Polynesian economy in which more than 90% of the land is communally owned. Economic activity is strongly linked to the US with which American Samoa conducts most of its commerce. Tuna fishing and tuna processing plants are the backbone of the private sector, with canned tuna the primary export. The two tuna canneries account for 80% of employment. In late September 2009, an earthquake and the resulting tsunami devastated American Samoa and nearby Samoa, disrupting transportation and power generation, and resulting in about 200 deaths. The US Federal Emergency Management Agency is overseeing a relief program of nearly \$25 million. Transfers from the US Government add substantially to American Samoa's economic well being. Attempts by the government to develop a larger and broader economy are restrained by Samoa's remote location, its limited transportation, and its devastating hurricanes. Tourism is a promising developing sector.

Andorra

Introduction ::

Background:

For 715 years, from 1278 to 1993, Andorrans lived under a unique co-principality, ruled by French and Spanish leaders (from 1607 onward, the French chief of state and the Spanish bishop of Seu d'Urgell). In 1993, this feudal system was modified with the titular heads of state retained, but the government transformed into a parliamentary democracy. For decades Andorra enjoyed its status as a small refuge of fiscal and banking freedom and benefitted from Spanish and French

tourists attracted to the country's duty-free shopping. The situation has changed in recent years as Andorra started to tax foreign investment and other sectors. Tourism accounts for over 80% of Andorra's gross domestic product.

Economy ::

Economy - overview:

Tourism, the mainstay of Andorra's tiny, well-to-do economy, accounts for more than 80% of GDP. An estimated 11 million tourists visit annually, attracted by Andorra's duty-free status for some products and by its summer and winter resorts. Andorra's comparative advantage eroded when the borders of neighboring France and Spain opened, providing broader availability of goods and lower tariffs. The banking sector, with its partial "tax haven" status, also contributes

substantially to the economy. Agricultural production is limited - only 2% of the land is arable - and most food has to be imported. The principal livestock activity is sheep raising. Manufacturing output consists mainly of cigarettes, cigars, and furniture. Andorra is a member of the EU Customs Union and is treated as an EU member for trade in manufactured goods (no tariffs) and as a non-EU member for agricultural products.

Angola

Introduction ::

Background:

Angola is rebuilding its country after the end of a 27-year civil war in 2002. Fighting between the Popular Movement for the Liberation of Angola (MPLA), led by Jose Eduardo DOS SANTOS, and the National Union for the Total Independence of Angola (UNITA), led by Jonas SAVIMBI, followed independence from Portugal in 1975. Peace seemed imminent in 1992 when Angola held national elections, but fighting picked up again by 1996. Up to 1.5 million lives may have

been lost - and 4 million people displaced - in the quarter century of fighting. SAVIMBI's death in 2002 ended UNITA's insurgency and strengthened the MPLA's hold on power. President DOS SANTOS held legislative elections in September 2008 and, despite promising to hold presidential elections in 2009, has since made a presidential poll contingent on the drafting of a new constitution.

Economy ::

Economy - overview:

Angola's high growth rate in recent years was driven by high international prices for its oil. Angola became a member of OPEC in late 2006 and in late 2007 was assigned a production quota of 1.9 million barrels a day (bbl/day), somewhat less than the 2-2.5 million bbl/day Angola's government had wanted. Oil production and its supporting activities contribute about 85% of GDP. Diamond exports contribute an additional 5%. Subsistence agriculture provides the main livelihood for most of the people, but half of the country's food is still imported. Increased oil production supported growth averaging more than 15% per year from 2004 to 2008. A postwar reconstruction boom and resettlement of displaced persons has led to high rates of growth in construction and agriculture as well. Much of the country's infrastructure is still damaged or undeveloped from the 27-year-long civil war. Land mines left from the war still mar the countryside, even

though peace was established after the death of rebel leader Jonas SAVIMBI in February 2002. Since 2005, the government has used billions of dollars in credit lines from China, Brazil, Portugal, Germany, Spain, and the EU to rebuild Angola's public infrastructure. The global recession temporarily stalled economic growth. Lower prices for oil and diamonds during the global recession led to a contraction in GDP in 2009, and many construction projects stopped because Luanda accrued \$9 billion in arrears to foreign construction companies when government revenue fell in 2008 and 2009. Angola abandoned its currency peg in 2009, and in November 2009 signed onto an IMF Stand-By Arrangement loan of \$1.4 billion to rebuild international reserves. Although consumer inflation declined from 325% in 2000 to under 14% in 2010, Luanda has been unable to reduce inflation below 10%. The Angolan kwanza depreciated again in mid 2010, which, along with higher oil prices, should boost economic growth in all sectors. Corruption, especially in the extractive sectors, also is a major challenge.

Anguilla

>

Introduction ::

Background:

Colonized by English settlers from Saint Kitts in 1650, Anguilla was administered by Great Britain until the early 19th century, when the island - against the wishes of the inhabitants - was incorporated into a single British dependency along with Saint Kitts and Nevis. Several attempts at separation failed. In 1971, two years after a revolt, Anguilla was finally allowed to secede; this arrangement was formally recognized in 1980 with Anguilla becoming a separate British

dependency.

note: local anthem adopted 1981; as a territory of the United Kingdom, "God Save the Queen" is official (see United Kingdom)

Economy ::

Economy - overview:

Anguilla has few natural resources, and the economy depends heavily on luxury tourism, offshore banking, lobster fishing, and remittances from emigrants. Increased activity in the tourism industry has spurred the growth of the construction sector contributing to economic growth. Anguillan officials have put substantial effort into developing the offshore financial sector, which is small but growing. In the medium term, prospects for the economy will depend largely on the tourism sector and, therefore, on revived income growth in the industrialized nations as well as on favorable weather conditions.

Antarctica

Introduction ::

Background:

Speculation over the existence of a "southern land" was not confirmed until the early 1820s when British and American commercial operators and British and Russian national expeditions began exploring the Antarctic Peninsula region and other areas south of the Antarctic Circle. Not until 1840 was it established that Antarctica was indeed a continent and not just a group of islands or an area of ocean. Several exploration "firsts" were achieved in the early 20th century, but generally the area saw little human activity. Following World War II, however, there was an upsurge in scientific research on the continent. A number of countries have set up a range of year-round and seasonal stations, camps, and refuges to support scientific research in Antarctica. Seven have made territorial claims, but not all

countries recognize these claims. In order to form a legal framework for the activities of nations on the continent, an Antarctic Treaty was negotiated that neither denies nor gives recognition to existing territorial claims; signed in 1959, it entered into force in 1961.

Geography ::

Location:

continent mostly south of the Antarctic Circle

Geographic coordinates:

90 00 S, 0 00 E

Map references:

Antarctic Region

Area:

total: 14 million sq km

land: 14 million sq km (280,000 sq km ice-free, 13.72 million sq km ice-covered) (est.)

note: fifth-largest continent, following Asia, Africa, North America, and South America, but larger than Australia and the subcontinent of Europe

Area - comparative:

slightly less than 1.5 times the size of the US

Land boundaries:

0 km

note: see entry on Disputes - international

Coastline:

17,968 km

Maritime claims:

Australia, Chile, and Argentina claim Exclusive Economic Zone (EEZ)

rights or similar over 200 nm extensions seaward from their continental claims, but like the claims themselves, these zones are not accepted by other countries; 21 of 28 Antarctic consultative nations have made no claims to Antarctic territory (although Russia and the US have reserved the right to do so) and do not recognize the claims of the other nations; also see the Disputes - international entry

Climate:

Current Weather

severe low temperatures vary with latitude, elevation, and distance from the ocean; East Antarctica is colder than West Antarctica because of its higher elevation; Antarctic Peninsula has the most moderate climate; higher temperatures occur in January along the coast and average slightly below freezing

Terrain:

about 98% thick continental ice sheet and 2% barren rock, with average elevations between 2,000 and 4,000 meters; mountain ranges up to nearly 5,000 meters; ice-free coastal areas include parts of southern Victoria Land, Wilkes Land, the Antarctic Peninsula area, and parts of Ross Island on McMurdo Sound; glaciers form ice shelves along about half of the coastline, and floating ice shelves constitute 11% of the area of the continent

Elevation extremes:

lowest point: Bentley Subglacial Trench -2,540 m

highest point: Vinson Massif 4,897 m

note: the lowest known land point in Antarctica is hidden in the Bentley Subglacial Trench; at its surface is the deepest ice yet discovered and the world's lowest elevation not under seawater

Natural resources:

iron ore, chromium, copper, gold, nickel, platinum and other minerals, and coal and hydrocarbons have been found in small uncommercial quantities; none presently exploited; krill, finfish, and crab have been taken by commercial fisheries

Land use:

arable land: 0%

permanent crops: 0%

other: 100% (ice 98%, barren rock 2%) (2005)

Natural hazards:

katabatic (gravity-driven) winds blow coastward from the high interior; frequent blizzards form near the foot of the plateau; cyclonic storms form over the ocean and move clockwise along the coast; volcanism on Deception Island and isolated areas of West Antarctica; other seismic activity rare and weak; large icebergs may calve from ice shelf

Environment - current issues:

in 1998, NASA satellite data showed that the Antarctic ozone hole was the largest on record, covering 27 million square kilometers; researchers in 1997 found that increased ultraviolet light passing through the hole damages the DNA of icefish, an Antarctic fish lacking hemoglobin; ozone depletion earlier was shown to harm one-celled Antarctic marine plants; in 2002, significant areas of ice shelves disintegrated in response to regional warming

Geography - note:

Antarctic Treaty Summary - the Antarctic region is governed by a system known as the Antarctic Treaty System; the system includes: 1. the Antarctic Treaty, signed on 1 December 1959 and entered into force on 23 June 1961, which establishes the legal framework for the

management of Antarctica, 2. Recommendations and Measures adopted at meetings of Antarctic Treaty countries, 3. The Convention for the Conservation of Antarctic Seals (1972), 4. The Convention for the Conservation of Antarctic Marine Living Resources (1980), and 5. The Protocol on Environmental Protection to the Antarctic Treaty (1991); the 33rd Antarctic Treaty Consultative Meeting was held in Punta del Este, Uruguay in May 2010; at these periodic meetings, decisions are made by consensus (not by vote) of all consultative member nations; by April 2010, there were 48 treaty member nations: 28 consultative and 20 non-consultative; consultative (decision-making) members include the seven nations that claim portions of Antarctica as national territory (some claims overlap) and 21 non-claimant nations; the US and Russia have reserved the right to make claims; the US does not recognize the claims of others; Antarctica is administered through meetings of the consultative member nations; decisions from these meetings are carried out by these member nations (with respect to their own nationals and operations) in accordance with their own national laws; the years in parentheses indicate when a consultative member-nation acceded to the Treaty and when it was accepted as a consultative member, while no date indicates the country was an original 1959 treaty signatory; claimant nations are - Argentina, Australia, Chile, France, NZ, Norway, and the UK. Nonclaimant consultative nations are - Belgium, Brazil (1975/1983), Bulgaria (1978/1998) China (1983/1985), Ecuador (1987/1990), Finland (1984/1989), Germany (1979/1981), India (1983/1983), Italy (1981/1987), Japan, South Korea (1986/1989), Netherlands (1967/1990), Peru (1981/1989), Poland (1961/1977), Russia, South Africa, Spain (1982/1988), Sweden (1984/1988), Ukraine (1992/2004), Uruguay (1980/1985), and the US; non-consultative members, with year of accession in parentheses, are - Austria (1987), Belarus (2006), Canada (1988), Colombia (1989), Cuba (1984), Czech Republic (1962/1993), Denmark (1965), Estonia (2001), Greece (1987), Guatemala (1991), Hungary (1984), North Korea (1987), Monaco (2008), Papua New Guinea (1981), Portugal (2010), Romania (1971), Slovakia (1962/1993), Switzerland (1990), Turkey (1996), and Venezuela (1999); note - Czechoslovakia acceded to the Treaty in 1962 and separated into the Czech Republic and Slovakia in 1993;

claimant nations are - Argentina, Australia, Chile, France, NZ, Norway, and the UK. Nonclaimant consultative nations are - Belgium, Brazil (1975/1983), Bulgaria (1978/1998) China (1983/1985), Ecuador (1987/1990), Finland (1984/1989), Germany (1979/1981), India (1983/1983), Italy (1981/1987), Japan, South Korea

(1986/1989), Netherlands (1967/1990), Peru (1981/1989), Poland (1961/1977), Russia, South Africa, Spain (1982/1988), Sweden (1984/1988), Ukraine (1992/2004), Uruguay (1980/1985), and the US; non-consultative members, with year of accession in parentheses, are - Austria (1987), Belarus (2006), Canada (1988), Colombia (1989), Cuba (1984), Czech Republic (1962/1993), Denmark (1965), Estonia (2001), Greece (1987), Guatemala (1991), Hungary (1984), North Korea (1987), Monaco (2008), Papua New Guinea (1981), Portugal (2010), Romania (1971), Slovakia (1962/1993), Switzerland (1990), Turkey (1996), and Venezuela (1999); note - Czechoslovakia acceded to the Treaty in 1962 and separated into the Czech Republic and Slovakia in 1993;

Article 1 - area to be used for peaceful purposes only; military activity, such as weapons testing, is prohibited, but military personnel and equipment may be used for scientific research or any other peaceful purpose; Article 2 - freedom of scientific investigation and cooperation shall continue; Article 3 - free exchange of information and personnel, cooperation with the UN and other international agencies; Article 4 - does not recognize, dispute, or establish territorial claims and no new claims shall be asserted while the treaty is in force; Article 5 - prohibits nuclear explosions or disposal of radioactive wastes; Article 6 - includes under the treaty all land and ice shelves south of 60 degrees 00 minutes south and reserves high seas rights; Article 7 - treaty-state observers have free access, including aerial observation, to any area and may inspect all stations, installations, and equipment; advance notice of all expeditions and of the introduction of military personnel must be given; Article 8 - allows for jurisdiction over observers and scientists by their own states; Article 9 - frequent consultative meetings take place among member nations; Article 10 - treaty states will discourage activities by any country in Antarctica that are contrary to the treaty; Article 11 - disputes to be settled peacefully by the parties concerned or, ultimately, by the ICJ; Articles 12, 13, 14 - deal with upholding, interpreting, and amending the treaty among involved nations; other agreements - some 200 recommendations adopted at treaty consultative meetings and ratified by governments; a mineral resources agreement was signed in 1988 but remains unratified; the Protocol on Environmental Protection to the Antarctic Treaty was signed 4 October 1991 and entered into force 14 January 1998; this agreement provides for the protection of the Antarctic environment through six specific annexes: 1) environmental impact assessment, 2) conservation of Antarctic fauna and flora, 3) waste disposal and waste management, 4) prevention of marine pollution, 5) area protection and management and 6) liability arising

from environmental emergencies; it prohibits all activities relating to mineral resources except scientific research; a permanent Antarctic Treaty Secretariat was established in 2004 in Buenos Aires, Argentina

Legal system:

Antarctica is administered through annual meetings - known as Antarctic Treaty Consultative Meetings - which include consultative member nations, non-consultative member nations, observer organizations, and expert organizations; decisions from these meetings are carried out by these member nations (with respect to their own nationals and operations) in accordance with their own national laws; more generally, access to the Antarctic Treaty area, that is to all areas between 60 and 90 degrees south latitude, is subject to a number of relevant legal instruments and authorization procedures adopted by the states party to the Antarctic Treaty; note - US law, including certain criminal offenses by or against US nationals, such as murder, may apply extraterritorially; some US laws directly apply to Antarctica; for example, the Antarctic Conservation Act, 16 U.S.C. section 2401 et seq., provides civil and criminal penalties for the following activities unless authorized by regulation of statute: the taking of native mammals or birds; the introduction of nonindigenous plants and animals; entry into specially protected areas; the discharge or disposal of pollutants; and the importation into the US of certain items from Antarctica; violation of the Antarctic Conservation Act carries penalties of up to \$10,000 in fines and one year in prison; the National Science Foundation and Department of Justice share enforcement responsibilities; Public Law 95-541, the US Antarctic Conservation Act of 1978, as amended in 1996, requires expeditions from the US to Antarctica to notify, in advance, the Office of Oceans, Room 5805, Department of State, Washington, DC 20520, which reports such plans to other nations as required by the Antarctic Treaty; for more information, contact Permit Office, Office of Polar Programs, National Science Foundation, Arlington, Virginia 22230; telephone: (703) 292-8030, or visit its website at www.nsf.gov

Economy ::

Economy - overview:

Scientific undertakings rather than commercial pursuits are the predominate human activity in Antarctica. Fishing off the coast and tourism, both based abroad, account for Antarctica's limited economic activity. Antarctic fisheries, targeting three main species - Patagonian

and Antarctic toothfish (*Dissostichus eleginoides* and *D. mawsoni*), mackerel icefish (*Champsocephalus gunnari*), and krill (*Euphausia superba*) - reported landing 141,147 metric tons in 2008-09 (1 July - 30 June). (Estimated fishing is from the area covered by the Convention on the Conservation of Antarctic Marine Living Resources (CCAMLR), which extends slightly beyond the Antarctic Treaty area.) Unregulated fishing, particularly of Patagonian toothfish (also known as Chilean sea bass), is a serious problem. The CCAMLR determines the recommended catch limits for marine species. A total of 37,858 tourists visited the Antarctic Treaty area in the 2008-09 Antarctic summer, down from the 46,265 visitors in 2007-2008 (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators (IAATO); this does not include passengers on overflights). Nearly all of them were passengers on commercial (nongovernmental) ships and several yachts that make trips during the summer.

surveying and nautical charting matters in Antarctic Treaty area; it coordinates and facilitates provision of accurate and appropriate charts and other aids to navigation in support of safety of navigation in region; membership of HCA is open to any IHO Member State whose government has acceded to the Antarctic Treaty and which contributes resources or data to IHO Chart coverage of the area

Military ::

Military - note:

the Antarctic Treaty prohibits any measures of a military nature, such as the establishment of military bases and fortifications, the carrying out of military maneuvers, or the testing of any type of weapon; it permits the use of military personnel or equipment for scientific research or for any other peaceful purposes

Transnational Issues ::

Disputes - international:

the Antarctic Treaty freezes, and most states do not recognize, the land and maritime territorial claims made by Argentina, Australia, Chile, France, New Zealand, Norway, and the United Kingdom (some overlapping) for three-fourths of the continent; the US and Russia reserve the right to make claims; no formal claims have been made in the sector between 90 degrees west and 150 degrees west; the International Whaling Commission created a sanctuary around the entire continent to deter catches by countries claiming to conduct scientific whaling; Australia has established a similar preserve in the waters around its territorial claim

Introduction ::

Background:

The Siboney were the first to inhabit the islands of Antigua and Barbuda in 2400 B.C., but Arawak Indians populated the islands when COLUMBUS landed on his second voyage in 1493. Early settlements by the Spanish and French were succeeded by the English who formed a colony in 1667. Slavery, established to run the sugar plantations on Antigua, was abolished in 1834. The islands became an independent state within the British Commonwealth of Nations in 1981.

note: adopted 1967; as a Commonwealth country, in addition to the national anthem, "God Save the Queen" serves as the royal anthem (see United Kingdom)

Economy ::

Economy - overview:

Tourism continues to dominate Antigua and Barbuda's economy, accounting for nearly 60% of GDP and 40% of investment. The dual-island nation's agricultural production is focused on the domestic market and constrained by a limited water supply and a labor shortage stemming from the lure of higher wages in tourism and construction. Manufacturing comprises enclave-type assembly for export with major products being bedding, handicrafts, and electronic components. Prospects for economic growth in the medium term will continue to depend on tourist arrivals from the US, Canada, and Europe and potential damages from natural disasters. After taking office in 2004, the SPENCER government adopted an ambitious fiscal reform program, and was successful in reducing its public debt-to-GDP ratio from 120% to about 90% in 2008. However, the global financial crisis that began in 2008, has led to a significant increase in the national debt, which topped 130% at the end of 2010. The Antiguan economy experienced solid growth from 2003 to 2007, reaching over 12% in 2006 driven by a construction boom in hotels and housing associated with the Cricket World Cup, but growth dropped off in 2008 with the end of the boom. In 2009, Antigua's economy was

severely hit by the global economic crisis, suffering from the collapse of its largest financial institution and a steep decline in tourism. This decline continued in 2010 as the country struggled with a yawning budget deficit.

Arctic Ocean

>

(map)

Introduction ::

Background:

The Arctic Ocean is the smallest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, Indian Ocean, and the recently delimited Southern Ocean). The Northwest Passage (US and Canada) and Northern Sea Route (Norway and Russia) are two important seasonal waterways. In recent years the polar ice pack has thinned allowing for increased navigation and raising the possibility of future sovereignty and shipping disputes among countries bordering the Arctic Ocean.

Geography ::

Location:

body of water between Europe, Asia, and North America, mostly north of the Arctic Circle

Geographic coordinates:

90 00 N, 0 00 E

Map references:

Arctic

Area: 

total: 14.056 million sq km

note: includes Baffin Bay, Barents Sea, Beaufort Sea, Chukchi Sea, East Siberian Sea, Greenland Sea, Hudson Bay, Hudson Strait, Kara Sea, Laptev Sea, Northwest Passage, and other tributary water bodies

Area - comparative:

slightly less than 1.5 times the size of the US

Coastline:

45,389 km

Climate:

Current Weather

polar climate characterized by persistent cold and relatively narrow annual temperature ranges; winters characterized by continuous darkness, cold and stable weather conditions, and clear skies; summers characterized by continuous daylight, damp and foggy weather, and weak cyclones with rain or snow

Terrain:

central surface covered by a perennial drifting polar icepack that, on average, is about 3 meters thick, although pressure ridges may be three times that thickness; clockwise drift pattern in the Beaufort Gyral Stream, but nearly straight-line movement from the New Siberian Islands (Russia) to Denmark Strait (between Greenland and Iceland); the icepack is surrounded by open seas during the summer, but more than doubles in size during the winter and extends to the encircling landmasses; the ocean floor is about 50% continental shelf

(highest percentage of any ocean) with the remainder a central basin interrupted by three submarine ridges (Alpha Cordillera, Nansen Cordillera, and Lomonosov Ridge)

Elevation extremes:

lowest point: Fram Basin -4,665 m

highest point: sea level 0 m

Natural resources:

sand and gravel aggregates, placer deposits, polymetallic nodules, oil and gas fields, fish, marine mammals (seals and whales)

Natural hazards:

ice islands occasionally break away from northern Ellesmere Island; icebergs calved from glaciers in western Greenland and extreme northeastern Canada; permafrost in islands; virtually ice locked from October to June; ships subject to superstructure icing from October to May

Environment - current issues:

endangered marine species include walruses and whales; fragile ecosystem slow to change and slow to recover from disruptions or damage; thinning polar icepack

Geography - note:

major chokepoint is the southern Chukchi Sea (northern access to the Pacific Ocean via the Bering Strait); strategic location between North America and Russia; shortest marine link between the extremes of eastern and western Russia; floating research stations operated by the US and Russia; maximum snow cover in March or April about 20 to 50 centimeters over the frozen ocean; snow cover lasts about 10 months

Economy ::

Economy - overview:

Economic activity is limited to the exploitation of natural resources, including petroleum, natural gas, fish, and seals.

Transportation ::

Ports and terminals:

Churchill (Canada), Murmansk (Russia), Prudhoe Bay (US)

Transportation - note:

sparse network of air, ocean, river, and land routes; the Northwest Passage (North America) and Northern Sea Route (Eurasia) are important seasonal waterways

Transnational Issues ::

Disputes - international:

the littoral states are engaged in various stages of demonstrating the limits of their continental shelves beyond 200 nautical miles from their declared baselines in accordance with Article 76, paragraph 8, of the United Nations Convention on the Law of the Sea; record summer melting of sea ice in the Arctic has restimulated interest in maritime shipping lanes and sea floor exploration

Argentina

>

(map)

Introduction ::

Background:

In 1816, the United Provinces of the Rio Plata declared their independence from Spain. After Bolivia, Paraguay, and Uruguay went their separate ways, the area that remained became Argentina. The country's population and culture were heavily shaped by immigrants from throughout Europe, but most particularly Italy and Spain, which provided the largest percentage of newcomers from 1860 to 1930. Up until about the mid-20th century, much of Argentina's history was dominated by periods of internal political conflict between Federalists and Unitarians and between civilian and military factions. After World War II, an era of Peronist populism and direct and indirect military interference in subsequent governments was followed by a military junta that took power in 1976. Democracy returned in 1983 after a failed bid to seize the Falkland (Malvinas) Islands by force, and has persisted despite numerous challenges, the most formidable of which was a severe economic crisis in 2001-02 that led to violent public protests and the successive resignations of several presidents.

Economy ::

Economy - overview:

Argentina benefits from rich natural resources, a highly literate population, an export-oriented agricultural sector, and a diversified industrial base. Although one of the world's wealthiest countries 100 years ago, Argentina suffered during most of the 20th century from recurring economic crises, persistent fiscal and current account deficits, high inflation, mounting external debt, and capital flight. A severe depression, growing public and external indebtedness, and a bank run culminated in 2001 in the most serious economic, social, and political crisis in the country's turbulent history. Interim President Adolfo RODRIGUEZ SAA declared a default - the largest in history - on the government's foreign debt in December of that year, and abruptly resigned only a few days after taking office. His successor, Eduardo DUHALDE, announced an end to the peso's decade-long 1-to-1 peg to the US dollar in early 2002. The economy bottomed out that year, with real GDP 18% smaller than in 1998 and almost 60% of Argentines under the poverty line. Real GDP rebounded to grow by an average 8.5% annually over the subsequent six years, taking advantage of previously idled industrial capacity and labor, an audacious debt restructuring and reduced debt burden, excellent international financial conditions, and expansionary monetary and fiscal policies. Inflation also increased, however, during the administration of President Nestor KIRCHNER, which responded with price restraints on businesses, as well as export taxes and restraints, and beginning in early 2007, with understating inflation data. Cristina FERNANDEZ DE KIRCHNER succeeded her husband as President in late 2007, and the rapid economic growth of previous years began to slow sharply the following year as government policies held back exports and the world economy fell into recession. The economy has rebounded from the 2009 recession, but the government's continued reliance on expansionary fiscal and monetary policies risks exacerbating already high inflation, which remains under-reported by official statistics.

Transnational Issues ::

Disputes - international:

Argentina continues to assert its claims to the UK-administered Falkland Islands (Islas Malvinas), South Georgia, and the South Sandwich Islands in its constitution, forcibly occupying the Falklands in 1982, but in 1995 agreed no longer to seek settlement by force; territorial claim in Antarctica partially overlaps UK and Chilean claims; unruly region at convergence of Argentina-Brazil-Paraguay borders is locus of money laundering, smuggling, arms and illegal narcotics trafficking, and fundraising for extremist organizations; uncontested dispute between Brazil and Uruguay over Braziliera/Brasiliera Island in the Quarai/Cuareim River leaves the tripoint with Argentina in question; in 2006, Argentina went to the ICJ to protest, on environmental grounds, the construction of two pulp mills in Uruguay on the Uruguay River, which forms the boundary; both parties presented their pleadings in 2007 with Argentina's reply in January and Uruguay's rejoinder in July 2008; the joint boundary commission, established by Chile and Argentina in 2001 has yet to map and demarcate the delimited boundary in the inhospitable Andean Southern Ice Field (Campo de Hielo Sur)

Illicit drugs:

a transshipment country for cocaine headed for Europe, heroin headed for the US, and ephedrine and pseudoephedrine headed for Mexico; some money-laundering activity, especially in the Tri-Border Area; law enforcement corruption; a source for precursor chemicals; increasing domestic consumption of drugs in urban centers, especially cocaine base and synthetic drugs (2008)

Introduction ::

Background:

Armenia prides itself on being the first nation to formally adopt Christianity (early 4th century). Despite periods of autonomy, over the centuries Armenia came under the sway of various empires including the Roman, Byzantine, Arab, Persian, and Ottoman. During World War I in the western portion of Armenia, Ottoman Turkey instituted a policy of forced resettlement coupled with other harsh practices that resulted in an estimated 1 million Armenian deaths. The eastern area

of Armenia was ceded by the Ottomans to Russia in 1828; this portion declared its independence in 1918, but was conquered by the Soviet Red Army in 1920. Armenian leaders remain preoccupied by the long conflict with Azerbaijan over Nagorno-Karabakh, a primarily Armenian-populated region, assigned to Soviet Azerbaijan in the 1920s by Moscow. Armenia and Azerbaijan began fighting over the area in 1988; the struggle escalated after both countries attained independence from the Soviet Union in 1991. By May 1994, when a cease-fire took hold, ethnic Armenian forces held not only Nagorno-Karabakh but also a significant portion of Azerbaijan proper. The economies of both sides have been hurt by their inability to make substantial progress toward a peaceful resolution. Turkey closed the common border with Armenia in 1994 because of the Armenian separatists' control of Nagorno-Karabakh and surrounding areas, further hampering Armenian economic growth. In 2009, senior Armenian leaders began pursuing rapprochement with Turkey, aiming to secure an opening of the border; this process is currently dormant.

Economy ::

Economy - overview:

After several years of double-digit economic growth, Armenia faced a severe economic recession with GDP declining more than 14% in 2009, despite large loans from multilateral institutions. Sharp declines in the construction sector and workers' remittances, particularly from Russia, were the main reasons for the downturn. The economy began to recover in 2010 with nearly 5% growth. Under the old Soviet central planning system, Armenia developed a modern industrial sector, supplying machine tools, textiles, and other manufactured goods to sister republics, in exchange for raw materials and energy. Armenia has since switched to small-scale agriculture and away from the large agroindustrial complexes of the Soviet era. Armenia has managed to reduce poverty, slash inflation, stabilize its currency, and privatize most small- and medium-sized enterprises. Since the breakup of the Soviet Union in 1991, Armenia had made progress in implementing some economic reforms, including privatization, price reforms, and prudent fiscal policies, but geographic isolation, a narrow export base, and pervasive monopolies in important business sectors have made Armenia particularly vulnerable to the sharp deterioration in the global economy and the economic downturn in Russia. The conflict with Azerbaijan over the ethnic Armenian-dominated region of Nagorno-Karabakh contributed to a severe

economic decline in the early 1990s and Armenia's borders with Turkey remain closed until 2010, when Turkey and Armenia signed an accord to reestablish diplomatic relations. Armenia is particularly dependent on Russian commercial and governmental support and most key Armenian infrastructure is Russian-owned and/or managed, especially in the energy sector. The electricity distribution system was privatized in 2002 and bought by Russia's RAO-UES in 2005. Construction of a pipeline to deliver natural gas from Iran to Armenia was completed in December 2008, and gas deliveries are slated to expand due to the April 2010 completion of the Yerevan Thermal Power Plant. Armenia has some mineral deposits (copper, gold, bauxite). Pig iron, unwrought copper, and other nonferrous metals are Armenia's highest valued exports. Armenia's severe trade imbalance has been offset somewhat by international aid, remittances from Armenians working abroad, and foreign direct investment. Armenia joined the WTO in January 2003. The government made some improvements in tax and customs administration in recent years, but anti-corruption measures have been ineffective and the current economic downturn has led to a sharp drop in tax revenue and forced the government to accept large loan packages from Russia, the IMF, and other international financial institutions. Armenia will need to pursue additional economic reforms in order to regain economic growth and improve economic competitiveness and employment opportunities, especially given its economic isolation from two of its nearest neighbors, Turkey and Azerbaijan.

Introduction ::

Background:

Discovered and claimed for Spain in 1499, Aruba was acquired by the Dutch in 1636. The island's economy has been dominated by three main industries. A 19th century gold rush was followed by prosperity brought on by the opening in 1924 of an oil refinery. The last decades of the 20th century saw a boom in the tourism industry. Aruba seceded from the Netherlands Antilles in 1986 and became a separate, autonomous member of the Kingdom of the Netherlands. Movement

toward full independence was halted at Aruba's request in 1990.

Economy ::

Economy - overview:

Tourism is the mainstay of the small open Aruban economy, together with offshore banking. Oil refining and storage ended in 2009. The rapid growth of the tourism sector over the last decade has resulted in a substantial expansion of other activities. Over 1.5 million tourists per year visit Aruba with 75% of those from the US. Construction continues to boom with hotel capacity five times the 1985 level. Tourist arrivals rebounded strongly following a dip after the 11 September 2001 attacks. The government has made cutting the budget and trade deficits a high priority.

Atlantic Ocean

(map)

Introduction ::

Background:

The Atlantic Ocean is the second largest of the world's five oceans (after the Pacific Ocean, but larger than the Indian Ocean, Southern Ocean, and Arctic Ocean). The Kiel Canal (Germany), Oresund (Denmark-Sweden), Bosphorus (Turkey), Strait of Gibraltar (Morocco-Spain), and the Saint Lawrence Seaway (Canada-US) are important strategic access waterways. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth world ocean, the Southern Ocean, removed the portion of the Atlantic Ocean south of 60 degrees south latitude.

Area:

total: 76.762 million sq km

note: includes Baltic Sea, Black Sea, Caribbean Sea, Davis Strait, Denmark Strait, part of the Drake Passage, Gulf of Mexico, Labrador Sea, Mediterranean Sea, North Sea, Norwegian Sea, almost all of the Scotia Sea, and other tributary water bodies

Area - comparative:

slightly less than 6.5 times the size of the US

Coastline:

111,866 km

Climate:

Current Weather

tropical cyclones (hurricanes) develop off the coast of Africa near Cape Verde and move westward into the Caribbean Sea; hurricanes can occur from May to December but are most frequent from August to November

Terrain:

surface usually covered with sea ice in Labrador Sea, Denmark Strait, and coastal portions of the Baltic Sea from October to June; clockwise warm-water gyre (broad, circular system of currents) in the northern Atlantic, counterclockwise warm-water gyre in the southern Atlantic; the ocean floor is dominated by the Mid-Atlantic Ridge, a rugged north-south centerline for the entire Atlantic basin

Elevation extremes:

lowest point: Milwaukee Deep in the Puerto Rico Trench -8,605 m

highest point: sea level 0 m

Natural resources:

oil and gas fields, fish, marine mammals (seals and whales), sand and gravel aggregates, placer deposits, polymetallic nodules, precious stones

Natural hazards:

icebergs common in Davis Strait, Denmark Strait, and the northwestern Atlantic Ocean from February to August and have been spotted as far south as Bermuda and the Madeira Islands; ships subject to superstructure icing in extreme northern Atlantic from October to May; persistent fog can be a maritime hazard from May to September; hurricanes (May to December)

Environment - current issues:

endangered marine species include the manatee, seals, sea lions, turtles, and whales; drift net fishing is hastening the decline of fish stocks and contributing to international disputes; municipal sludge pollution off eastern US, southern Brazil, and eastern Argentina; oil pollution in Caribbean Sea, Gulf of Mexico, Lake Maracaibo, Mediterranean Sea, and North Sea; industrial waste and municipal sewage pollution in Baltic Sea, North Sea, and Mediterranean Sea

Geography - note:

major chokepoints include the Dardanelles, Strait of Gibraltar, access to the Panama and Suez Canals; strategic straits include the Strait of Dover, Straits of Florida, Mona Passage, The Sound (Oresund), and Windward Passage; the Equator divides the Atlantic Ocean into the North Atlantic Ocean and South Atlantic Ocean

Economy ::

Economy - overview:

The Atlantic Ocean provides some of the world's most heavily trafficked sea routes, between and within the Eastern and Western Hemispheres. Other economic activity includes the exploitation of

natural resources, e.g., fishing, dredging of aragonite sands (The Bahamas), and production of crude oil and natural gas (Caribbean Sea, Gulf of Mexico, and North Sea).

Transportation ::

Ports and terminals:

Alexandria (Egypt), Algiers (Algeria), Antwerp (Belgium), Barcelona (Spain), Buenos Aires (Argentina), Casablanca (Morocco), Colon (Panama), Copenhagen (Denmark), Dakar (Senegal), Gdansk (Poland), Hamburg (Germany), Helsinki (Finland), Las Palmas (Canary Islands, Spain), Le Havre (France), Lisbon (Portugal), London (UK), Marseille (France), Montevideo (Uruguay), Montreal (Canada), Naples (Italy), New Orleans (US), New York (US), Oran (Algeria), Oslo (Norway), Peiraiefs or Piraeus (Greece), Rio de Janeiro (Brazil), Rotterdam (Netherlands), Saint Petersburg (Russia), Stockholm (Sweden)

Transportation - note:

Kiel Canal and Saint Lawrence Seaway are two important waterways; significant domestic commercial and recreational use of Intracoastal Waterway on central and south Atlantic seaboard and Gulf of Mexico coast of US; the International Maritime Bureau reports the territorial waters of littoral states and offshore Atlantic waters as high risk for piracy and armed robbery against ships, particularly in the Gulf of Guinea off West Africa, the east coast of Brazil, and the Caribbean Sea; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crews have been robbed and stores or cargoes stolen

Australia

Introduction ::

Background:

Aboriginal settlers arrived on the continent from Southeast Asia about 40,000 years before the first Europeans began exploration in the 17th century. No formal territorial claims were made until 1770, when Capt. James COOK took possession in the name of Great Britain. Six colonies were created in the late 18th and 19th centuries; they federated and became the Commonwealth of Australia in 1901. The new country took advantage of its natural resources to rapidly develop

agricultural and manufacturing industries and to make a major contribution to the British effort in World Wars I and II. In recent decades, Australia has transformed itself into an internationally competitive, advanced market economy. It boasted one of the OECD's fastest growing economies during the 1990s, a performance due in large part to economic reforms adopted in the 1980s. Long-term concerns include climate-change issues such as the depletion of the ozone layer and more frequent droughts, and management and conservation of coastal areas, especially the Great Barrier Reef.

note: adopted 1984; although originally written in the late 19th century, the anthem did not become official until 1984; as a Commonwealth country, in addition to the national anthem, "God Save the Queen" serves as the royal anthem (see United Kingdom)

Economy ::

Economy - overview:

Australia's abundant and diverse natural resources attract high levels of foreign investment and include extensive reserves of coal, iron ore, copper, gold, natural gas, uranium, and renewable energy sources. A series of major investments, such as the US\$40 billion Gorgon Liquid Natural Gas project, will significantly expand the resources sector. Australia also has a large services sector and is a significant exporter of natural resources, energy, and food. Key tenets of Australia's trade policy include support for open trade and the successful culmination of the Doha Round of multilateral trade negotiations, particularly for agriculture and services. The Australian economy grew for 17 consecutive years before the global financial crisis. Subsequently, the Rudd government introduced a fiscal stimulus package worth over US \$50 billion to offset the effect of the slowing world economy, while the Reserve Bank of Australia cut interest rates to historic lows. These policies - and continued demand for commodities, especially from China - helped the Australian economy rebound after just one quarter of negative growth. The economy grew by 1.2% during 2009 - the best performance in the OECD. Unemployment, originally expected to reach 8-10%, peaked at 5.7% in late 2009 and fell to 5.1% in 2010. As a result of an improved economy, the budget deficit is expected to peak below 4.2% of GDP and the government could return to budget surpluses as early as 2015. Australia was one of the first advanced economies to raise interest rates, with seven rate hikes between October 2009 and November 2010. The GILLARD government is focused on raising Australia's economic productivity to ensure the sustainability of growth, and continues to manage the symbiotic, but sometimes tense, economic relationship with China. Australia is

engaged in the Trans-Pacific Partnership talks and ongoing free trade agreement negotiations with China, Japan, and Korea.

Transnational Issues ::

Disputes - international:

In 2007 Australia and Timor-Leste signed a 50-year development zone and revenue sharing agreement in lieu of a maritime boundary; dispute with Timor-Leste hampers creation of a revised maritime boundary with Indonesia in the Timor Sea; regional states continue to express concern over Australia's 2004 declaration of a 1,000-nautical mile-wide maritime identification zone; Australia asserts land and maritime claims to Antarctica; in 2004 Australia submitted its claims to Commission on the Limits of the Continental Shelf (CLCS) to extend its continental margins covering over 3.37 million square kilometers, expanding its seabed roughly 30 percent more than its claimed exclusive economic zone; since 2003, Australia has led the Regional Assistance Mission to the Solomon Islands (RAMSI) to maintain civil and political order and reinforce regional security

Illicit drugs:

Tasmania is one of the world's major suppliers of licit opiate products; government maintains strict controls over areas of opium poppy cultivation and output of poppy straw concentrate; major consumer of cocaine and amphetamines

Introduction ::

Background:

Once the center of power for the large Austro-Hungarian Empire, Austria was reduced to a small republic after its defeat in World War I. Following annexation by Nazi Germany in 1938 and subsequent occupation by the victorious Allies in 1945, Austria's status remained unclear for a decade. A State Treaty signed in 1955 ended the occupation, recognized Austria's independence, and forbade unification with Germany. A constitutional law that same year

declared the country's "perpetual neutrality" as a condition for Soviet military withdrawal. The Soviet Union's collapse in 1991 and Austria's entry into the European Union in 1995 have altered the meaning of this neutrality. A prosperous, democratic country, Austria entered the EU Economic and Monetary Union in 1999.

Flag description:

three equal horizontal bands of red (top), white, and red; the flag design is certainly one of the oldest - if not the oldest - national banners in the world; according to tradition, in 1191, following a fierce battle in the Third Crusade, Duke Leopold V of Austria's white tunic became completely blood-spattered; upon removal of his wide belt or sash, a white band was revealed; the red-white-red color combination was subsequently adopted as his banner

National anthem:

name: "Bundeshymne" (Federal Hymn)

lyrics/music: Paula von PRERADOVIC/Wolfgang Amadeus MOZART or Johann HOLZER (disputed)

note: adopted 1947; the anthem is also known as "Land der Berge, Land am Strome" (Land of the Mountains, Land on the River); Austria adopted a new national anthem after World War II to replace the former imperial anthem composed by Franz Josef HAYDN, which had been appropriated by Germany in 1922 and was now associated with the Nazi regime

Economy ::

Economy - overview:

Austria, with its well-developed market economy and high standard of living, is closely tied to other EU economies, especially Germany's. Its economy features a large service sector, a sound industrial sector, and a small, but highly developed agricultural sector. Following several years of solid foreign demand for Austrian exports and record employment growth, the international financial crisis and global economic downturn in 2008 led to a recession that persisted until the third quarter of 2009. Austrian GDP contracted 3.8% in 2009 but saw positive growth of about 2% in 2010. Unemployment has not risen as steeply in Austria as elsewhere in Europe, partly because its government has subsidized reduced working hour schemes to allow companies to retain employees. Such stabilization measures, stimulus initiatives, and the government's income tax reforms pushed the budget deficit to 3.5% of GDP in 2009 and about 5% in 2010, from only about 1.3% in 2008. The international financial crisis caused difficulties for some of Austria's largest banks whose extensive operations in central, eastern, and southeastern Europe faced large losses. The government provided bank support - including in some instances, nationalization - to prevent insolvency and possible regional contagion. In the medium-term all large Austrian banks will need additional capital. Even after the global economic outlook improves, Austria will need to continue restructuring, emphasizing knowledge-based sectors of the economy, and encouraging greater labor flexibility and greater labor participation to offset growing unemployment and Austria's aging population and exceedingly low fertility rate.

Azerbaijan

Introduction ::

Background:

Azerbaijan - a nation with a majority-Turkic and majority-Muslim population - was briefly independent from 1918 to 1920; it regained its independence after the collapse of the Soviet Union in 1991. Despite a 1994 cease-fire, Azerbaijan has yet to resolve its conflict with Armenia over Nagorno-Karabakh, a primarily Armenian-populated region that Moscow recognized as part of Soviet Azerbaijan in the 1920s after Armenia and Azerbaijan disputed the status of the

territory. Armenia and Azerbaijan began fighting over the area in 1988; the struggle escalated after both countries attained independence from the Soviet Union in 1991. By May 1994, when a cease-fire took hold, ethnic Armenian forces held not only Nagorno-Karabakh but also seven surrounding provinces in the territory of Azerbaijan. Corruption in the country is ubiquitous, and the government, which eliminated presidential term limits in a 2009 referendum, has been accused of authoritarianism. Although the poverty rate has been reduced in recent years due to revenue from oil production, the promise of widespread wealth resulting from the continued development of Azerbaijan's energy sector remains largely unfulfilled.

Economy ::

Economy - overview:

Azerbaijan's high economic growth during 2006-08 was attributable to large and growing oil exports, but some non-export sectors also featured double-digit growth, spurred by growth in the construction, banking, and real estate sectors. In 2009, economic growth remained above 9% even as oil prices moderated and growth in the construction sector cooled. In 2010, economic growth slowed to approximately 3.7%, although the impact of the global financial crisis was less severe than in many other countries in the region. The current global economic slowdown presents some challenges for the Azerbaijani economy as oil prices remain below their mid-2008 highs, highlighting Azerbaijan's reliance on energy exports and lackluster attempts to diversify its economy. Azerbaijan's oil production increased dramatically in 1997, when Azerbaijan signed the first production-sharing arrangement (PSA) with the Azerbaijan International Operating Company. Oil exports through the Baku-Tbilisi-Ceyhan Pipeline remain the main economic driver while efforts to boost Azerbaijan's gas production are underway. However, Azerbaijan has made only limited progress on instituting market-based

economic reforms. Pervasive public and private sector corruption and structural economic inefficiencies remain a drag on long-term growth, particularly in non-energy sectors. Several other obstacles impede Azerbaijan's economic progress: the need for stepped up foreign investment in the non-energy sector and the continuing conflict with Armenia over the Nagorno-Karabakh region. Trade with Russia and the other former Soviet republics is declining in importance, while trade is building with Turkey and the nations of Europe. Long-term prospects will depend on world oil prices, the location of new oil and gas pipelines in the region, and Azerbaijan's ability to manage its energy wealth to promote sustainable growth in non-energy sectors of the economy and spur employment.

Transnational Issues ::

Disputes - international:

Armenia supports ethnic Armenian secessionists in Nagorno-Karabakh and since the early 1990s has militarily occupied 16% of Azerbaijan; over 800,000 mostly ethnic Azerbaijanis were driven from the occupied lands and Armenia; about 230,000 ethnic Armenians were driven from their homes in Azerbaijan into Armenia and Nagorno-Karabakh; Azerbaijan seeks transit route through Armenia to connect to Naxcivan exclave; Organization for Security and Cooperation in Europe (OSCE) continues to mediate dispute; Azerbaijan, Kazakhstan, and Russia have ratified Caspian seabed delimitation treaties based on equidistance, while Iran continues to insist on an even one-fifth

allocation and challenges Azerbaijan's hydrocarbon exploration in disputed waters; bilateral talks continue with Turkmenistan on dividing the seabed and contested oilfields in the middle of the Caspian; Azerbaijan and Georgia continue to discuss the alignment of their boundary at certain crossing areas

Refugees and internally displaced persons:

refugees (country of origin): 2,400 (Russia)

IDPs: 580,000-690,000 (conflict with Armenia over Nagorno-Karabakh) (2007)

Trafficking in persons:

current situation: Azerbaijan is primarily a source and transit country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; women and some children from Azerbaijan are trafficked to Turkey and the UAE for the purpose of sexual exploitation; men and boys are trafficked to Russia for the purpose of forced labor; Azerbaijan serves as a transit country for victims from Uzbekistan, Kyrgyzstan, Kazakhstan, and Moldova trafficked to Turkey and the UAE for sexual exploitation

tier rating: Tier 2 Watch List - Azerbaijan is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat trafficking in persons, particularly efforts to investigate, prosecute, and punish traffickers; to address complicity among law enforcement personnel; and to adequately identify and protect victims in Azerbaijan; the government has yet to develop a much-needed mechanism to identify potential trafficking victims and refer them to safety and care; poor treatment of trafficking victims in courtrooms continues to be a problem (2008)

Illicit drugs:

limited illicit cultivation of cannabis and opium poppy, mostly for CIS consumption; small government eradication program; transit point for Southwest Asian opiates bound for Russia and to a lesser extent the rest of Europe

Bahamas, The

(map)

Introduction ::

Background:

Lucayan Indians inhabited the islands when Christopher COLUMBUS first set foot in the New World on San Salvador in 1492. British settlement of the islands began in 1647; the islands became a colony in 1783. Since attaining independence from the UK in 1973, The Bahamas has prospered through tourism and international banking and investment management. Because of its geography, the country is a major transshipment point for illegal drugs, particularly shipments

to the US and Europe, and its territory is used for smuggling illegal migrants into the US.

Economy ::

Economy - overview:

The Bahamas is one of the wealthiest Caribbean countries with an economy heavily dependent on tourism and offshore banking. Tourism together with tourism-driven construction and manufacturing accounts for approximately 60% of GDP and directly or indirectly employs half of the archipelago's labor force. Prior to 2006, a steady growth in tourism receipts and a boom in construction of new hotels, resorts, and residences led to solid GDP growth but since then tourism receipts have begun to drop off. The global recession in 2009 took a

sizeable toll on the Bahamas, resulting in a contraction in GDP and a widening budget deficit. The decline continued in 2010 as tourism from the US and sector investment lagged. Financial services constitute the second-most important sector of the Bahamian economy and, when combined with business services, account for about 36% of GDP. However, the financial sector currently is smaller than it has been in the past because of the enactment of new and more strict financial regulations in 2000 that caused many international businesses to relocate elsewhere. Manufacturing and agriculture combined contribute approximately a tenth of GDP and show little growth, despite government incentives aimed at those sectors. Overall growth prospects in the short run rest heavily on the fortunes of the tourism sector.

Bahrain

(map)

Introduction ::

Background:

In 1783, the al-Khalifa family captured Bahrain from the Persians. In order to secure these holdings, it entered into a series of treaties with the UK during the 19th century that made Bahrain a British protectorate. The archipelago attained its independence in 1971. Bahrain's small size and central location among Persian Gulf countries require it to play a delicate balancing act in foreign affairs among its larger neighbors. Facing declining oil reserves, Bahrain has turned to

petroleum processing and refining and has transformed itself into an international banking center. King HAMAD bin Isa al-Khalifa, after coming to power in 1999, pushed economic and political reforms to improve relations with the Shia community. Shia political societies participated in 2010 parliamentary and municipal elections. Al Wifaq, the largest Shia political society, won the largest number of seats in the elected chamber of the legislature. However, Shia discontent has resurfaced in recent years with street demonstrations and occasional low-level violence.

note: adopted 1971; although Mohamed Sudqi AYYASH wrote the original lyrics, they were changed in 2002 following the transformation of Bahrain from an emirate to a kingdom

Economy ::

Economy - overview:

Bahrain is one of the most diversified economies in the Persian Gulf. Highly developed communication and transport facilities make Bahrain home to numerous multinational firms with business in the Gulf. As part of its diversification plans, Bahrain implemented a Free Trade Agreement (FTA) with the US in August 2006, the first FTA between the US and a Gulf state. Bahrain's economy, however, continues to depend heavily on oil. Petroleum production and refining account for more than 60% of Bahrain's export receipts, 70% of government revenues, and 11% of GDP (exclusive of allied industries). Other major economic activities are production of aluminum - Bahrain's second biggest export after oil - finance, and construction. Bahrain competes with Malaysia as a worldwide center for Islamic banking and continues to seek new natural gas supplies as feedstock to support its expanding petrochemical and aluminum industries. Unemployment, especially among the young, is a long-term economic problem Bahrain struggles to address. In 2009, to help lower unemployment among Bahraini nationals, Bahrain reduced sponsorship for expatriate workers, increasing the costs of employing foreign labor. The global financial crisis caused funding for many non-oil projects to dry up and resulted in slower economic growth for Bahrain. Other challenges facing Bahrain include the slow growth of government debt as a result of a large subsidy program, the financing of large government projects, and debt restructuring, such as the bailout of state-owned Gulf Air.

Introduction ::

Europeans began to set up trading posts in the area of Bangladesh in the 16th century; eventually the British came to dominate the region and it became part of British India. In 1947, West Pakistan and East Bengal (both primarily Muslim) separated from India (largely Hindu) and jointly became the new country of Pakistan. East Bengal became East Pakistan in 1955, but the awkward arrangement of a two-part country with its territorial units separated by 1,600 km left the

Bengalis marginalized and dissatisfied. East Pakistan seceded from its union with West Pakistan in 1971 and was renamed Bangladesh. A military-backed, emergency caretaker regime suspended parliamentary elections planned for January 2007 in an effort to reform the political system and root out corruption. In contrast to the strikes and violent street rallies that had marked Bangladeshi politics in previous years, the parliamentary elections finally held in late December 2008 were mostly peaceful and Sheikh HASINA Wajed was elected prime minister. About a third of this extremely poor country floods annually during the monsoon rainy season, hampering economic development.

Economy ::

Economy - overview:

The economy has grown 5-6% per year since 1996 despite political instability, poor infrastructure, corruption, insufficient power supplies, and slow implementation of economic reforms. Bangladesh remains a poor, overpopulated, and inefficiently-governed nation. Although more than half of GDP is generated through the service sector, 45% of Bangladeshis are employed in the agriculture sector, with rice as the single-most-important product. Bangladesh's growth was resilient during the 2008-09 global financial crisis and recession. Garment exports, totaling \$12.3 billion in FY09 and remittances from overseas Bangladeshis totaling \$9.7 billion in FY09 accounted for almost 25% of GDP.

Transnational Issues ::

Disputes - international:

discussions with India remain stalled to delimit a small section of river boundary, exchange territory for 51 small Bangladeshi exclaves in India and 111 small Indian exclaves in Bangladesh, allocate divided villages, and stop illegal cross-border trade, migration, violence, and transit of terrorists through the porous border; Bangladesh protests India's fencing and walling off high-traffic sections of the porous boundary; a joint Bangladesh-India boundary commission resurveyed and reconstructed 92 missing pillars in 2007; after 21 years, Bangladesh in January 2008 resumed talks with Burma on delimiting a maritime boundary

Refugees and internally displaced persons:

refugees (country of origin): 26,268 (Burma)

IDPs: 65,000 (land conflicts, religious persecution) (2007)

Trafficking in persons:

current situation: Bangladesh is a source and transit country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; a significant share of Bangladesh's trafficking victims are men recruited for work overseas with fraudulent employment offers who are subsequently exploited under conditions of forced labor or debt bondage; children are trafficked within Bangladesh for commercial sexual exploitation, bonded labor, and forced labor; women and children from Bangladesh are also trafficked to India and Pakistan for sexual exploitation

tier rating: Bangladesh is placed on Tier 2 Watch List because it does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so, including some progress in addressing sex trafficking; the government did not demonstrate sufficient progress in criminally prosecuting and convicting labor trafficking offenders, particularly those responsible for the recruitment of Bangladeshi workers for the purpose of labor trafficking (2009)

Illicit drugs:

Introduction ::

Background:

The island was uninhabited when first settled by the British in 1627. Slaves worked the sugar plantations established on the island until 1834 when slavery was abolished. The economy remained heavily dependent on sugar, rum, and molasses production through most of the 20th century. The gradual introduction of social and political reforms in the 1940s and 1950s led to complete independence from the UK in 1966. In the 1990s, tourism and manufacturing surpassed

the sugar industry in economic importance.

Economy ::

Economy - overview:

Historically, the Barbadian economy was dependent on sugarcane cultivation and related activities. However, in recent years the economy has diversified into light industry and tourism with about three-quarters of GDP and 80% of exports being attributed to services.

Growth has rebounded since 2003, bolstered by increases in construction projects and tourism revenues, reflecting its success in the higher-end segment, but the sector faced declining revenues in 2009 with the global economic downturn. The country enjoys one of the highest per capita incomes in the region. Offshore finance and information services are important foreign exchange earners and thrive from having the same time zone as eastern US financial centers and a relatively highly educated workforce. The government continues its efforts to reduce unemployment, to encourage direct foreign investment, and to privatize remaining state-owned enterprises. The public debt-to-GDP ratio rose to over 100% in 2009, largely because a sharp slowdown in tourism and financial services led to a wide budget deficit.

Introduction ::

Background:

After seven decades as a constituent republic of the USSR, Belarus attained its independence in 1991. It has retained closer political and economic ties to Russia than any of the other former Soviet republics. Belarus and Russia signed a treaty on a two-state union on 8 December 1999 envisioning greater political and economic integration. Although Belarus agreed to a framework to carry out the accord, serious implementation has yet to take place. Since his

election in July 1994 as the country's first president, Aleksandr LUKASHENKO has steadily consolidated his power through authoritarian means. Government restrictions on freedom of speech and the press, peaceful assembly, and religion remain in place.

Economy ::

Economy - overview:

Belarus has seen limited structural reform since 1995, when President LUKASHENKO launched the country on the path of "market socialism." In keeping with this policy, LUKASHENKO reimposed administrative controls over prices and currency exchange rates and expanded the state's right to intervene in the management of private enterprises. Since 2005, the government has re-nationalized a number of private companies. In addition, businesses have been subjected to pressure by central and local governments, including arbitrary changes in regulations, numerous rigorous inspections, retroactive application of new business regulations, and arrests of "disruptive" businessmen and factory owners. Continued state control over economic operations hampers market entry for businesses, both domestic and foreign. Government statistics indicate GDP growth was strong, surpassing 10% in 2008, despite the roadblocks of a tough, centrally directed economy with a high rate of inflation and a low rate of unemployment. However, the global crisis pushed the country into recession in 2009, and GDP grew only 0.2% for the year. Slumping foreign demand hit the industrial sector hard. Minsk has depended on a standby-agreement with the IMF to assist with balance of payments shortfalls. In line with IMF conditions, in 2009, Belarus devalued the ruble more than 40% and tightened some fiscal and monetary policies. On 1 January 2010, Russia, Kazakhstan and Belarus launched a customs union, with unified trade regulations and customs codes still under negotiation. In late January, Russia and Belarus amended their 2007 oil supply agreement. The new terms raised prices for above quota purchases, increasing Belarus' current account deficit. GDP grew 4.8% in 2010, in part, on the strength of renewed export growth. In December 2010, Belarus, Russia and Kazakhstan signed an agreement

to form a Common Economic Space and Russia removed all Belarusian oil duties.

Transnational Issues ::

Disputes - international:

Boundary demarcated with Latvia and Lithuania in 2006; 1997 boundary delimitation treaty with Ukraine remains unratified over unresolved financial claims, preventing demarcation and diminishing border security

Illicit drugs:

limited cultivation of opium poppy and cannabis, mostly for the domestic market; transshipment point for illicit drugs to and via Russia, and to the Baltics and Western Europe; a small and lightly regulated financial center; anti-money-laundering legislation does not meet international standards and was weakened further when know-your-customer requirements were curtailed in 2008; few investigations or prosecutions of money-laundering activities (2008)

Background:

Belgium became independent from the Netherlands in 1830; it was occupied by Germany during World Wars I and II. The country prospered in the past half century as a modern, technologically advanced European state and member of NATO and the EU. Tensions between the Dutch-speaking Flemings of the north and the French-speaking Walloons of the south have led in recent years to constitutional amendments granting these regions formal recognition

and autonomy.

Economy ::

Economy - overview:

This modern, private-enterprise economy has capitalized on its central geographic location, highly developed transport network, and diversified industrial and commercial base. Industry is concentrated mainly in the populous Flemish area in the north. With few natural resources, Belgium imports substantial quantities of raw materials and exports a large volume of manufactures, making its economy vulnerable to volatility in world markets. Roughly three-quarters of Belgium's trade is with other EU countries. In 2009 Belgian GDP contracted by 2.7%, the unemployment rate rose slightly, and the budget deficit worsened because of large-scale bail-outs in the financial sector. Belgium's budget deficit widened to 4.8% of GDP in 2010, while public debt was just over 100% of GDP. Belgian banks have been severely affected by the international financial crisis with three major banks receiving capital injections from the government. An ageing population and rising social expenditures are also increasing pressure on public finances, making it likely the government will need to implement unpopular austerity measures to assuage investor concerns about Belgium's ability to restore fiscal balance.

Introduction ::

Background:

Belize was the site of several Mayan city states until their decline at the end of the first millennium A.D. The British and Spanish disputed the region in the 17th and 18th centuries; it formally became the colony of British Honduras in 1854. Territorial disputes between the UK and Guatemala delayed the independence of Belize until 1981. Guatemala refused to recognize the new nation until 1992 and the two countries are involved in an ongoing border dispute. Guatemala and

Belize plan to hold a simultaneous referendum to determine if this dispute will go before the International Court of Justice at The Hague, though they have not yet set a date. Tourism has become the mainstay of the economy. Current concerns include the country's heavy foreign debt burden, high unemployment, growing involvement in the South American drug trade, high crime rates, and increasing incidences of HIV/AIDS.

Flag description:

blue with a narrow red stripe along the top and the bottom edges; centered is a large white disk bearing the coat of arms; the coat of arms features a shield flanked by two workers in front of a mahogany tree with the related motto SUB UMBRA FLOREO (I Flourish in the Shade) on a scroll at the bottom, all encircled by a green garland of 50 mahogany leaves; the colors are those of the two main political parties: blue for the PUP and red for the UDP; various elements of the coat of arms - the figures, the tools, the mahogany tree, and the garland of leaves - recall the logging industry that led to British settlement of Belize

note: Belize's flag is the only national flag that depicts human beings; two British overseas territories, Montserrat and the British Virgin Islands, also depict humans

National anthem:

name: "Land of the Free"

lyrics/music: Samuel Alfred HAYNES/Selwyn Walford YOUNG

note: adopted 1981; as a Commonwealth country, in addition to the national anthem, "God Save the Queen" serves as the royal anthem (see United Kingdom)

Economy ::

Economy - overview:

In this small, essentially private-enterprise economy, tourism is the number one foreign exchange earner followed by exports of marine products, citrus, cane sugar, bananas, and garments. The government's expansionary monetary and fiscal policies, initiated in September 1998, led to sturdy GDP growth averaging nearly 4% in 1999-2007, though growth slipped to 3.8% in 2008, 0% in 2009, and 1.5% in 2010 as a result of the global slowdown, natural disasters, and the drop in the price of oil. Oil discoveries in 2006 bolstered economic growth. Exploration efforts continue and production increased a small amount in 2009. Major concerns continue to be the sizable trade

deficit and heavy foreign debt burden. In February 2007, the government restructured nearly all of its public external commercial debt, which helped reduce interest payments and relieved some of the country's liquidity concerns. A key objective remains the reduction of poverty and inequality with the help of international donors.

Transnational Issues ::

Disputes - international:

OAS-initiated Agreement on the Framework for Negotiations and Confidence Building Measures saw cooperation in repatriation of Guatemalan squatters and other areas, but Guatemalan land and maritime claims in Belize and the Caribbean Sea remain unresolved; the Line of Adjacency created under the 2002 Differendum serves in lieu of the contiguous international boundary to control squatting in the sparsely inhabited rain forests of Belize's border region; Honduras claims Belizean-administered Sapodilla Cays in its constitution but agreed to a joint ecological park under the Differendum

Trafficking in persons:

current situation: Belize is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; the most common form of trafficking in Belize is the internal sex trafficking of minors; some Central American men, women, and children, particularly from Guatemala, Honduras, and El Salvador, migrate voluntarily to Belize in search of work but are subsequently subjected to conditions of forced labor or forced prostitution

tier rating: Belize is placed on Tier 2 Watch List because it does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; despite efforts to raise public awareness of human trafficking and provide protection services for trafficking victims, the government did not show evidence of progress in convicting and sentencing trafficking offenders last year (2009)

Illicit drugs:

transshipment point for cocaine; small-scale illicit producer of cannabis, primarily for local consumption; offshore sector money-laundering activity related to narcotics trafficking and other crimes

Introduction ::

Background:

Present day Benin was the site of Dahomey, a prominent West African kingdom that rose in the 15th century. The territory became a French Colony in 1872 and achieved independence on 1 August 1960, as the Republic of Benin. A succession of military governments ended in 1972 with the rise to power of Mathieu KEREKOU and the establishment of a government based on Marxist-Leninist principles. A move to representative government began in 1989. Two years later, free elections ushered in former Prime Minister Nicephore SOGLO as president, marking the first successful transfer of power in Africa from a dictatorship to a democracy. KEREKOU was returned to power by elections held in 1996 and 2001, though some irregularities were alleged. KEREKOU stepped down at the end of his second term in 2006 and was succeeded by Thomas YAYI Boni, a political outsider and independent. YAYI has begun a high profile fight against corruption and has strongly promoted accelerating Benin's economic growth.

Economy ::

Economy - overview:

The economy of Benin remains underdeveloped and dependent on subsistence agriculture, cotton production, and regional trade. Growth in real output had averaged about 4% before the global recession, but fell to 2.5% in 2009 and 3% in 2010. Inflation has subsided over the past several years. In order to raise growth, Benin plans to attract more foreign investment, place more emphasis on tourism, facilitate the development of new food processing systems and agricultural products, and encourage new information and communication

technology. Specific projects to improve the business climate by reforms to the land tenure system, the commercial justice system, and the financial sector were included in Benin's \$307 million Millennium Challenge Account grant signed in February 2006. The 2001 privatization policy continues in telecommunications, water, electricity, and agriculture. As result of these reforms, Benin has become the most competitive country in the West African Economic and Monetary Union, according to the World Economic Forum. The Paris Club and bilateral creditors have eased the external debt situation, with Benin benefiting from a G-8 debt reduction announced in July 2005, while pressing for more rapid structural reforms. An insufficient electrical supply continues to adversely affect Benin's economic growth though the government recently has taken steps to increase domestic power production.

Introduction ::

Background:

Bermuda was first settled in 1609 by shipwrecked English colonists headed for Virginia. Tourism to the island to escape North American winters first developed in Victorian times. Tourism continues to be important to the island's economy, although international business has overtaken it in recent years. Bermuda has developed into a highly successful offshore financial center. Although a referendum on independence from the UK was soundly defeated in 1995, the present

government has reopened debate on the issue.

Economy ::

Economy - overview:

Bermuda enjoys the third highest per capita income in the world, more than 50% higher than that of the US; the average cost of a house by the mid-2000s exceeded \$1,000,000. Its economy is primarily based on providing financial services for international business and luxury facilities for tourists. A number of reinsurance companies relocated to the island following the 11 September 2001 attacks and again after Hurricane Katrina in August 2005 contributing to the expansion of an already robust international business sector. Bermuda's tourism industry - which derives over 80% of its visitors from the US - continues to struggle but remains the island's number two industry. Most capital equipment and food must be imported. Bermuda's industrial sector is largely focused on construction and agriculture is limited, with only 20% of the land being arable.

Introduction ::

Background:

In 1865, Britain and Bhutan signed the Treaty of Sinchulu, under which Bhutan would receive an annual subsidy in exchange for ceding some border land to British India. Under British influence, a monarchy was set up in 1907; three years later, a treaty was signed whereby the British agreed not to interfere in Bhutanese internal affairs and Bhutan allowed Britain to direct its foreign affairs. This role was assumed by independent India after 1947. Two years later, a formal Indo-

Bhutanese accord returned the areas of Bhutan annexed by the British, formalized the annual subsidies the country received, and defined India's responsibilities in defense and foreign relations. A refugee issue of over 100,000 Bhutanese in Nepal remains unresolved; 90% of the refugees are housed in seven United Nations Office of the High Commissioner for Refugees (UNHCR) camps. In March 2005, King Jigme Singye WANGCHUCK unveiled the government's draft constitution - which would introduce major democratic reforms - and pledged to hold a national referendum for its approval. In December 2006, the King abdicated the throne to his son, Jigme Khesar Namgyel WANGCHUCK, in order to give him experience as head of state before the democratic transition. In early 2007, India and Bhutan renegotiated their treaty to allow Bhutan greater autonomy in conducting its foreign policy, although Thimphu continues to coordinate policy decisions in this area with New Delhi. In July 2007, seven ministers of Bhutan's ten-member cabinet resigned to join the political process, and the cabinet acted as a caretaker regime until democratic elections for seats to the country's first parliament were completed in March 2008. The king ratified the country's first constitution in July 2008.

Economy ::

Economy - overview:

The economy, one of the world's smallest and least developed, is based on agriculture and forestry, which provide the main livelihood for more than 60% of the population. Agriculture consists largely of subsistence farming and animal husbandry. Rugged mountains dominate the terrain and make the building of roads and other infrastructure difficult and expensive. The economy is closely aligned with India's through strong trade and monetary links and dependence on India's financial assistance. The industrial sector is technologically backward, with most production of the cottage industry type. Most development projects, such as road construction, rely on Indian migrant labor. Model education, social, and environment programs are underway with support from multilateral development organizations.

Each economic program takes into account the government's desire to protect the country's environment and cultural traditions. For example, the government, in its cautious expansion of the tourist sector, encourages visits by upscale, environmentally conscientious tourists. Complicated controls and uncertain policies in areas such as industrial licensing, trade, labor, and finance continue to hamper foreign investment. Hydropower exports to India have boosted Bhutan's overall growth. New hydropower projects will be the driving force behind Bhutan's ability to create employment and sustain growth in the coming years.

Bolivia

Introduction ::

Background:

Bolivia, named after independence fighter Simon BOLIVAR, broke away from Spanish rule in 1825; much of its subsequent history has consisted of a series of nearly 200 coups and counter coups. Democratic civilian rule was established in 1982, but leaders have faced difficult problems of deep-seated poverty, social unrest, and illegal drug production. In December 2005, Bolivians elected Movement Toward Socialism leader Evo MORALES president - by the

widest margin of any leader since the restoration of civilian rule in 1982 - after he ran on a promise to change the country's traditional political class and empower the nation's poor, indigenous majority. However, since taking office, his controversial strategies have exacerbated racial and economic tensions between the Amerindian populations of the Andean west and the non-indigenous communities of the eastern lowlands. In December 2009, President MORALES easily won reelection, and his party took control of the legislative branch of the government, which will allow him to continue his process of change.

Economy ::

Economy - overview:

Bolivia is one of the poorest and least developed countries in Latin America. Following a disastrous economic crisis during the early 1980s, reforms spurred private investment, stimulated economic growth, and cut poverty rates in the 1990s. The period 2003-05 was characterized by political instability, racial tensions, and violent protests against plans - subsequently abandoned - to export Bolivia's newly discovered natural gas reserves to large northern hemisphere markets. In 2005, the government passed a controversial hydrocarbons law that imposed significantly higher royalties and required foreign firms then operating under risk-sharing contracts to surrender all production to the state energy company in exchange for a predetermined service fee. After higher prices for mining and hydrocarbons exports produced a fiscal surplus in 2008, the global recession in 2009 slowed growth. A decline in commodity prices that began in late 2008, a lack of foreign investment in the mining and hydrocarbon sectors, a poor infrastructure, and the suspension of trade benefits with the United States will pose challenges for the Bolivian economy.

Transnational Issues ::

Disputes - international:

Chile and Peru rebuff Bolivia's reactivated claim to restore the Atacama corridor, ceded to Chile in 1884, but Chile offers instead unrestricted but not sovereign maritime access through Chile for Bolivian natural gas and other commodities; an accord placed the long-disputed Isla Suarez/Ilha de Guajara-Mirim, a fluvial island on the Rio Mamore, under Bolivian administration in 1958, but sovereignty remains in dispute

Illicit drugs:

world's third-largest cultivator of coca (after Colombia and Peru) with an estimated 29,500 hectares under cultivation in 2007, increased slightly when compared to 2006; third largest producer of cocaine, estimated at 120 metric tons potential pure cocaine in 2007; transit country for Peruvian and Colombian cocaine destined for Brazil, Argentina, Chile, Paraguay, and Europe; cultivation generally

increasing since 2000, despite eradication and alternative crop programs; weak border controls; some money-laundering activity related to narcotics trade; major cocaine consumption

Bosnia and Herzegovina

Introduction ::

Background:

Bosnia and Herzegovina's declaration of sovereignty in October 1991 was followed by a declaration of independence from the former Yugoslavia on 3 March 1992 after a referendum boycotted by ethnic Serbs. The Bosnian Serbs - supported by neighboring Serbia and Montenegro - responded with armed resistance aimed at partitioning the republic along ethnic lines and joining Serb-held areas to form a "Greater Serbia." In March 1994, Bosniaks and Croats reduced the

number of warring factions from three to two by signing an agreement creating a joint Bosniak/Croat Federation of Bosnia and Herzegovina. On 21 November 1995, in Dayton, Ohio, the warring parties initialed a peace agreement that brought to a halt three years of interethnic civil strife (the final agreement was signed in Paris on 14 December 1995). The Dayton Peace Accords retained Bosnia and Herzegovina's international boundaries and created a multi-ethnic and democratic government charged with conducting foreign, diplomatic, and fiscal policy. Also recognized was a second tier of government composed of two entities roughly equal in size: the Bosniak/Croat Federation of Bosnia and Herzegovina and the Bosnian Serb-led Republika Srpska (RS). The Federation and RS governments were charged with overseeing most government functions. The Dayton Accords also established the Office of the High Representative (OHR) to oversee the implementation of the civilian aspects of the agreement. The Peace Implementation Council (PIC) at its conference in Bonn in 1997 also gave the High Representative the authority to impose legislation and remove officials, the so-called "Bonn Powers." In 1995-96, a NATO-led international peacekeeping force (IFOR) of 60,000 troops served in Bosnia to implement and monitor the military aspects of the agreement. IFOR was succeeded by a smaller, NATO-led Stabilization Force (SFOR) whose mission was to deter renewed hostilities. European Union peacekeeping troops (EUFOR) replaced SFOR in December 2004; their mission is to maintain peace and stability throughout the country. EUFOR's mission changed from peacekeeping to civil policing in October 2007, with its presence reduced from nearly 7,000 to less than 2,500 troops. Troop strength at the end of 2009 stood at roughly 2,000. In January 2010, Bosnia and Herzegovina assumed a nonpermanent seat on the UN Security Council for the 2010-11 term.

Economy ::

Economy - overview:

The interethnic warfare in Bosnia and Herzegovina caused production to plummet by 80% from 1992 to 1995 and unemployment to soar. With an uneasy peace in place, output recovered in 1996-99 at high percentage rates from a low base; but output growth slowed in 2000-02. Part of the lag in output was made up in 2003-08 when GDP growth exceeded 5% per year. However, the country experienced negative GDP growth of almost 3% in 2009 due in large part to a reduction in exports caused by the global economic crisis. One of Bosnia's main economic challenges in 2010 has been to reduce spending on public sector wages and social benefits to meet the IMF's criteria for obtaining funding for budget shortfalls. Banking reform accelerated in 2001 as all the Communist-era payments bureaus were shut down; foreign banks, primarily from Austria and Italy, now

control most of the banking sector. The konvertibilna marka (convertible mark or BAM)- the national currency introduced in 1998 - is pegged to the euro, and confidence in the currency and the banking sector has increased. Bosnia's private sector is growing and foreign investment is slowly increasing, but government spending, at roughly 50% of GDP, remains high because of redundant government offices at the state, entity and municipal level. Privatization of state enterprises, however, has been slow, particularly in the Federation where political division between ethnically-based political parties makes agreement on economic policy more difficult. A sizeable current account deficit and high unemployment rate remain the two most serious macroeconomic problems. Successful implementation of a value-added tax in 2006 provided a predictable source of revenue for the government and helped rein in gray market activity. National-level statistics have also improved over time but a large share of economic activity remains unofficial and unrecorded. Bosnia and Herzegovina became a full member of the Central European Free Trade Agreement in September 2007.

Botswana

Introduction ::

Background:

Formerly the British protectorate of Bechuanaland, Botswana adopted its new name upon independence in 1966. Four decades of uninterrupted civilian leadership, progressive social policies, and significant capital investment have created one of the most dynamic economies in Africa. Mineral extraction, principally diamond mining, dominates economic activity, though tourism is a growing sector due to the country's conservation practices and extensive nature preserves.

Botswana has one of the world's highest known rates of HIV/AIDS infection, but also one of Africa's most progressive and comprehensive programs for dealing with the disease.

Economy ::

Economy - overview:

Botswana has maintained one of the world's highest economic growth rates since independence in 1966, though growth fell below 5% in 2007-08, and turned sharply negative in 2009, with industry falling nearly 30%. Through fiscal discipline and sound management, Botswana transformed itself from one of the poorest countries in the world to a middle-income country with a per capita GDP of \$13,100 in 2010. Two major investment services rank Botswana as the best credit risk in Africa. Diamond mining has fueled much of the expansion and currently accounts for more than one-third of GDP, 70-80% of export earnings, and about half of the government's revenues. Botswana's heavy reliance on a single luxury export was a critical factor in the sharp economic contraction of 2009. Tourism, financial services, subsistence farming, and cattle raising are other key sectors. Although unemployment was 7.5% in 2007 according to official reports, unofficial estimates place it closer to 40%. The prevalence of HIV/AIDS is second highest in the world and threatens Botswana's impressive economic gains. An expected leveling off in diamond mining production within the next two decades overshadows long-term prospects.

Introduction ::

Background:

This uninhabited volcanic island is almost entirely covered by glaciers and is difficult to approach. It was discovered in 1739 by a French naval officer after whom the island was named. No claim was made until 1825, when the British flag was raised. In 1928, the UK waived its claim in favor of Norway, which had occupied the island the previous year. In 1971, Norway designated Bouvet Island and the adjacent territorial waters a nature reserve. Since 1977, it has run an

automated meteorological station on the island.

Brazil

Introduction ::

Background:

Following more than three centuries under Portuguese rule, Brazil gained its independence in 1822, maintaining a monarchical system of government until the abolition of slavery in 1888 and the subsequent proclamation of a republic by the military in 1889. Brazilian coffee exporters politically dominated the country until populist leader Getulio VARGAS rose to power in 1930. By far the largest and most populous country in South America, Brazil underwent more than half

a century of populist and military government until 1985, when the military regime peacefully ceded power to civilian rulers. Brazil continues to pursue industrial and agricultural growth and development of its interior. Exploiting vast natural resources and a large labor pool, it is today South America's leading economic power and a regional leader, one of the first in the area to begin an economic recovery. Highly unequal income distribution and crime remain pressing problems. In January 2010, Brazil assumed a nonpermanent seat on the UN Security Council for the 2010-11 term.

lyrics/music: Joaquim Osorio Duque ESTRADA/Francisco Manoel DA SILVA

note: music adopted 1890, lyrics adopted 1922; the anthem's music,

composed in 1822, was used unofficially for many years before it was adopted

Economy ::

Economy - overview:

Characterized by large and well-developed agricultural, mining, manufacturing, and service sectors, Brazil's economy outweighs that of all other South American countries, and Brazil is expanding its presence in world markets. Since 2003, Brazil has steadily improved its macroeconomic stability, building up foreign reserves, and reducing its debt profile by shifting its debt burden toward real denominated and domestically held instruments. In 2008, Brazil became a net external creditor and two ratings agencies awarded investment grade status to its debt. After record growth in 2007 and 2008, the onset of the global financial crisis hit Brazil in September 2008. Brazil experienced two quarters of recession, as global demand for Brazil's commodity-based exports dwindled and external credit dried up. However, Brazil was one of the first emerging markets to begin a recovery. Consumer and investor confidence revived and GDP growth returned to positive in 2010, boosted by an export recovery. Brazil's strong growth and high interest rates make it an attractive destination for foreign investors. Large capital inflows over the past year have contributed to the rapid appreciation of its currency and led the government to raise taxes on some foreign investments. President Dilma ROUSSEFF has pledged to retain the previous administration's commitment to inflation targeting by the Central Bank, a floating exchange rate, and fiscal restraint.

Transnational Issues ::

Disputes - international:

unruly region at convergence of Argentina-Brazil-Paraguay borders is locus of money laundering, smuggling, arms and illegal narcotics

trafficking, and fundraising for extremist organizations; two uncontested boundary disputes with Uruguay over Isla Brasilera at the tripoint with Argentina at the confluence of the Quarai/Cuareim and Uruguay rivers, and in the 235 square kilometer Invernada River region over which tributary represents the legitimate source of the Quarai/Cuareim River; the Itaipu Dam reservoir covers over a once contested section of Brazil-Paraguay boundary west of Guaira Falls on the Rio Parana; an accord placed the long-disputed Isla Suarez/Ilha de Guajara-Mirim, a fluvial island on the Rio Mamore, under Bolivian administration in 1958, but sovereignty remains in dispute

Illicit drugs:

second-largest consumer of cocaine in the world; illicit producer of cannabis; trace amounts of coca cultivation in the Amazon region, used for domestic consumption; government has a large-scale eradication program to control cannabis; important transshipment country for Bolivian, Colombian, and Peruvian cocaine headed for Europe; also used by traffickers as a way station for narcotics air transshipments between Peru and Colombia; upsurge in drug-related violence and weapons smuggling; important market for Colombian, Bolivian, and Peruvian cocaine; illicit narcotics proceeds are often laundered through the financial system; significant illicit financial activity in the Tri-Border Area (2008)

British Indian Ocean Territory

Introduction ::

Background:

Formerly administered as part of the British Crown Colony of Mauritius, the British Indian Ocean Territory (BIOT) was established as an overseas territory of the UK in 1965. A number of the islands of the territory were later transferred to the Seychelles when it attained independence in 1976. Subsequently, BIOT has consisted only of the six main island groups comprising the Chagos Archipelago. The largest and most southerly of the islands, Diego Garcia, contains a joint UK-

US naval support facility. All of the remaining islands are uninhabited. Between 1967 and 1973, former agricultural workers, earlier residents in the islands, were relocated primarily to Mauritius, but also to the Seychelles. Negotiations between 1971 and 1982 resulted in the establishment of a trust fund by the British Government as compensation for the displaced islanders, known as Chagossians. Beginning in 1998, the islanders pursued a series of lawsuits against the British Government seeking further compensation and the right to return to the territory. In 2006 and 2007, British court rulings invalidated the immigration policies contained in the 2004 BIOT Constitution Order that had excluded the islanders from the archipelago, but upheld the special military status of Diego Garcia. In 2008, the House of Lords, as the final court of appeal in the UK, ruled in favor of the British Government by overturning the lower court rulings and finding no right of return for the Chagossians.

Economy ::

Economy - overview:

All economic activity is concentrated on the largest island of Diego Garcia, where a joint UK-US military facility is located. Construction projects and various services needed to support the military installation are performed by military and contract employees from the UK, Mauritius, the Philippines, and the US. There are no industrial or agricultural activities on the islands. The territory earns foreign exchange by selling fishing licenses and postage stamps.

Disputes - international:

Mauritius claims the Chagos Archipelago including Diego Garcia; in 2001, the former inhabitants of the Chagos Archipelago, evicted in 1967 and 1973 and now residing chiefly in Mauritius, were granted UK citizenship and the right to repatriation; in May 2007, the UK Court of Appeals upheld the May 2006 High Court of London judgment reversing the UK government's 2004 Orders of Council that banned habitation on the islands; a small group of Chagossians visited Diego Garcia in April 2006; repatriation is complicated by the exclusive US military lease of Diego Garcia that restricts access to the largest viable island in the chain

British Virgin Islands

Introduction ::

Background:

First inhabited by Arawak and later by Carib Indians, the Virgin Islands were settled by the Dutch in 1648 and then annexed by the English in 1672. The islands were part of the British colony of the Leeward Islands from 1872-1960; they were granted autonomy in 1967. The economy is closely tied to the larger and more populous US Virgin Islands to the west; the US dollar is the legal currency.

Economy ::

Economy - overview:

The economy, one of the most stable and prosperous in the Caribbean, is highly dependent on tourism generating an estimated 45% of the national income. More than 934,000 tourists, mainly from the US, visited the islands in 2008. In the mid-1980s, the government began offering offshore registration to companies wishing to incorporate in the islands, and incorporation fees now generate substantial revenues. Roughly 400,000 companies were on the offshore registry by yearend 2000. The adoption of a comprehensive insurance law in late 1994,

which provides a blanket of confidentiality with regulated statutory gateways for investigation of criminal offenses, made the British Virgin Islands even more attractive to international business. Livestock raising is the most important agricultural activity; poor soils limit the islands' ability to meet domestic food requirements. Because of traditionally close links with the US Virgin Islands, the British Virgin Islands has used the US dollar as its currency since 1959.

Introduction ::

Background:

The Sultanate of Brunei's influence peaked between the 15th and 17th centuries when its control extended over coastal areas of northwest Borneo and the southern Philippines. Brunei subsequently entered a period of decline brought on by internal strife over royal succession, colonial expansion of European powers, and piracy. In 1888, Brunei became a British protectorate; independence was achieved in 1984. The same family has ruled Brunei for over six centuries. Brunei

benefits from extensive petroleum and natural gas fields, the source of one of the highest per capita GDPs in Asia.

Economy ::

Economy - overview:

Brunei has a small well-to-do economy that encompasses a mixture of foreign and domestic entrepreneurship, government regulation, welfare measures, and village tradition. Crude oil and natural gas production account for just over half of GDP and more than 90% of exports. Per capita GDP is among the highest in Asia, and substantial income from overseas investment supplements income from domestic production. The government provides for all medical services and free education through the university level and subsidizes rice and housing. A new monetary authority was established in January 2011 with responsibilities that include monetary policy, monitoring of financial institutions, and currency trading activities. Other plans for the future include upgrading the labor force, reducing unemployment, strengthening the banking and tourist sectors, increasing agricultural production, and, in general, further widening the economic base beyond oil and gas.

Transnational Issues ::

Disputes - international:

Brunei and Malaysia agreed in September 2008 to resolve their offshore and deepwater seabed dispute, resume hydrocarbon exploration, and renounce any territorial claims along their land boundary; despite no public territorial claim to Louisa Reef, Brunei implicitly lays claim by including it within the natural prolongation of its continental shelf and basis for a seabed median with Vietnam; the 2002 "Declaration on the Conduct of Parties in the South China Sea" has eased tensions in the Spratly Islands but falls short of a legally binding "code of conduct" desired by several of the disputants

Illicit drugs:

drug trafficking and illegally importing controlled substances are serious offenses in Brunei and carry a mandatory death penalty

Introduction ::

Background:

The Bulgars, a Central Asian Turkic tribe, merged with the local Slavic inhabitants in the late 7th century to form the first Bulgarian state. In succeeding centuries, Bulgaria struggled with the Byzantine Empire to assert its place in the Balkans, but by the end of the 14th century the country was overrun by the Ottoman Turks. Northern Bulgaria attained autonomy in 1878 and all of Bulgaria became independent from the Ottoman Empire in 1908. Having fought on the losing side in

both World Wars, Bulgaria fell within the Soviet sphere of influence and became a People's Republic in 1946. Communist domination ended in 1990, when Bulgaria held its first multiparty election since World War II and began the contentious process of moving toward political democracy and a market economy while combating inflation, unemployment, corruption, and crime. The country joined NATO in 2004 and the EU in 2007.

Economy ::

Economy - overview:

Bulgaria, a former Communist country that entered the EU on 1 January 2007, averaged more than 6% growth from 2004 to 2008, driven by significant amounts of foreign direct investment and consumption. Successive governments have demonstrated a commitment to economic reforms and responsible fiscal planning, but the global downturn sharply reduced domestic demand, exports, capital inflows, and industrial production. GDP contracted by approximately 5% in 2009, and stagnated in 2010, despite a significant recovery in exports. The economy is expected to grow modestly in 2011, however. Corruption in the public administration, a weak judiciary, and the presence of organized crime remain significant challenges.

Burkina Faso

Introduction ::

Background:

Burkina Faso (formerly Upper Volta) achieved independence from France in 1960. Repeated military coups during the 1970s and 1980s were followed by multiparty elections in the early 1990s. Current President Blaise COMPAORE came to power in a 1987 military coup and has won every election since then. Burkina Faso's high population density and limited natural resources result in poor economic prospects for the majority of its citizens. Recent unrest in Cote d'Ivoire

and northern Ghana has hindered the ability of several hundred thousand seasonal Burkinabe farm workers to find employment in neighboring countries.

Economy ::

Economy - overview:

Burkina Faso is a poor, landlocked country that relies heavily on cotton and gold exports for revenue. The country has few natural resources and a weak industrial base. About 90% of the population is engaged in subsistence agriculture, which is vulnerable to periodic drought. Cotton is the main cash crop. Since 1998, Burkina Faso has embarked upon a gradual privatization of state-owned enterprises and in 2004 revised its investment code to attract foreign investment. As a result of this new code and other legislation favoring the mining sector, the country has seen an upswing in gold exploration and production. By 2010, gold had become the main source of export revenue.

Introduction ::

Background:

Britain conquered Burma over a period of 62 years (1824-1886) and incorporated it into its Indian Empire. Burma was administered as a province of India until 1937 when it became a separate, self-governing colony; independence from the Commonwealth was attained in 1948. Gen. NE WIN dominated the government from 1962 to 1988, first as military ruler, then as self-appointed president, and later as political kingpin. In September 1988, the military deposed NE WIN and established a new ruling junta. Despite multiparty legislative elections in 1990 that resulted in the main opposition party - the National League for Democracy (NLD) - winning a landslide victory, the junta refused to hand over power. NLD leader and Nobel Peace Prize recipient AUNG SAN SUU KYI, who was under house arrest from 1989 to 1995 and 2000 to 2002, was imprisoned in May 2003 and subsequently transferred to house arrest. She was finally released in November 2010. After the ruling junta in August 2007 unexpectedly increased fuel prices, tens of thousands of Burmese marched in protest, led by prodemocracy activists and Buddhist monks. In late September 2007, the government brutally suppressed the protests, killing at least 13 people and arresting thousands for participating in the demonstrations. Since then, the regime has continued to raid homes and monasteries and arrest persons suspected of participating in the pro-democracy protests. Burma in early May 2008 was struck by Cyclone Nargis which official estimates claimed left over 80,000 dead and 50,000 injured. Despite this tragedy, the junta proceeded with its May constitutional referendum, the first vote in Burma since 1990. Parliamentary elections held in November 2010, considered flawed by many in the international community, saw the junta's Union Solidarity and Development Party garnering over 70 percent of the seats. Parliament is constitutionally mandated to convene within 90 days of the election; the president, two vice presidents, and ministers will be selected at that time.

Economy ::

Economy - overview:

Burma, a resource-rich country, suffers from pervasive government controls, inefficient economic policies, corruption, and rural poverty. Despite Burma's emergence as a natural gas exporter, socio-economic conditions have deteriorated under the regime's mismanagement, leaving most of the public in poverty, while military leaders and their business cronies exploit the country's ample natural resources. The economy suffers from serious macroeconomic imbalances - including rising inflation, fiscal deficits, multiple official exchange rates that overvalue the Burmese kyat, a distorted interest rate regime, unreliable statistics, and an inability to reconcile national accounts to determine a realistic GDP figure. Burma's poor investment climate hampers the inflow of foreign investment; in recent years, foreign investors have shied away from nearly every sector except for natural gas, power generation, timber, and mining. The business climate is widely perceived as opaque, corrupt, and highly inefficient. Over 60% of the FY 2009-10 budget is allocated to state owned enterprises - most operating at a deficit. The government has recently privatized a number of state owned enterprises, but most of the benefits have accrued to regime insiders and cronies. The most productive sectors will continue to be in extractive industries - especially oil and gas, mining, and timber - with the latter two causing significant environmental degradation. Other areas, such as manufacturing, tourism and services, struggle in the face of inadequate infrastructure, unpredictable trade policies, neglected health and education systems, and endemic corruption. A major banking crisis in 2003 caused 20 private banks to close; private banks still operate under tight restrictions, limiting the private sector's access to credit. The United States, the European Union, Canada, and Australia have imposed financial and economic sanctions on Burma, prohibiting most financial transactions with Burmese entities, imposing travel bans on Burmese officials and others connected to the ruling regime, and banning imports of certain Burmese products. These sanctions affected the country's fledgling garment industry, isolated the struggling banking sector, and raised the costs of doing business with Burmese companies, particularly firms tied to Burmese regime leaders. The global crisis of 2008-09 caused exports and domestic consumer demand to drop. Remittances from overseas Burmese workers - who

had provided significant financial support for their families - slowed or dried up as jobs were lost and migrant workers returned home. Though the Burmese government has good economic relations with its neighbors, better investment and business climates and an improved political situation are needed to promote serious foreign investment, exports, and tourism.

Transnational Issues ::

Disputes - international:

over half of Burma's population consists of diverse ethnic groups who have substantial numbers of kin in neighboring countries; Thailand must deal with Karen and other ethnic refugees, asylum seekers, and rebels, as well as illegal cross-border activities from Burma; Thailand is studying the feasibility of jointly constructing the Hatgyi Dam on the Salween River near the border with Burma; citing environmental, cultural, and social concerns, China is reconsidering construction of 13 dams on the Salween River but energy-starved Burma with backing from Thailand remains intent on building five hydro-electric dams downstream, despite identical regional and international protests; India seeks cooperation from Burma to keep Indian Nagaland separatists, such as the United Liberation Front of Assam, from hiding in remote Burmese Uplands; after 21 years, Bangladesh in January 2008 resumed talks with Burma on delimiting a maritime boundary

Refugees and internally displaced persons:

IDPs: 503,000 (government offensives against ethnic insurgent groups near the eastern borders; most IDPs are ethnic Karen, Karenni, Shan, Tavoyan, and Mon) (2007)

Trafficking in persons:

current situation: Burma is a source country for women, children, and

men trafficked for the purpose of forced labor and commercial sexual exploitation; Burmese women and children are trafficked to East and Southeast Asia for commercial sexual exploitation, domestic servitude, and forced labor; Burmese children are subjected to conditions of forced labor in Thailand as hawkers and beggars; women are trafficked for commercial sexual exploitation to Malaysia and China; some trafficking victims transit Burma from Bangladesh to Malaysia and from China to Thailand; Burma's internal trafficking remains the most serious concern occurring primarily from villages to urban centers and economic hubs for labor in industrial zones, agricultural estates, and commercial sexual exploitation; the Burmese military continues to engage in the unlawful conscription of child soldiers, and continues to be the main perpetrator of forced labor inside Burma; ethnic insurgent groups also used compulsory labor of adults and unlawful recruitment of children; the regime's widespread use of and lack of accountability in forced labor and recruitment of child soldiers is particularly worrying and represents the top causal factor for Burma's significant trafficking problem

tier rating: Tier 3 - serious problems remain in Burma, and in some areas, most notably in the area of forced labor, the Government of Burma is not making significant efforts to comply with the minimum standards for the elimination of trafficking, warranting a ranking of Tier 3; in other areas, particularly with regard to international sex trafficking of women and girls, the Government of Burma is making significant efforts (2010)

Illicit drugs:

remains world's second largest producer of illicit opium with an estimated production in 2008 of 340 metric tons, an increase of 26%, and poppy cultivation in 2008 totaled 22,500 hectares, a 4% increase from 2007; production in the United Wa State Army's areas of greatest control remains low; Shan state is the source of 94% of Burma's poppy cultivation; lack of government will to take on major narcotrafficking groups and lack of serious commitment against money laundering continues to hinder the overall antidrug effort; major source of methamphetamine and heroin for regional consumption

Burundi

Introduction ::

Background:

Burundi's first democratically elected president was assassinated in October 1993 after only 100 days in office, triggering widespread ethnic violence between Hutu and Tutsi factions. More than 200,000 Burundians perished during the conflict that spanned almost a dozen years. Hundreds of thousands of Burundians were internally displaced or became refugees in neighboring countries. An internationally brokered power-sharing agreement between the Tutsi-dominated government and the Hutu rebels in 2003 paved the way for a

transition process that led to an integrated defense force, established a new constitution in 2005, and elected a majority Hutu government in 2005. The new government, led by President Pierre NKURUNZIZA, signed a South African brokered ceasefire with the country's last rebel group in September of 2006 but still faces many challenges.

Economy ::

Economy - overview:

Burundi is a landlocked, resource-poor country with an underdeveloped manufacturing sector. The economy is predominantly agricultural which accounts for about 35% of GDP and employs more than 90% of the population. Burundi's primary exports are coffee and tea, which account for 90% of foreign exchange earnings, though exports are a relatively small share of GDP. Burundi's export earning - and its ability to pay for imports - rests primarily on weather conditions and international coffee and tea prices. The Tutsi minority, 14% of the population, dominates the coffee trade. An ethnic-based war that lasted for over a decade resulted in more than 200,000 deaths, forced more than 48,000 refugees into Tanzania, and displaced 140,000 others internally. Only one in two children go to school, and approximately one in 15 adults has HIV/AIDS. Food, medicine, and electricity remain in short supply. Burundi's GDP grew around 4% annually in 2006-09. Political stability and the end of the civil war have improved aid flows and economic activity has increased, but underlying weaknesses - a high poverty rate, poor education rates, a weak legal system, and low administrative capacity - risk undermining planned economic reforms. Burundi will continue to remain heavily dependent on aid from bilateral and multilateral donors; the delay of funds after a corruption scandal cut off bilateral aid in 2007 reduced government's revenues and its ability to pay salaries. Burundi joined the East African Community, which should boost Burundi's regional trade ties, and received \$700 million in debt relief in 2009. Instability spilling over from eastern Congo-Kinshasa and the ban on minerals smuggled across Burundi's border will be the main challenges to economic growth.

Cambodia

Introduction ::

Background:

Most Cambodians consider themselves to be Khmers, descendants of the Angkor Empire that extended over much of Southeast Asia and reached its zenith between the 10th and 13th centuries. Attacks by the Thai and Cham (from present-day Vietnam) weakened the empire, ushering in a long period of decline. The king placed the country under French protection in 1863 and it became part of French Indochina in 1887. Following Japanese occupation in World War II,

Cambodia gained full independence from France in 1953. In April 1975, after a five-year struggle, Communist Khmer Rouge forces captured Phnom Penh and evacuated all cities and towns. At least 1.5 million Cambodians died from execution, forced hardships, or starvation during the Khmer Rouge regime under POL POT. A December 1978 Vietnamese invasion drove the Khmer Rouge into the countryside, began a 10-year Vietnamese occupation, and touched off almost 13 years of civil war. The 1991 Paris Peace Accords mandated democratic elections and a ceasefire, which was not fully respected by the Khmer Rouge. UN-sponsored elections in 1993 helped restore some semblance of normalcy under a coalition government. Factional fighting in 1997 ended the first coalition government, but a second round of national elections in 1998 led to the formation of another coalition government and renewed political stability. The remaining elements of the Khmer Rouge surrendered in early 1999. Some of the surviving Khmer Rouge leaders have been tried or are awaiting trial for crimes against humanity by a hybrid UN-Cambodian tribunal supported by international assistance. Elections in July 2003 were relatively peaceful, but it took one year of negotiations between contending political parties before a coalition government was formed. In October 2004, King Norodom SIHANOUK abdicated the throne and his son, Prince Norodom SIHAMONI, was selected to succeed him. Local elections were held in Cambodia in April 2007, with little of the pre-election violence that preceded prior elections. National elections in July 2008 were relatively peaceful.

Economy ::

Economy - overview:

From 2004 to 2007, the economy grew about 10% per year, driven largely by an expansion in the garment sector, construction, agriculture, and tourism. GDP contracted 1.5% in 2009 as a result of the global economic slowdown, but climbed more than 4% in 2010, driven by renewed exports. With the January 2005 expiration of a WTO Agreement on Textiles and Clothing, Cambodian textile producers were forced to compete directly with lower-priced countries such as China, India, Vietnam, and Bangladesh. The garment industry currently employs more than 280,000 people - about 5% of the work force - and contributes more than 70% of Cambodia's exports. In 2005, exploitable oil deposits were found beneath Cambodia's territorial waters, representing a new revenue stream for the government if commercial extraction begins. Mining also is attracting significant investor interest, particularly in the northern parts of the country. The government has said opportunities exist for mining bauxite, gold, iron and gems. In 2006, a US-Cambodia bilateral Trade and Investment Framework Agreement (TIFA) was signed, and several rounds of

discussions have been held since 2007. Rubber exports increased about 25% in 2009 due to rising global demand. The tourism industry has continued to grow rapidly, with foreign arrivals exceeding 2 million per year in 2007-08, however, economic troubles abroad dampened growth in 2009. The global financial crisis is weakening demand for Cambodian exports, and construction is declining due to a shortage of credit. The long-term development of the economy remains a daunting challenge. The Cambodian government is working with bilateral and multilateral donors, including the World Bank and IMF, to address the country's many pressing needs. The major economic challenge for Cambodia over the next decade will be fashioning an economic environment in which the private sector can create enough jobs to handle Cambodia's demographic imbalance. More than 50% of the population is less than 25 years old. The population lacks education and productive skills, particularly in the poverty-ridden countryside, which suffers from an almost total lack of basic infrastructure.

Introduction ::

Background:

The former French Cameroon and part of British Cameroon merged in 1961 to form the present country. Cameroon has generally enjoyed stability, which has permitted the development of agriculture, roads, and railways, as well as a petroleum industry. Despite slow movement toward democratic reform, political power remains firmly in the hands of President Paul BIYA.

note: adopted 1957; Cameroon's anthem, also known as "Chant de Ralliement" (The Rallying Song), has been used unofficially since 1948 although officially adopted in 1957; the anthem has French and English versions whose lyrics differ

Economy ::

Economy - overview:

Because of its modest oil resources and favorable agricultural conditions, Cameroon has one of the best-endowed primary commodity economies in sub-Saharan Africa. Still, it faces many of the serious problems facing other underdeveloped countries, such as stagnate per capita income, a relatively inequitable distribution of

income, a top-heavy civil service, and a generally unfavorable climate for business enterprise. Since 1990, the government has embarked on various IMF and World Bank programs designed to spur business investment, increase efficiency in agriculture, improve trade, and recapitalize the nation's banks. The IMF is pressing for more reforms, including increased budget transparency, privatization, and poverty reduction programs. Weak prices for oil and cocoa led to the significant slowdown in growth in 2009. The government is under pressure to reduce its budget deficit, which by the government's own forecast will hit 2.8% of GDP, but the presidential election in 2011 may make fiscal austerity difficult.

Transnational Issues ::

Disputes - international:

Joint Border Commission with Nigeria reviewed 2002 ICJ ruling on the entire boundary and bilaterally resolved differences, including June 2006 Greentree Agreement that immediately ceded sovereignty of the Bakassi Peninsula to Cameroon with a full phase-out of Nigerian control and patriation of residents in 2008; Cameroon and Nigeria agree on maritime delimitation in March 2008; sovereignty dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty, which also includes the Chad-Niger and Niger-Nigeria boundaries

Refugees and internally displaced persons:

refugees (country of origin): 20,000-30,000 (Chad); 3,000 (Nigeria); 24,000 (Central African Republic) (2007)

Trafficking in persons:

current situation: Cameroon is a source, transit, and destination country for women and children trafficked for the purposes of forced labor and commercial sexual exploitation; most victims are children trafficked within country, with girls primarily trafficked for domestic servitude and sexual exploitation; both boys and girls are also trafficked within Cameroon for forced labor in sweatshops, bars, restaurants, and on tea and cocoa plantations; children are trafficked into Cameroon from neighboring states for forced labor in agriculture, fishing, street vending, and spare-parts shops; Cameroon is a transit country for children trafficked between Gabon and Nigeria, and from Nigeria to Saudi Arabia; it is a source country for women transported by sex-trafficking rings to Europe

tier rating: Tier 2 Watch List - Cameroon is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat human trafficking in 2007, particularly in terms of efforts to prosecute and convict trafficking offenders; while Cameroon reported some arrests of traffickers, none of them were prosecuted or punished; the government does not identify trafficking victims among vulnerable populations nor does it monitor the number of victims it intercepts (2008)

Introduction ::

Background:

A land of vast distances and rich natural resources, Canada became a self-governing dominion in 1867 while retaining ties to the British crown. Economically and technologically, the nation has developed in parallel with the US, its neighbor to the south across an unfortified border. Canada faces the political challenges of meeting public demands for quality improvements in health care, and education, social services, and economic competitiveness, as well as responding to the particular concerns of predominantly francophone Quebec. Canada also aims to develop its diverse energy resources while maintaining its commitment to the environment.

Geography ::

Location:

Northern North America, bordering the North Atlantic Ocean on the east, North Pacific Ocean on the west, and the Arctic Ocean on the north, north of the conterminous US

Natural hazards:

continuous permafrost in north is a serious obstacle to development; cyclonic storms form east of the Rocky Mountains, a result of the

mixing of air masses from the Arctic, Pacific, and North American interior, and produce most of the country's rain and snow east of the mountains

volcanism: the vast majority of volcanoes in Western Canada's Coast Mountains remain dormant

Environment - current issues:

air pollution and resulting acid rain severely affecting lakes and damaging forests; metal smelting, coal-burning utilities, and vehicle emissions impacting on agricultural and forest productivity; ocean waters becoming contaminated due to agricultural, industrial, mining, and forestry activities

anthem has French and English versions whose lyrics differ; as a Commonwealth realm, in addition to the national anthem, "God Save the Queen" serves as the royal anthem (see United Kingdom)

Economy ::

Economy - overview:

As an affluent, high-tech industrial society in the trillion-dollar class, Canada resembles the US in its market-oriented economic system, pattern of production, and affluent living standards. Since World War II, the impressive growth of the manufacturing, mining, and service sectors has transformed the nation from a largely rural economy into one primarily industrial and urban. The 1989 US-Canada Free Trade Agreement (FTA) and the 1994 North American Free Trade Agreement (NAFTA) (which includes Mexico) touched off a dramatic increase in trade and economic integration with the US, its principal trading partner. Canada enjoys a substantial trade surplus with the US, which absorbs about three-fourths of Canadian exports each year. Canada is the US's largest foreign supplier of energy, including oil, gas, uranium, and electric power. Given its great natural resources, skilled labor force, and modern capital plant, Canada enjoyed solid economic growth from 1993 through 2007. Buffeted by the global economic crisis, the economy dropped into a sharp recession in the final months of 2008, and Ottawa posted its first fiscal deficit in 2009 after 12 years of surplus. Canada's major banks, however, emerged from the financial crisis of 2008-09 among the strongest in the world, owing to the country's tradition of conservative lending practices and strong capitalization. During 2010, Canada's economy grew only 3%, because of weak exports.

Cape Verde

Introduction ::

Background:

The uninhabited islands were discovered and colonized by the Portuguese in the 15th century; Cape Verde subsequently became a trading center for African slaves and later an important coaling and resupply stop for whaling and transatlantic shipping. Following independence in 1975, and a tentative interest in unification with Guinea-Bissau, a one-party system was established and maintained until multi-party elections were held in 1990. Cape Verde continues to

exhibit one of Africa's most stable democratic governments. Repeated droughts during the second half of the 20th century caused significant hardship and prompted heavy emigration. As a result, Cape Verde's expatriate population is greater than its domestic one. Most Cape Verdeans have both African and Portuguese antecedents.

Economy ::

Economy - overview:

This island economy suffers from a poor natural resource base, including serious water shortages exacerbated by cycles of long-term drought and poor soil for agriculture on several of the islands. The economy is service oriented with commerce, transport, tourism, and public services accounting for about three-fourths of GDP. Although nearly 70% of the population lives in rural areas, the share of food production in GDP is low. About 82% of food must be imported. The fishing potential, mostly lobster and tuna, is not fully exploited. Cape Verde annually runs a high trade deficit financed by foreign aid and remittances from its large pool of emigrants; remittances supplement GDP by more than 20%. Despite the lack of resources, sound economic management has produced steadily improving incomes. Continued economic reforms are aimed at developing the private sector and attracting foreign investment to diversify the economy. Future prospects depend heavily on the maintenance of aid flows, the encouragement of tourism, remittances, and the momentum of the government's development program. Cape Verde became a member of the WTO in July 2008.

Economy ::

Economy - overview:

With no direct taxation, the islands are a thriving offshore financial center. More than 93,000 companies were registered in the Cayman Islands as of 2008, including almost 300 banks, 800 insurers, and 10,000 mutual funds. A stock exchange was opened in 1997. Tourism

is also a mainstay, accounting for about 70% of GDP and 75% of foreign currency earnings. The tourist industry is aimed at the luxury market and caters mainly to visitors from North America. Total tourist arrivals exceeded 1.9 million in 2008, with about half from the US. About 90% of the islands' food and consumer goods must be imported. The Caymanians enjoy one of the highest outputs per capita and one of the highest standards of living in the world.

Central African Republic

Introduction ::

Background:

The former French colony of Ubangi-Shari became the Central African Republic upon independence in 1960. After three tumultuous decades of misrule - mostly by military governments - civilian rule was established in 1993 and lasted for one decade. President Ange-Felix PATASSE's civilian government was plagued by unrest, and in March 2003 he was deposed in a military coup led by General Francois BOZIZE, who established a transitional government. Though the

government has the tacit support of civil society groups and the main parties, a wide field of candidates contested the municipal, legislative, and presidential elections held in March and May of 2005 in which General BOZIZE was affirmed as president. The government still does not fully control the countryside, where pockets of lawlessness persist. Unrest in the neighboring nations of Chad, Sudan, and the DRC continues to affect stability in the Central African Republic as well.

Economy ::

Economy - overview:

Subsistence agriculture, together with forestry, remains the backbone of the economy of the Central African Republic (CAR), with about 60% of the population living in outlying areas. The agricultural sector generates more than half of GDP. Timber has accounted for about 16% of export earnings and the diamond industry, for 40%. Important constraints to economic development include the CAR's landlocked position, a poor transportation system, a largely unskilled work force,

and a legacy of misdirected macroeconomic policies. Factional fighting between the government and its opponents remains a drag on economic revitalization. Distribution of income is extraordinarily unequal. Grants from France and the international community can only partially meet humanitarian needs.

Trafficking in persons:

current situation: Central African Republic is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; the majority of victims are children trafficked within the country for sexual exploitation, domestic servitude, street vending, and forced agricultural, mine, market and restaurant labor; to a lesser extent, children are trafficked from the Central African Republic to Cameroon, Nigeria, and the Democratic Republic of Congo; rebels conscript children into armed forces within the country

tier rating: Tier 2 Watch List - Central African Republic is on the Tier 2 Watch List for the third consecutive year for its failure to show evidence of increasing efforts to combat trafficking in 2007; efforts to address trafficking through vigorous law enforcement measures and victim protection efforts were minimal, though awareness about trafficking appeared to be increasing in the country; the government does not actively investigate cases, work to identify trafficking victims among vulnerable populations, or rescue and provide care to victims; the government has not taken measures to reduce demand for commercial sex acts (2008)

Introduction ::

Background:

Chad, part of France's African holdings until 1960, endured three decades of civil warfare as well as invasions by Libya before a semblance of peace was finally restored in 1990. The government eventually drafted a democratic constitution and held flawed presidential elections in 1996 and 2001. In 1998, a rebellion broke out in northern Chad, which has sporadically flared up despite several peace agreements between the government and the rebels. In 2005, new rebel groups emerged in western Sudan and made probing attacks into eastern Chad despite signing peace agreements in December 2006 and October 2007. Power remains in the hands of an ethnic minority. In June 2005, President Idriss DEBY held a referendum successfully removing constitutional term limits and won another controversial election in 2006. Sporadic rebel campaigns continued throughout 2006 and 2007. The capital experienced a significant rebel threat in early 2008.

Economy ::

Economy - overview:

Chad's primarily agricultural economy will continue to be boosted by major foreign direct investment projects in the oil sector that began in 2000. At least 80% of Chad's population relies on subsistence farming and livestock raising for its livelihood. Chad's economy has long been handicapped by its landlocked position, high energy costs, and a history of instability. Chad relies on foreign assistance and foreign capital for most public and private sector investment projects. A consortium led by two US companies has been investing \$3.7 billion to develop oil reserves - estimated at 1 billion barrels - in southern

Chad. Chinese companies are also expanding exploration efforts and are currently building a 300-km pipeline and the country's first refinery. The nation's total oil reserves are estimated at 1.5 billion barrels. Oil production came on stream in late 2003. Chad began to export oil in 2004. Cotton, cattle, and gum arabic provide the bulk of Chad's non-oil export earnings.

Transnational Issues ::

Disputes - international:

since 2003, Janjawid armed militia and the Sudanese military have driven hundreds of thousands of Darfur residents into Chad; Chad remains an important mediator in the Sudanese civil conflict, reducing tensions with Sudan arising from cross-border banditry; Chadian Aozou rebels reside in southern Libya; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty, which also includes the Chad-Niger and Niger-Nigeria boundaries

Refugees and internally displaced persons:

refugees (country of origin): 234,000 (Sudan); 54,200 (Central African Republic)

IDPs: 178,918 (2007)

Trafficking in persons:

current situation: Chad is a source, transit, and destination country for children trafficked for the purposes of forced labor and commercial sexual exploitation; the majority of children are trafficked within Chad for involuntary domestic servitude, forced cattle herding, forced begging, forced labor in petty commerce or the fishing industry, or for commercial sexual exploitation; to a lesser extent, Chadian children are also trafficked to Cameroon, the Central African Republic, and Nigeria for cattle herding; children may also be trafficked from Cameroon and the Central African Republic to Chad's oil producing regions for sexual exploitation

tier rating: Tier 2 Watch List - the Government of Chad does not fully comply with the minimum standards for the elimination of trafficking and is not making any significant efforts to do so; although facing resource constraints, the government has the capacity to conduct basic

anti-trafficking law enforcement efforts, yet did not do so during the last year; it showed no results in enforcing government policy prohibiting the recruitment of child soldiers; Chad has not ratified the 2000 UN TIP Protocol (2009)

Introduction ::

Background:

Prior to the coming of the Spanish in the 16th century, northern Chile was under Inca rule while the indigenous Mapuche inhabited central and southern Chile. Although Chile declared its independence in 1810, decisive victory over the Spanish was not achieved until 1818. In the War of the Pacific (1879-83), Chile defeated Peru and Bolivia and won its present northern regions. It was not until the 1880s that the Mapuche Indians were completely subjugated. After a series of elected governments, a three-year-old Marxist government of Salvador ALLENDE was overthrown in 1973 by a military coup led by Augusto PINOCHET, who ruled until a freely elected president was installed in 1990. Sound economic policies, maintained consistently since the 1980s, have contributed to steady growth, reduced poverty rates by over half, and have helped secure the country's commitment to democratic and representative government. Chile has increasingly assumed regional and international leadership roles befitting its status as a stable, democratic nation.

Economy ::

Economy - overview:

Chile has a market-oriented economy characterized by a high level of foreign trade and a reputation for strong financial institutions and sound policy that have given it the strongest sovereign bond rating in South America. Exports account for more than one-fourth of GDP, with commodities making up some three-quarters of total exports. Copper alone provides one-third of government revenue. During the early 1990s, Chile's reputation as a role model for economic reform was strengthened when the democratic government of Patricio AYLWIN - which took over from the military in 1990 - deepened the economic reform initiated by the military government. Growth in real

GDP averaged 8% during 1991-97, but fell to half that level in 1998 because of tight monetary policies implemented to keep the current account deficit in check and because of lower export earnings - the latter a product of the global financial crisis. A severe drought exacerbated the situation in 1999, reducing crop yields and causing hydroelectric shortfalls and electricity rationing, and Chile experienced negative economic growth for the first time in more than 15 years. In the years since then, growth has averaged 4% per year. Chile deepened its longstanding commitment to trade liberalization with the signing of a free trade agreement with the US, which took effect on 1 January 2004. Chile claims to have more bilateral or regional trade agreements than any other country. It has 57 such agreements (not all of them full free trade agreements), including with the European Union, Mercosur, China, India, South Korea, and Mexico. Over the past seven years, foreign direct investment inflows have quadrupled to some \$15 billion in 2010, but FDI had dropped to about \$7 billion in 2009 in the face of diminished investment throughout the world. The Chilean government conducts a rule-based countercyclical fiscal policy, accumulating surpluses in sovereign wealth funds during periods of high copper prices and economic growth, and allowing deficit spending only during periods of low copper prices and growth. As of September 2008, those sovereign wealth funds - kept mostly outside the country and separate from Central Bank reserves - amounted to more than \$20 billion. Chile used \$4 billion from this fund to finance a fiscal stimulus package to fend off recession. In December 2009, the OECD invited Chile to become a full member, after a two year period of compliance with organization mandates. The economy started to show signs of a rebound in the fourth quarter, 2009, and GDP grew more than 5% in 2010. The magnitude 8.8 earthquake that struck Chile in February 2010 was one of the top ten strongest earthquakes on record. It caused considerable damage near the epicenter, located about 70 miles from Concepcion - and about 200 miles southwest of Santiago.

Transnational Issues ::

Disputes - international:

Chile and Peru rebuff Bolivia's reinvigorated claim to restore the Atacama corridor, ceded to Chile in 1884, but Chile has offered instead unrestricted but not sovereign maritime access through Chile to Bolivian gas and other commodities; Chile rejects Peru's unilateral legislation to change its latitudinal maritime boundary with Chile to an equidistance line with a southwestern axis favoring Peru, in October 2007, Peru took its maritime complaint with Chile to the ICJ; territorial claim in Antarctica (Chilean Antarctic Territory) partially overlaps Argentine and British claims; the joint boundary commission, established by Chile and Argentina in 2001, has yet to map and demarcate the delimited boundary in the inhospitable Andean Southern Ice Field (Campo de Hielo Sur)

Illicit drugs:

transshipment country for cocaine destined for Europe and the region; some money laundering activity, especially through the Iquique Free Trade Zone; imported precursors passed on to Bolivia; domestic cocaine consumption is rising, making Chile a significant consumer of cocaine (2008)

Introduction ::

Background:

For centuries China stood as a leading civilization, outpacing the rest of the world in the arts and sciences, but in the 19th and early 20th centuries, the country was beset by civil unrest, major famines, military defeats, and foreign occupation. After World War II, the Communists under MAO Zedong established an autocratic socialist system that, while ensuring China's sovereignty, imposed strict controls over everyday life and cost the lives of tens of millions of people. After 1978, MAO's successor DENG Xiaoping and other leaders focused on market-oriented economic development and by 2000 output had quadrupled. For much of the population, living standards have improved dramatically and the room for personal choice has expanded, yet political controls remain tight. China since the early 1990s has increased its global outreach and participation in

international organizations.

National anthem:

name: "Yiyonggjün Jinxingqu" (The March of the Volunteers)

lyrics/music: TIAN Han/NIE Er

note: adopted 1949; the anthem, though banned during the Cultural Revolution, is more commonly known as "Zhongguo Guoge" (Chinese National Song); it was originally the theme song to the 1935 Chinese movie, "Sons and Daughters in a Time of Storm"

Economy ::

Economy - overview:

China's economy since the late 1970s has changed from a closed, centrally planned system to a more market-oriented one that plays a

major role in the global economy - in 2010 China became the world's largest exporter. Reforms began with the phasing out of collectivized agriculture, and expanded to include the gradual liberalization of prices, fiscal decentralization, increased autonomy for state enterprises, creation of a diversified banking system, development of stock markets, rapid growth of the private sector, and opening to foreign trade and investment. China generally has implemented reforms in a gradualist fashion. In recent years, China has renewed its support for state-owned enterprises in sectors it considers important to "economic security," explicitly looking to foster globally competitive national champions. After keeping its currency tightly linked to the US dollar for years, in July 2005 China revalued its currency by 2.1% against the US dollar and moved to an exchange rate system that references a basket of currencies. From mid 2005 to late 2008 cumulative appreciation of the renminbi against the US dollar was more than 20%, but the exchange rate remained virtually pegged to the dollar from the onset of the global financial crisis until June 2010, when Beijing allowed resumption of a gradual appreciation. The restructuring of the economy and resulting efficiency gains have contributed to a more than tenfold increase in GDP since 1978. Measured on a purchasing power parity (PPP) basis that adjusts for price differences, China in 2010 stood as the second-largest economy in the world after the US, having surpassed Japan in 2001. The dollar values of China's agricultural and industrial output each exceeded those of the US, although China was second to the US in the value of services it produced. Still, per capita income is below the world average. The Chinese government faces numerous economic development challenges, including: (a) reducing its high domestic savings rate and correspondingly low domestic demand; (b) sustaining adequate job growth for tens of millions of migrants and new entrants to the work force; (c) reducing corruption and other economic crimes; and (d) containing environmental damage and social strife related to the economy's rapid transformation. Economic development has progressed further in coastal provinces than in the interior, and approximately 200 million rural laborers and their dependents have relocated to urban areas to find work. One demographic consequence of the "one child" policy is that China is now one of the most rapidly aging countries in the world. Deterioration in the environment - notably air pollution, soil erosion, and the steady fall of the water table, especially in the north - is another long-term problem. China continues to lose arable land because of erosion and economic development. The Chinese government is seeking to add energy production capacity from sources other than coal and oil, focusing on nuclear and alternative energy development. In 2009, the global

economic downturn reduced foreign demand for Chinese exports for the first time in many years, but China rebounded quickly, outperforming all other major economies in 2010 with GDP growth around 10%. The economy appears set to remain on a strong growth trajectory in 2011, lending credibility to the stimulus policies the regime rolled out during the global financial crisis. The government vows to continue reforming the economy and emphasizes the need to increase domestic consumption in order to make the economy less dependent on exports for GDP growth in the future, but China likely will make only marginal progress toward these rebalancing goals in 2011. Two economic problems China currently faces are inflation - which, late in 2010, surpassed the government's target of 3% - and local government debt, which swelled as a result of stimulus policies, and is largely off-the-books and potentially low-quality.

general assessment: domestic and international services are increasingly available for private use; unevenly distributed domestic system serves principal cities, industrial centers, and many towns; China continues to develop its telecommunications infrastructure, and is partnering with foreign providers to expand its global reach; China in the summer of 2008 began a major restructuring of its telecommunications industry, resulting in the consolidation of its six telecom service operators to three, China Telecom, China Mobile and China Unicom, each providing both fixed-line and mobile services

domestic: interprovincial fiber-optic trunk lines and cellular telephone systems have been installed; mobile-cellular subscribership is increasing rapidly; the number of Internet users exceeded 250 million by summer 2008; a domestic satellite system with 55 earth stations is in place

international: country code - 86; a number of submarine cables provide connectivity to Asia, the Middle East, Europe, and the US; satellite earth stations - 7 (5 Intelsat - 4 Pacific Ocean and 1 Indian Ocean; 1 Intersputnik - Indian Ocean region; and 1 Inmarsat - Pacific and Indian Ocean regions) (2008)

Transnational Issues ::

Disputes - international:

continuing talks and confidence-building measures work toward reducing tensions over Kashmir that nonetheless remains militarized with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; China and India continue their security and foreign policy dialogue started in 2005 related to the dispute over most of their rugged, militarized boundary, regional nuclear proliferation, and other matters; China claims most of India's Arunachal Pradesh to the base of the Himalayas; lacking any treaty describing the boundary, Bhutan and China continue negotiations to establish a common boundary alignment to resolve territorial disputes due to cartographic discrepancies; Chinese maps show an international boundary symbol off the coasts of the littoral states of the South China Seas, where China has interrupted Vietnamese hydrocarbon exploration; China asserts sovereignty over Scarborough Reef along with the Philippines and Taiwan, and over the Spratly Islands together with Malaysia, the Philippines, Taiwan, Vietnam, and Brunei; the 2002 "Declaration on the Conduct of Parties in the South China Sea" eased tensions in the Spratly's but is not the legally binding "code of conduct" sought by some parties; Vietnam and China continue to expand construction of facilities in the Spratly's and in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord on marine seismic activities in the Spratly Islands; China occupies some of the Paracel Islands also claimed by Vietnam and Taiwan; China and Taiwan continue to reject both Japan's claims to the uninhabited islands of Senkaku-shoto (Diaoyu Tai) and Japan's unilaterally declared equidistance line in the East China Sea, the site of intensive hydrocarbon exploration and exploitation; certain islands in the Yalu and Tumen rivers are in dispute with North Korea; North Korea and China seek to stem illegal migration to China by North Koreans, fleeing privations and oppression, by building a fence along portions of the border and imprisoning North Koreans deported by China; China and Russia have demarcated the once disputed islands at the Amur and Ussuri confluence and in the Argun River in accordance with their 2004

Agreement; China and Tajikistan have begun demarcating the revised boundary agreed to in the delimitation of 2002; the decade-long demarcation of the China-Vietnam land boundary was completed in 2009; citing environmental, cultural, and social concerns, China has reconsidered construction of 13 dams on the Salween River, but energy-starved Burma, with backing from Thailand, remains intent on building five hydro-electric dams downstream despite regional and international protests; Chinese and Hong Kong authorities met in March 2008 to resolve ownership and use of lands recovered in Shenzhen River channelization, including 96-hectare Lok Ma Chau Loop; Hong Kong developing plans to reduce 2,000 out of 2,800 hectares of its restricted Closed Area by 2010

Refugees and internally displaced persons:

refugees (country of origin): 300,897 (Vietnam); estimated 30,000-50,000 (North Korea)

IDPs: 90,000 (2007)

Trafficking in persons:

current situation: China is a source, transit, and destination country for men, women, and children trafficked for the purposes of sexual exploitation and forced labor; the majority of trafficking in China occurs within the country's borders, but there is also considerable international trafficking of Chinese citizens to Africa, Asia, Europe, Latin America, the Middle East, and North America; Chinese women are lured abroad through false promises of legitimate employment, only to be forced into commercial sexual exploitation, largely in Taiwan, Thailand, Malaysia, and Japan; women and children are trafficked to China from Mongolia, Burma, North Korea, Russia, and Vietnam for forced labor, marriage, and prostitution; some North Korean women and children seeking to leave their country voluntarily cross the border into China and are then sold into prostitution, marriage, or forced labor

tier rating: Tier 2 Watch List - China is on the Tier 2 Watch List for the fourth consecutive year for its failure to provide evidence of increasing efforts to combat human trafficking, particularly in terms of punishment of trafficking crimes and the protection of Chinese and foreign victims of trafficking; victims are sometimes punished for unlawful acts that were committed as a direct result of their being trafficked, such as violations of prostitution or immigration/emigration controls; the Chinese Government continued to treat North

Korean victims of trafficking solely as economic migrants, routinely deporting them back to horrendous conditions in North Korea; additional challenges facing the Chinese Government include the enormous size of its trafficking problem and the significant level of corruption and complicity in trafficking by some local government officials (2008)

Illicit drugs:

major transshipment point for heroin produced in the Golden Triangle region of Southeast Asia; growing domestic consumption of synthetic drugs, and heroin from Southeast and Southwest Asia; source country for methamphetamine and heroin chemical precursors, despite new regulations on its large chemical industry

Clipperton Island

>

Introduction ::

Background:

This isolated island was named for John CLIPPERTON, a pirate who made it his hideout early in the 18th century. Annexed by France in 1855, it was seized by Mexico in 1897. Arbitration eventually awarded the island to France, which took possession in 1935.

Cocos (Keeling) Islands

>

Introduction ::

Background:

There are 27 coral islands in the group. Captain William KEELING discovered the islands in 1609, but they remained uninhabited until the 19th century. From the 1820s to 1978, members of the CLUNIE-ROSS family controlled the islands and the copra produced from local coconuts. Annexed by the UK in 1857, the Cocos Islands were transferred to the Australian Government in 1955. The population on the two inhabited islands generally is split between the ethnic

Europeans on West Island and the ethnic Malays on Home Island.

Introduction ::

Background:

Colombia was one of the three countries that emerged from the collapse of Gran Colombia in 1830 (the others are Ecuador and Venezuela). A four-decade long conflict between government forces and anti-government insurgent groups, principally the Revolutionary Armed Forces of Colombia (FARC) heavily funded by the drug trade, escalated during the 1990s. The insurgents lack the military or popular support necessary to overthrow the government and violence

has been decreasing since about 2002, but insurgents continue attacks against civilians and large areas of the countryside are under guerrilla influence or are contested by security forces. More than 31,000 former paramilitaries had demobilized by the end of 2006 and the United Self Defense Forces of Colombia (AUC) as a formal organization had ceased to function. In the wake of the paramilitary demobilization, emerging criminal groups arose, whose members include some former paramilitaries. The Colombian Government has stepped up efforts to reassert government control throughout the country, and now has a presence in every one of its administrative departments. However, neighboring countries worry about the violence spilling over their borders. In January 2011, Colombia assumed a nonpermanent seat on the UN Security Council for the 2011-12 term.

Flag description:

three horizontal bands of yellow (top, double-width), blue, and red; the flag retains the three main colors of the banner of Gran Columbia, the short-lived South American republic that broke up in 1830; various interpretations of the colors exist and include: yellow for the gold in Colombia's land, blue for the seas on its shores, and red for the blood spilled in attaining freedom; alternatively, the colors have been described as representing more elemental concepts such as sovereignty and justice (yellow), loyalty and vigilance (blue), and valour and generosity (red); or simply the principles of liberty, equality, and fraternity

note: similar to the flag of Ecuador, which is longer and bears the Ecuadorian coat of arms superimposed in the center

National anthem:

name: "Himno Nacional de la Republica de Colombia" (National Anthem of the Republic of Colombia)

lyrics/music: Rafael NUNEZ/Oreste SINDICI

note: adopted 1920; the anthem was created from an inspirational poem written by President Rafael NUNEZ

Economy ::

Economy - overview:

Colombia experienced accelerating growth between 2002 and 2007, chiefly due to improvements in domestic security, rising commodity prices, and to President URIBE's promarket economic policies. Foreign direct investment reached a record \$10 billion in 2008, and continues to flow in, especially in the oil sector. A series of policies enhanced Colombia's investment climate: pro-business reforms in the oil and gas sectors and export-led growth fueled mainly by the Andean Trade Promotion and Drug Eradication Act. Inequality, underemployment,

and narcotrafficking remain significant challenges, and Colombia's infrastructure requires major improvements to sustain economic expansion. Because of the global financial crisis and weakening demand for Colombia's exports, Colombia's economy grew only 2.7% in 2008, and 0.8% in 2009 but rebounded to around 4.5% in 2010. The government has encouraged exporters to diversify their customer base beyond the United States and Venezuela, traditionally Colombia's largest trading partners; the SANTOS administration continues to pursue free trade agreements with Asian and South American partners and awaits the approval of a Canadian trade accord by Canada's and EU's parliaments. The business sector remains concerned about Venezuela's trade restrictions on Colombian exports, an appreciating domestic currency, and the pending US Congressional approval of the US-Colombia Trade Promotion Agreement.

Transnational Issues ::

Disputes - international:

in December 2007, ICJ allocates San Andres, Providencia, and Santa Catalina islands to Colombia under 1928 Treaty but does not rule on 82 degrees W meridian as maritime boundary with Nicaragua; managed dispute with Venezuela over maritime boundary and Venezuelan-administered Los Monjes Islands near the Gulf of Venezuela; Colombian-organized illegal narcotics, guerrilla, and paramilitary activities penetrate all neighboring borders and have caused Colombian citizens to flee mostly into neighboring countries; Colombia, Honduras, Nicaragua, Jamaica, and the US assert various claims to Bajo Nuevo and Serranilla Bank

Refugees and internally displaced persons:

IDPs: 1.8-3.5 million (conflict between government and illegal armed groups and drug traffickers) (2007)

Illicit drugs:

illicit producer of coca, opium poppy, and cannabis; world's leading coca cultivator with 167,000 hectares in coca cultivation in 2007, a 6% increase over 2006, producing a potential of 535 mt of pure cocaine; the world's largest producer of coca derivatives; supplies cocaine to nearly all of the US market and the great majority of other international drug markets; in 2005, aerial eradication dispensed herbicide to treat over 130,000 hectares but aggressive replanting on the part of coca growers means Colombia remains a key producer; a significant portion of narcotics proceeds are either laundered or invested in Colombia through the black market peso exchange; important supplier of heroin to the US market; opium poppy cultivation is estimated to have fallen 25% between 2006 and 2007; most Colombian heroin is destined for the US market (2008)

Comoros

>

Introduction ::

Background:

Comoros has endured more than 20 coups or attempted coups since gaining independence from France in 1975. In 1997, the islands of Anjouan and Moheli declared independence from Comoros. In 1999, military chief Col. AZALI seized power in a bloodless coup, and helped negotiate the 2000 Fomboni Accords power-sharing agreement in which the federal presidency rotates among the three islands, and each island maintains its own local government. AZALI won the 2002

presidential election, and each island in the archipelago elected its own president. AZALI stepped down in 2006 and President SAMBI was elected to office. In 2007, Mohamed BACAR effected Anjouan's de-facto secession from the Union, refusing to step down in favor of fresh Anjouanais elections when Comoros' other islands held legitimate elections in July. The African Union (AU) initially attempted to resolve the political crisis by applying sanctions and a naval blockade on Anjouan, but in March 2008, AU and Comoran soldiers seized the island. The move was generally welcomed by the island's inhabitants.

Economy ::

Economy - overview:

One of the world's poorest countries, Comoros is made up of three islands that have inadequate transportation links, a young and rapidly increasing population, and few natural resources. The low educational level of the labor force contributes to a subsistence level of economic activity, high unemployment, and a heavy dependence on foreign grants and technical assistance. Agriculture, including fishing, hunting, and forestry, contributes 40% to GDP, employs 80% of the labor force, and provides most of the exports. Export income is heavily reliant on the three main crops of vanilla, cloves, and ylang-ylang and Comoros' export earnings are easily disrupted by disasters such as fires. The country is not self-sufficient in food production; rice, the main staple, accounts for the bulk of imports. The government - which is hampered by internal political disputes - lacks a comprehensive strategy to attract foreign investment and is struggling to upgrade education and technical training, privatize commercial and industrial enterprises, improve health services, diversify exports, promote tourism, and reduce the high population growth rate. Political problems have inhibited growth, which has averaged only about 1% in 2006-09. Remittances from 150,000 Comorans abroad help supplement GDP. In September 2009 the IMF approved Comoros for a three-year \$21 million loan. The IMF gave generally positive reports of the country's program performance as of October 2010. The African Development Bank approved a \$34.6 million debt-relief package loan for Comoros in September 2010, and Comoros will attempt to qualify for debt relief in 2012 under the IMF and World Bank's Heavily Indebted Poor Countries (HIPC) initiative.

Congo, Democratic Republic of the

Introduction ::

Background:

Established as a Belgian colony in 1908, the Republic of the Congo gained its independence in 1960, but its early years were marred by political and social instability. Col. Joseph MOBUTU seized power and declared himself president in a November 1965 coup. He subsequently changed his name - to MOBUTU Sese Seko - as well as that of the country - to Zaire. MOBUTU retained his position for 32 years through several sham elections, as well as through brutal force. Ethnic strife

and civil war, touched off by a massive inflow of refugees in 1994 from fighting in Rwanda and Burundi, led in May 1997 to the toppling of the MOBUTU regime by a rebellion backed by Rwanda and Uganda and fronted by Laurent KABILA. He renamed the country the Democratic Republic of the Congo (DRC), but in August 1998 his regime was itself challenged by a second insurrection again backed by Rwanda and Uganda. Troops from Angola, Chad, Namibia, Sudan, and Zimbabwe intervened to support KABILA's regime. A cease-fire was signed in July 1999 by the DRC, Congolese armed rebel groups, Angola, Namibia, Rwanda, Uganda, and Zimbabwe but sporadic fighting continued. Laurent KABILA was assassinated in January 2001 and his son, Joseph KABILA, was named head of state. In October 2002, the new president was successful in negotiating the withdrawal of Rwandan forces occupying eastern Congo; two months later, the Pretoria Accord was signed by all remaining warring parties to end the fighting and establish a government of national unity. A transitional government was set up in July 2003. Joseph KABILA as president and four vice presidents represented the former government, former rebel groups, the political opposition, and civil society. The transitional government held a successful constitutional referendum in December 2005 and elections for the presidency, National Assembly, and provincial legislatures in 2006. The National Assembly was installed in September 2006 and KABILA was inaugurated president in December 2006. Provincial assemblies were constituted in early 2007, and elected governors and national senators in January 2007.

Economy ::

Economy - overview:

The economy of the Democratic Republic of the Congo - a nation endowed with vast potential wealth - is slowly recovering from decades of decline. Systemic corruption since independence in 1960 and conflict that began in May 1997 has dramatically reduced national output and government revenue, increased external debt, and resulted in the deaths of more than 5 million people from violence, famine, and disease. Foreign businesses curtailed operations due to uncertainty about the outcome of the conflict, lack of infrastructure, and the difficult operating environment. Conditions began to improve in late 2002 with the withdrawal of a large portion of the invading foreign troops. The transitional government reopened relations with international financial institutions and international donors, and President KABILA began implementing reforms. Progress has been slow and the International Monetary Fund curtailed their program for the DRC at the end of March 2006 because of fiscal overruns. Much economic activity still occurs in the informal sector, and is not reflected in GDP data. Renewed activity in the mining sector, the source of most export income, boosted Kinshasa's fiscal position and GDP growth from 2006-2008, however, the government's review of mining contracts that began in 2006, combined with a fall in world market prices for the DRC's key mineral exports temporarily weakened output in 2009, leading to a balance of payments crisis. The recovery in mineral prices beginning in mid 2009 boosted mineral exports, and emergency funds from the IMF boosted foreign reserves. An uncertain legal framework, corruption, a lack of transparency in government policy are long-term problems for the mining sector and the economy as a whole. The global recession cut economic growth in 2009 to less than half its 2008 level, but growth returned to 3% in 2010. The DRC signed a Poverty Reduction and Growth Facility with the IMF in 2009 and received \$12 billion in multilateral and bilateral debt relief in 2010.

Transnational Issues ::

Disputes - international:

heads of the Great Lakes states and UN pledged in 2004 to abate tribal, rebel, and militia fighting in the region, including northeast Congo, where the UN Organization Mission in the Democratic Republic of the Congo (MONUC), organized in 1999, maintains over 16,500 uniformed peacekeepers; members of Uganda's Lords Resistance Army forces continue to seek refuge in Congo's Garamba National Park as peace talks with the Uganda government evolve; the location of the boundary in the broad Congo River with the Republic of the Congo is indefinite except in the Pool Malebo/Stanley Pool area; Uganda and DROC dispute Rukwanzi island in Lake Albert and other areas on the Semliki River with hydrocarbon potential; boundary commission continues discussions over Congolese-administered triangle of land on the right bank of the Lunkinda river claimed by Zambia near the DROC village of Pweto

Refugees and internally displaced persons:

refugees (country of origin): 132,295 (Angola); 37,313 (Rwanda); 17,777 (Burundi); 13,904 (Uganda); 6,181 (Sudan); 5,243 (Republic of Congo)

IDPs: 1.4 million (fighting between government forces and rebels since mid-1990s; most IDPs are in eastern provinces) (2007)

Trafficking in persons:

current situation: Democratic Republic of the Congo is a source and destination country for men, women, and children subjected to trafficking for the purposes of forced labor and forced prostitution; the majority of this trafficking is internal, and much of it is perpetrated by armed groups and government forces outside government control within the country's unstable eastern provinces

tier rating: Tier 3 - Government of the Democratic Republic of the Congo does not fully comply with the minimum standards for the

elimination of trafficking and is not making significant efforts to do so; the government did not show evidence of progress in prosecuting and punishing labor or sex trafficking offenders, including members of its own armed forces; providing protective services for the vast majority of trafficking victims; or raising public awareness of human trafficking; in addition, the government's anti-trafficking law enforcement efforts decreased during the reporting period (2010)

Illicit drugs:

one of Africa's biggest producers of cannabis, but mostly for domestic consumption; traffickers exploit lax shipping controls to transit pseudoephedrine through the capital; while rampant corruption and inadequate supervision leaves the banking system vulnerable to money laundering, the lack of a well-developed financial system limits the country's utility as a money-laundering center (2008)

Congo, Republic of the

Introduction ::

Background:

Upon independence in 1960, the former French region of Middle Congo became the Republic of the Congo. A quarter century of experimentation with Marxism was abandoned in 1990 and a democratically elected government took office in 1992. A brief civil war in 1997 restored former Marxist President Denis SASSOU-NGUESSO, and ushered in a period of ethnic and political unrest. Southern-based rebel groups agreed to a final peace accord in March

2003, but the calm is tenuous and refugees continue to present a humanitarian crisis. The Republic of Congo was once one of Africa's largest petroleum producers, but with declining production it will need new offshore oil finds to sustain its oil earnings over the long term.

Economy ::

Economy - overview:

The economy is a mixture of subsistence agriculture, an industrial sector based largely on oil and support services, and government spending. Oil has supplanted forestry as the mainstay of the economy, providing a major share of government revenues and exports. In the early 1980s, rapidly rising oil revenues enabled the government to finance large-scale development projects with GDP growth averaging 5% annually, one of the highest rates in Africa. Characterized by budget problems and overstaffing, the government has mortgaged a substantial portion of its oil earnings through oil-backed loans that have contributed to a growing debt burden and chronic revenue shortfalls. Economic reform efforts have been undertaken with the support of international organizations, notably the World Bank and the IMF. However, the reform program came to a halt in June 1997 when civil war erupted. Denis SASSOU-NGUESSO, who returned to power when the war ended in October 1997, publicly expressed

interest in moving forward on economic reforms and privatization and in renewing cooperation with international financial institutions. Economic progress was badly hurt by slumping oil prices and the resumption of armed conflict in December 1998, which worsened the republic's budget deficit. The current administration presides over an uneasy internal peace and faces difficult economic challenges of stimulating recovery and reducing poverty. The drop in oil prices during the global crisis reduced oil revenue by about 30%, but the subsequent recovery of oil prices has boosted the economy's GDP and near-term prospects. In March 2006, the World Bank and the International Monetary Fund (IMF) approved Heavily Indebted Poor Countries (HIPC) treatment for Congo, receiving \$1.9 billion in debt relief under the program in 2010.

Cook Islands

Introduction ::

Background:

Named after Captain COOK, who sighted them in 1770, the islands became a British protectorate in 1888. By 1900, administrative control was transferred to New Zealand; in 1965, residents chose self-government in free association with New Zealand. The emigration of skilled workers to New Zealand and government deficits are continuing problems.

Economy ::

Economy - overview:

Like many other South Pacific island nations, the Cook Islands' economic development is hindered by the isolation of the country from foreign markets, the limited size of domestic markets, lack of natural resources, periodic devastation from natural disasters, and inadequate infrastructure. Agriculture, employing more than one-quarter of the working population, provides the economic base with major exports made up of copra and citrus fruit. Black pearls are the Cook Islands' leading export. Manufacturing activities are limited to fruit processing, clothing, and handicrafts. Trade deficits are offset by remittances from emigrants and by foreign aid overwhelmingly from New Zealand. In the 1980s and 1990s, the country lived beyond its means, maintaining a bloated public service and accumulating a large foreign debt. Subsequent reforms, including the sale of state assets, the strengthening of economic management, the encouragement of tourism, and a debt restructuring agreement, have rekindled investment and growth.

Introduction ::

Background:

Scattered over more than three-quarters of a million square kilometers of ocean, the Coral Sea Islands were declared a territory of Australia in 1969. They are uninhabited except for a small meteorological staff on the Willis Islets. Automated weather stations, beacons, and a lighthouse occupy many other islands and reefs.

Costa Rica

Introduction ::

Background:

Although explored by the Spanish early in the 16th century, initial attempts at colonizing Costa Rica proved unsuccessful due to a combination of factors, including: disease from mosquito-infested swamps, brutal heat, resistance by natives, and pirate raids. It was not until 1563 that a permanent settlement of Cartago was established in the cooler, fertile central highlands. The area remained a colony for some two and a half centuries. In 1821, Costa Rica became one of

several Central American provinces that jointly declared their independence from Spain. Two years later it joined the United Provinces of Central America, but this federation disintegrated in 1838, at which time Costa Rica proclaimed its sovereignty and independence. Since the late 19th century, only two brief periods of violence have marred the country's democratic development. Although it still maintains a large agricultural sector, Costa Rica has expanded its economy to include strong technology and tourism industries. The standard of living is relatively high. Land ownership is widespread.

Geography ::

Natural hazards:

occasional earthquakes, hurricanes along Atlantic coast; frequent flooding of lowlands at onset of rainy season and landslides; active volcanoes

volcanism: Arenal (elev. 1,670 m, 5,479 ft), which erupted in 2010, is the most active volcano in Costa Rica; a 1968 eruption destroyed the town of Tabacon; Irazu (elev. 3,432 m, 11,260 ft), situated just east of San Jose, has the potential to spew ash over the capital city as it did between 1963 and 1965; other historically active volcanoes include Miravalles, Poas, Rincon de la Vieja, and Turrialba

Flag description:

five horizontal bands of blue (top), white, red (double width), white, and blue, with the coat of arms in a white elliptical disk toward the hoist side of the red band; Costa Rica retained the earlier blue-white-blue flag of Central America until 1848 when, in response to revolutionary activity in Europe, it was decided to incorporate the French colors into the national flag and a central red stripe was added; today the blue color is said to stand for the sky, opportunity, and perseverance, white denotes peace, happiness, and wisdom, while red represents the blood shed for freedom, as well as the generosity and vibrancy of the people

note: somewhat resembles the flag of North Korea; similar to the flag of Thailand but with the blue and red colors reversed

National anthem:

name: "Himno Nacional de Costa Rica" (National Anthem of Costa Rica)

lyrics/music: Jose Maria ZELEDON Brenes/Manuel Maria GUTIERREZ

note: adopted 1949; the anthem's music was originally written for an 1853 welcome ceremony for diplomatic missions from the United States and United Kingdom; the lyrics were added in 1903

Economy ::

Economy - overview:

Prior to the global economic crisis, Costa Rica enjoyed stable economic growth. The economy contracted 0.7% in 2009, but resumed growth at more than 3% in 2010. While the traditional agricultural exports of bananas, coffee, sugar, and beef are still the backbone of commodity export trade, a variety of industrial and specialized agricultural products have broadened export trade in recent years. High value added goods and services, including microchips, have further bolstered exports. Tourism continues to bring in foreign exchange, as Costa Rica's impressive biodiversity makes it a key destination for ecotourism. Foreign investors remain attracted by the country's political stability and relatively high education levels, as well as the fiscal incentives offered in the free-trade zones; and Costa Rica has attracted one of the highest levels of foreign direct investment per capita in Latin America. However, many business impediments, such as high levels of bureaucracy, difficulty of enforcing contracts, and weak investor protection, remain. Poverty has remained around 15-20% for nearly 20 years, and the strong social safety net that had been put into place by the government has eroded due to increased financial constraints on government expenditures. Unlike the rest of Central America, Costa Rica is not highly dependent on remittances as they only represent about 2% of GDP. Immigration from Nicaragua has increasingly become a concern for the government. The estimated 300,000-500,000 Nicaraguans in Costa Rica legally and illegally are an important source of - mostly unskilled - labor, but also place heavy demands on the social welfare system. The US-Central American-Dominican Republic Free Trade Agreement (CAFTA-DR) entered into force on 1 January 2009, after significant delays within the Costa Rican legislature. CAFTA-DR will likely lead to increased foreign direct investment in key sectors of the economy, including the insurance and telecommunications sectors recently opened to private investors. President CHINCHILLA is likely to push

for fiscal reform in the coming year, seeking to boost revenue, possibly through revised tax legislation, to fund an increase in security services and education.

Cote d'Ivoire

Introduction ::

Background:

Close ties to France since independence in 1960, the development of cocoa production for export, and foreign investment made Cote d'Ivoire one of the most prosperous of the West African states, but did not protect it from political turmoil. In December 1999, a military coup - the first ever in Cote d'Ivoire's history - overthrew the government. Junta leader Robert GUEI blatantly rigged elections held in late 2000 and declared himself the winner. Popular protest forced

him to step aside and brought Laurent GBAGBO into power. Ivorian dissidents and disaffected members of the military launched a failed coup attempt in September 2002. Rebel forces claimed the northern half of the country, and in January 2003 were granted ministerial positions in a unity government under the auspices of the Linas-Marcoussis Peace Accord. President GBAGBO and rebel forces resumed implementation of the peace accord in December 2003 after a three-month stalemate, but issues that sparked the civil war, such as land reform and grounds for citizenship, remained unresolved. In March 2007 President GBAGBO and former New Force rebel leader Guillaume SORO signed the Ouagadougou Political Agreement. As a result of the agreement, SORO joined GBAGBO's government as Prime Minister and the two agreed to reunite the country by dismantling the zone of confidence separating North from South, integrate rebel forces into the national armed forces, and hold elections. Disarmament, demobilization, and reintegration of rebel forces have been problematic as rebels seek to enter the armed forces. Citizen identification and voter registration pose election difficulties, and balloting planned for November 2009 was postponed with no future date set. Several thousand UN troops and several hundred French remain in Cote d'Ivoire to help the parties implement their commitments and to support the peace process.

note: adopted 1960; although the nation's capital city moved from Abidjan to Yamoussoukro in 1983, the anthem still owes its name to the former capital

Economy ::

Economy - overview:

Cote d'Ivoire is heavily dependent on agriculture and related activities, which engage roughly 68% of the population. Cote d'Ivoire is the world's largest producer and exporter of cocoa beans and a

significant producer and exporter of coffee and palm oil. Consequently, the economy is highly sensitive to fluctuations in international prices for these products, and, to a lesser extent, in climatic conditions. Cocoa, oil, and coffee are the country's top export revenue earners, but the country is also producing gold. Since the end of the civil war in 2003, political turmoil has continued to damage the economy, resulting in the loss of foreign investment and slow economic growth. GDP grew by more than 2% in 2008 and around 4% per year in 2009-10. Per capita income has declined by 15% since 1999, but registered a slight improvement in 2009-10. Power cuts caused by a turbine failure in early 2010 slowed economic activity. Cote d'Ivoire in 2010 signed agreements to restructure its Paris Club bilateral, other bilateral, and London Club debt. Cote d'Ivoire's long term challenges include political instability and degrading infrastructure.

Transnational Issues ::

Disputes - international:

despite the presence of over 9,000 UN forces (UNOCI) in Cote d'Ivoire since 2004, ethnic conflict still leaves displaced hundreds of thousands of Ivoirians in and out of the country as well as driven out migrants from neighboring states who worked in Ivorian cocoa plantations; the March 2007 peace deal between Ivorian rebels and the government brought significant numbers of rebels out of hiding in neighboring states

Refugees and internally displaced persons:

refugees (country of origin): 25,615 (Liberia)

IDPs: 709,000 (2002 coup; most IDPs are in western regions) (2007)

Trafficking in persons:

Cote d'Ivoire is a source, transit, and destination country for women and children trafficked for forced labor and commercial sexual exploitation; trafficking within the country is more prevalent than international trafficking and the majority of victims are children; women and girls are trafficked from northern areas to southern cities for domestic servitude, restaurant labor, and sexual exploitation; boys are trafficked internally for agricultural and service labor and transnationally for forced labor in agriculture, mining, construction, and in the fishing industry; women and girls are trafficked to and from other West and Central African countries for domestic servitude and

forced street vending

tier rating: Tier 2 Watch List - Cote d'Ivoire is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to eliminate trafficking in 2007, particularly with regard to its law enforcement efforts and protection of sex trafficking victims; in addition, Ivoirian law does not prohibit all forms of trafficking, and Cote d'Ivoire has not ratified the 2000 UN TIP Protocol (2008)

Illicit drugs:

illicit producer of cannabis, mostly for local consumption; utility as a narcotic transshipment point to Europe reduced by ongoing political instability; while rampant corruption and inadequate supervision leave the banking system vulnerable to money laundering, the lack of a developed financial system limits the country's utility as a major money-laundering center (2008)

Introduction ::

Background:

The lands that today comprise Croatia were part of the Austro-Hungarian Empire until the close of World War I. In 1918, the Croats, Serbs, and Slovenes formed a kingdom known after 1929 as Yugoslavia. Following World War II, Yugoslavia became a federal independent Communist state under the strong hand of Marshal TITO. Although Croatia declared its independence from Yugoslavia in 1991, it took four years of sporadic, but often bitter, fighting before

occupying Serb armies were mostly cleared from Croatian lands. Under UN supervision, the last Serb-held enclave in eastern Slavonia was returned to Croatia in 1998. In April 2009, Croatia joined NATO; it is a candidate for eventual EU accession.

Economy ::

Economy - overview:

Once one of the wealthiest of the Yugoslav republics, Croatia's

economy suffered badly during the 1991-95 war as output collapsed and the country missed the early waves of investment in Central and Eastern Europe that followed the fall of the Berlin Wall. Between 2000 and 2007, however, Croatia's economic fortunes began to improve slowly, with moderate but steady GDP growth between 4% and 6% led by a rebound in tourism and credit-driven consumer spending. Inflation over the same period has remained tame and the currency, the kuna, stable. Nevertheless, difficult problems still remain, including a stubbornly high unemployment rate, a growing trade deficit and uneven regional development. The state retains a large role in the economy, as privatization efforts often meet stiff public and political resistance. While macroeconomic stabilization has largely been achieved, structural reforms lag because of deep resistance on the part of the public and lack of strong support from politicians. The EU accession process should accelerate fiscal and structural reform. While long term growth prospects for the economy remain strong, Croatia will face significant pressure as a result of the global financial crisis. Croatia's high foreign debt, anemic export sector, strained state budget, and over-reliance on tourism revenue will result in higher risk to economic stability over the medium term.

Transnational Issues ::

Disputes - international:

dispute remains with Bosnia and Herzegovina over several small sections of the boundary related to maritime access that hinders ratification of the 1999 border agreement; the Croatia-Slovenia land and maritime boundary agreement, which would have ceded most of Pirin Bay and maritime access to Slovenia and several villages to Croatia, remains unratified and in dispute; Slovenia also protests Croatia's 2003 claim to an exclusive economic zone in the Adriatic; as a European Union peripheral state, Slovenia imposed a hard border Schengen regime with non-member Croatia in December 2007

Refugees and internally displaced persons:

IDPs: 2,900-7,000 (Croats and Serbs displaced in 1992-95 war) (2007)

Illicit drugs:

transit point along the Balkan route for Southwest Asian heroin to Western Europe; has been used as a transit point for maritime shipments of South American cocaine bound for Western Europe (2008)

Introduction ::

Background:

The native Amerindian population of Cuba began to decline after the European discovery of the island by Christopher COLUMBUS in 1492 and following its development as a Spanish colony during the next several centuries. Large numbers of African slaves were imported to work the coffee and sugar plantations, and Havana became the launching point for the annual treasure fleets bound for Spain from Mexico and Peru. Spanish rule eventually provoked an independence movement and occasional rebellions that were harshly suppressed. US intervention during the Spanish-American War in 1898 assisted the Cubans in overthrowing Spanish rule. The Treaty of Paris established Cuban independence from the US in 1902 after which the island experienced a string of governments mostly dominated by the military and corrupt politicians. Fidel CASTRO led a rebel army to victory in

1959; his iron rule held the subsequent regime together for nearly five decades. He stepped down as president in February 2008 in favor of his younger brother Raul CASTRO. Cuba's Communist revolution, with Soviet support, was exported throughout Latin America and Africa during the 1960s, 1970s, and 1980s. The country faced a severe economic downturn in 1990 following the withdrawal of former Soviet subsidies worth \$4 billion to \$6 billion annually. Cuba at times portrays the US embargo, in place since 1961, as the source of its difficulties. Illicit migration to the US - using homemade rafts, alien smugglers, air flights, or via the southwest border - is a continuing problem. The US Coast Guard intercepted 982 individuals attempting to cross the Straits of Florida in fiscal year 2009.

Economy ::

Economy - overview:

The government continues to balance the need for economic loosening against a desire for firm political control. The government announced it would eliminate 500,000 state jobs by March 2011 and has expanded opportunities for self-employment. President CASTRO said such changes were needed to update the economic model to ensure the survival of socialism. It has rolled back limited reforms undertaken in the 1990s to increase enterprise efficiency and alleviate serious shortages of food, consumer goods, and services. The average Cuban's standard of living remains at a lower level than before the downturn of the 1990s, which was caused by the loss of Soviet aid and domestic inefficiencies. Since late 2000, Venezuela has been providing oil on preferential terms, and it currently supplies about 100,000 barrels per day of petroleum products. Cuba has been paying for the oil, in part, with the services of Cuban personnel in Venezuela including some 30,000 medical professionals.

Military - note:

the collapse of the Soviet Union deprived the Cuban military of its major economic and logistic support and had a significant impact on the state of Cuban equipment; the army remains well trained and professional in nature; while the lack of replacement parts for its existing equipment has increasingly affected operational capabilities, Cuba remains able to offer considerable resistance to any regional power

(2010)

Transnational Issues ::

Disputes - international:

US Naval Base at Guantanamo Bay is leased to US and only mutual agreement or US abandonment of the facility can terminate the lease

Trafficking in persons:

current situation: Cuba is principally a source country for children subjected to trafficking in persons, specifically commercial sexual exploitation within the country; the scope of trafficking within Cuba is difficult to gauge due to the closed nature of the government and sparse non-governmental or independent reporting

tier rating: Tier 3 - Cuba does not fully comply with the minimum

standards for the elimination of trafficking and is not making significant efforts to do so; in a positive step, the Government of Cuba shared information about human trafficking and its efforts to address the issue; the government did not prohibit all forms of trafficking during the reporting period, nor did it provide specific evidence that it prosecuted and punished trafficking offenders, protected victims of all forms of trafficking, or implemented victim protection policies or programs to prevent human trafficking (2010)

Illicit drugs:

territorial waters and air space serve as transshipment zone for US- and European-bound drugs; established the death penalty for certain drug-related crimes in 1999 (2008)

Curacao

>

Introduction ::

Background:

Originally settled by Arawak Indians, Curacao was seized by the Dutch in 1634 along with the neighboring island of Bonaire. Once the center of the Caribbean slave trade, Curacao was hard hit by the abolition of slavery in 1863. Its prosperity (and that of neighboring Aruba) was restored in the early 20th century with the construction of the Isla Refineria to service the newly discovered Venezuelan oil fields. In 1954, Curacao and several other Dutch Caribbean possessions were

reorganized as the Netherlands Antilles, part of the Kingdom of the Netherlands. In referenda in 2005 and 2009, the citizens of Curacao voted to become a self-governing country within the Kingdom of the Netherlands. The change in status became effective in October of 2010 with the dissolution of the Netherlands Antilles.

Economy ::

Economy - overview:

Tourism, petroleum refining, and offshore finance are the mainstays of

this small economy, which is closely tied to the outside world. Although GDP grew slightly during the past decade, the island enjoys a high per capita income and a well-developed infrastructure compared with other countries in the region. Curacao has an excellent natural harbor that can accommodate large oil tankers. The Venezuelan state oil company leases the single refinery on the island from the government; most of the oil for the refinery is imported from Venezuela; most of the refined products are exported to the US. Almost all consumer and capital goods are imported, with the US, Brazil, Italy, and Mexico being the major suppliers. The government is attempting to diversify its industry and trade and has signed an Association Agreement with the EU to expand business there. Poor soils and inadequate water supplies hamper the development of agriculture. Budgetary problems complicate reform of the health and pension systems for an aging population.

Cyprus

(map)

Introduction ::

Background:

A former British colony, Cyprus became independent in 1960 following years of resistance to British rule. Tensions between the Greek Cypriot majority and Turkish Cypriot minority came to a head in December 1963, when violence broke out in the capital of Nicosia. Despite the deployment of UN peacekeepers in 1964, sporadic intercommunal violence continued forcing most Turkish Cypriots into enclaves throughout the island. In 1974, a Greek Government-sponsored attempt to seize control of Cyprus was met by military intervention from Turkey, which soon controlled more than a third of the island. In 1983, the Turkish Cypriot-occupied area declared itself the "Turkish Republic of Northern Cyprus" ("TRNC"), but it is recognized only by Turkey. The election of a new Cypriot president in 2008 served as the impetus for the UN to encourage both the Turkish

and Cypriot Governments to reopen unification negotiations. In September 2008, the leaders of the Greek Cypriot and Turkish Cypriot communities started negotiations under UN auspices aimed at reuniting the divided island. The entire island entered the EU on 1 May 2004, although the EU acquis - the body of common rights and obligations - applies only to the areas under the internationally recognized government, and is suspended in the areas administered by Turkish Cypriots. However, individual Turkish Cypriots able to document their eligibility for Republic of Cyprus citizenship legally enjoy the same rights accorded to other citizens of European Union states.

Flag description:

white with a copper-colored silhouette of the island (the name Cyprus is derived from the Greek word for copper) above two green crossed olive branches in the center of the flag; the branches symbolize the hope for peace and reconciliation between the Greek and Turkish communities

note: the "Turkish Republic of Northern Cyprus" flag retains the white field of the Cyprus national flag but displays narrow horizontal red stripes positioned a small distance from the top and bottom edges between which are centered a red crescent and a red five-pointed star; the banner is modeled after the Turkish national flag but with the colors reversed

National anthem:

name: "Ymnos eis tin Eleftherian" (Hymn to Liberty)

lyrics/music: Dionysios SOLOMOS/Nikolaos MANTZAROS

note: adopted 1960; Cyprus adopted the Greek national anthem as its own; the Turkish community in Cyprus uses the anthem of Turkey

Economy ::

Economy - overview:

The area of the Republic of Cyprus under government control has a market economy dominated by the service sector, which accounts for nearly four-fifths of GDP. Tourism, financial services, and real estate are the most important sectors. Erratic growth rates over the past decade reflect the economy's reliance on tourism, which often fluctuates with political instability in the region and economic conditions in Western Europe. Nevertheless, the economy in the area under government control has grown at a rate well above the EU average since 2000. Cyprus joined the European Exchange Rate Mechanism (ERM2) in May 2005 and adopted the euro as its national currency on 1 January 2008. An aggressive austerity program in the preceding years, aimed at paving the way for the euro, helped turn a soaring fiscal deficit (6.3% in 2003) into a surplus of 1.2% in 2008, and reduced inflation to 4.7%. This prosperity came under pressure in 2009, as construction and tourism slowed in the face of reduced foreign demand triggered by the ongoing global financial crisis. Although Cyprus lagged its EU peers in showing signs of stress from the global crisis, the economy tipped into recession in mid 2009 and contracted 1.8% for the year. In addition, the budget deficit is on the rise and reached 5.7% of GDP in 2010, a violation of the EU's budget deficit criteria of no more than 3% of GDP. In response to the country's deteriorating finances, Nicosia is promising to implement measures to cut the cost of the state payroll, curb tax evasion, and revamp social benefits. However, it has been slow to act, lacking a consensus in parliament and among the social partners for its proposed measures.

Economy of the area administered by Turkish Cypriots:

Economy - overview: The Turkish Cypriot economy has roughly half the per capita GDP of the south, and economic growth tends to be volatile, given the north's relative isolation, bloated public sector, reliance on the Turkish lira, and small market size. Agriculture and services, together, employ more than half of the work force. The Turkish Cypriot economy grew around 10.6% in 2006, fueled by growth in the construction and education sectors, as well as increased employment of Turkish Cypriots in the area under government control. GDP declined about 2.0% in 2007. The Turkish Cypriots are heavily dependent on transfers from the Turkish Government. Ankara directly finances about one-third of the "TRNC's" budget. Aid from Turkey has exceeded \$400 million annually in recent years. The

Turkish Cypriot economy experienced a sharp slowdown in 2008-09 due to the global financial crisis and, because of its reliance on British and Turkish tourism, which has declined due to the recession. Turkish Cypriot finances also deteriorated in 2009 as decreased state revenues and increased government expenditures on public sector salaries and social services led to a large budget deficit. As tourism and the world economy picked up, the economy grew about 0.6% in 2010.

Transnational Issues ::

Disputes - international:

hostilities in 1974 divided the island into two de facto autonomous entities, the internationally recognized Cypriot Government and a Turkish-Cypriot community (north Cyprus); the 1,000-strong UN Peacekeeping Force in Cyprus (UNFICYP) has served in Cyprus since 1964 and maintains the buffer zone between north and south; on 1 May 2004, Cyprus entered the European Union still divided, with the EU's body of legislation and standards (*acquis communautaire*) suspended in the north; Turkey protests Cypriot Government creating hydrocarbon blocks and maritime boundary with Lebanon in March 2007

Refugees and internally displaced persons:

IDPs: 210,000 (both Turkish and Greek Cypriots; many displaced for over 30 years) (2007)

Illicit drugs:

minor transit point for heroin and hashish via air routes and container traffic to Europe, especially from Lebanon and Turkey; some cocaine transits as well; despite a strengthening of anti-money-laundering legislation, remains vulnerable to money laundering; reporting of suspicious transactions in offshore sector remains weak (2008)

Czech Republic

Introduction ::

Background:

Following the First World War, the closely related Czechs and Slovaks of the former Austro-Hungarian Empire merged to form Czechoslovakia. During the interwar years, the new country's leaders were frequently preoccupied with meeting the demands of other ethnic minorities within the republic, most notably the Sudeten Germans and the Ruthenians (Ukrainians). After World War II, a truncated Czechoslovakia fell within the Soviet sphere of influence. In

1968, an invasion by Warsaw Pact troops ended the efforts of the country's leaders to liberalize Communist party rule and create "socialism with a human face." Anti-Soviet demonstrations the following year ushered in a period of harsh repression. With the collapse of Soviet authority in 1989, Czechoslovakia regained its freedom through a peaceful "Velvet Revolution." On 1 January 1993, the country underwent a "velvet divorce" into its two national components, the Czech Republic and Slovakia. The Czech Republic joined NATO in 1999 and the European Union in 2004.

Economy ::

Economy - overview:

The Czech Republic is one of the most stable and prosperous of the post-Communist states of Central and Eastern Europe. Maintaining an open investment climate has been a key element of the Czech Republic's transition from a communist, centrally planned economy to a functioning market economy. As a member of the European Union,

with an advantageous location in the center of Europe, a relatively low cost structure, and a well-qualified labor force, the Czech Republic is an attractive destination for foreign investment. Prior to its EU accession in 2004, the Czech government harmonized its laws and regulations with those of the European Union. The small, open, export-driven Czech economy grew by over 6% annually from 2005-2007 and by 2.5% in 2008. The conservative Czech financial system has remained relatively healthy throughout 2009.

Nevertheless, the real economy contracted by 4.1% in 2009, mainly due to a significant drop in external demand as the Czech Republic's main export markets fell into recession. GDP is expected to grow by 2.4% in 2010, driven largely by a rebound in external demand, particularly from Germany.

Introduction ::

Background:

Once the seat of Viking raiders and later a major north European power, Denmark has evolved into a modern, prosperous nation that is participating in the general political and economic integration of Europe. It joined NATO in 1949 and the EEC (now the EU) in 1973. However, the country has opted out of certain elements of the European Union's Maastricht Treaty, including the European Economic and Monetary Union (EMU), European defense cooperation,

and issues concerning certain justice and home affairs.

Flag description:

red with a white cross that extends to the edges of the flag; the vertical part of the cross is shifted to the hoist side; the banner is referred to as the Dannebrog (Danish flag) and is one of the oldest national flags in the world; traditions as to the origin of the flag design vary, but the best known is a legend that the banner fell from the sky during an early-13th century battle; caught up by the Danish king before it ever touched the earth, this heavenly talisman inspired the royal army to victory; in actuality, the flag may derive from a crusade banner or ensign

note: the shifted design element was subsequently adopted by the other Nordic countries of Finland, Iceland, Norway, and Sweden

National anthem:

name: "Der er et yndigt land" (There is a Lovely Land); "Kong Christian" (King Christian)

lyrics/music: Adam Gottlob OEHLenschlager/Hans Ernst KROYER; Johannes EWALD/unknown

note: Denmark has two national anthems with equal status; "Der er et yndigt land," adopted 1844, is a national anthem, while "Kong

Christian," adopted 1780, serves as both a national and royal anthem; "Kong Christian" is also known as "Kong Christian stod ved højen mast" (King Christian Stood by the Lofty Mast) and "Kongesangen" (The King's Anthem); within Denmark, the royal anthem is played only when royalty is present and is usually followed by the national anthem; when royalty is not present, only the national anthem is performed; outside Denmark, the royal anthem is played, unless the national anthem is requested

Economy ::

Economy - overview:

This thoroughly modern market economy features a high-tech agricultural sector, state-of-the-art industry with world-leading firms in pharmaceuticals, maritime shipping and renewable energy, and a high dependence on foreign trade. The Danish economy is also characterized by extensive government welfare measures, an equitable distribution of income, and comfortable living standards. Denmark is a net exporter of food and energy and enjoys a comfortable balance of payments surplus. After a long consumption-driven upswing, Denmark's economy began slowing in 2007 with the end of a housing boom. Housing prices dropped markedly in 2008-09. The global financial crisis has exacerbated this cyclical slowdown through increased borrowing costs and lower export demand, consumer confidence, and investment. The global financial crises cut Danish GDP by 0.9% in 2008 and 4.7% in 2009. Historically low levels of unemployment rose sharply with the recession but remain below 5%, about half the level of the EU. Denmark made a modest recovery in 2010 in part because of increased government spending. An impending decline in the ratio of workers to retirees will be a major long-term issue. Denmark maintained a healthy budget surplus for many years up to 2008, but the budget balance swung into deficit during 2009-10. Nonetheless, Denmark's fiscal position remains among the strongest in the EU. Despite previously meeting the criteria to join the European Economic and Monetary Union (EMU), so far Denmark has decided not to join, although the Danish krone remains pegged to the euro.

Djibouti

Introduction ::

Background:

The French Territory of the Afars and the Issas became Djibouti in 1977. Hassan Gouled APTIDON installed an authoritarian one-party state and proceeded to serve as president until 1999. Unrest among the Afars minority during the 1990s led to a civil war that ended in 2001 following the conclusion of a peace accord between Afar rebels and the Issa-dominated government. In 1999, Djibouti's first multi-party presidential elections resulted in the election of Ismail Omar GUELLEH; he was re-elected to a second term in 2005. Djibouti

occupies a strategic geographic location at the mouth of the Red Sea and serves as an important transshipment location for goods entering and leaving the east African highlands. The present leadership favors close ties to France, which maintains a significant military presence in the country but also has strong ties with the US. Djibouti hosts the only US military base in sub-Saharan Africa and is a front-line state in the global war on terrorism.

Economy ::

Economy - overview:

The economy is based on service activities connected with the country's strategic location and status as a free trade zone in the Horn of Africa. Two-thirds of Djibouti's inhabitants live in the capital city; the remainder are mostly nomadic herders. Scanty rainfall limits crop production to fruits and vegetables, and most food must be imported. Djibouti provides services as both a transit port for the region and an international transshipment and refueling center. Imports and exports from landlocked neighbor Ethiopia represent 70% of port activity at Djibouti's container terminal. Djibouti has few natural resources and little industry. The nation is, therefore, heavily dependent on foreign assistance to help support its balance of payments and to finance development projects. An unemployment rate of nearly 60% in urban areas continues to be a major problem. While inflation is not a concern, due to the fixed tie of the Djiboutian franc to the US dollar, the artificially high value of the Djiboutian franc adversely affects Djibouti's balance of payments. Per capita consumption dropped an estimated 35% between 1999 and 2006 because of recession, civil war, and a high population growth rate (including immigrants and refugees). Djibouti has experienced relatively minimal impact from the global economic downturn, but its reliance on diesel-generated electricity and imported food leave average consumers vulnerable to global price shocks.

Introduction ::

Background:

Dominica was the last of the Caribbean islands to be colonized by Europeans due chiefly to the fierce resistance of the native Caribs. France ceded possession to Great Britain in 1763, which made the island a colony in 1805. In 1980, two years after independence, Dominica's fortunes improved when a corrupt and tyrannical administration was replaced by that of Mary Eugenia CHARLES, the first female prime minister in the Caribbean, who remained in office

for 15 years. Some 3,000 Carib Indians still living on Dominica are the only pre-Columbian population remaining in the eastern Caribbean.

Economy ::

Economy - overview:

The Dominican economy has been dependent on agriculture - primarily bananas - in years past, but increasingly has been driven by tourism as the government seeks to promote Dominica as an "ecotourism" destination. In order to diversify the island's production base, the government also is attempting to develop an offshore financial sector and has signed an agreement with the EU to develop geothermal energy resources. In 2003, the government began a comprehensive restructuring of the economy - including elimination of price controls, privatization of the state banana company, and tax increases - to address an economic and financial crisis and to meet IMF requirements. This restructuring paved the way for an economic recovery - real growth for 2006 reached a two-decade high - and

helped to reduce the debt burden, which remains at about 85% of GDP. Hurricane Dean struck the island in August 2007 causing damages equivalent to 20% of GDP. In 2009, growth slowed as a result of the global recession; it picked up only slightly in 2010.

Dominican Republic

Introduction ::

Background:

Explored and claimed by Christopher COLUMBUS on his first voyage in 1492, the island of Hispaniola became a springboard for Spanish conquest of the Caribbean and the American mainland. In 1697, Spain recognized French dominion over the western third of the island, which in 1804 became Haiti. The remainder of the island, by then known as Santo Domingo, sought to gain its own independence in 1821 but was conquered and ruled by the Haitians for 22 years; it

finally attained independence as the Dominican Republic in 1844. In 1861, the Dominicans voluntarily returned to the Spanish Empire, but two years later they launched a war that restored independence in 1865. A legacy of unsettled, mostly non-representative rule followed, capped by the dictatorship of Rafael Leonidas TRUJILLO from 1930-61. Juan BOSCH was elected president in 1962 but was deposed in a military coup in 1963. In 1965, the United States led an intervention in the midst of a civil war sparked by an uprising to restore BOSCH. In 1966, Joaquin BALAGUER defeated BOSCH in an election to become president. BALAGUER maintained a tight grip on power for most of the next 30 years when international reaction to flawed elections forced him to curtail his term in 1996. Since then, regular competitive elections have been held in which opposition candidates have won the presidency. Former President (1996-2000) Leonel FERNANDEZ Reyna won election to a new term in 2004 following a constitutional amendment allowing presidents to serve more than one term, and was since reelected to a second consecutive term.

Flag description:

a centered white cross that extends to the edges divides the flag into four rectangles - the top ones are blue (hoist side) and red, and the bottom ones are red (hoist side) and blue; a small coat of arms featuring a shield supported by a laurel branch (left) and a palm branch (right) is at the center of the cross; above the shield a blue ribbon displays the motto, DIOS, PATRIA, LIBERTAD (God, Fatherland, Liberty), and below the shield, REPUBLICA DOMINICANA appears on a red ribbon; in the shield a bible is opened to a verse that reads "Y la verdad nos hara libre" (And the truth shall set you free); blue stands for liberty, white for salvation, and red for the blood of heroes

National anthem:

name: "Himno Nacional" (National Anthem)

lyrics/music: Emilio PRUD"HOMME/Jose REYES

note: adopted 1934; also known as "Quisqueyanos valientes" (Valient Sons of Quisqueye); the anthem never refers to the people as Dominican but rather calls them "Quisqueyanos," a reference to the indigenous name of the island

Economy ::

Economy - overview:

The Dominican Republic has long been viewed primarily as an exporter of sugar, coffee, and tobacco, but in recent years the service sector has overtaken agriculture as the economy's largest employer, due to growth in tourism and free trade zones. The economy is highly dependent upon the US, the destination for nearly 60% of exports. Remittances from the US amount to about a tenth of GDP, equivalent to almost half of exports and three-quarters of tourism receipts. The country suffers from marked income inequality; the poorest half of the population receives less than one-fifth of GDP, while the richest 10% enjoys nearly 40% of GDP. High unemployment and underemployment remains an important long-term challenge. The Central America-Dominican Republic Free Trade Agreement (CAFTA-DR) came into force in March 2007, boosting investment and exports and reducing losses to the Asian garment industry. The growth of the Dominican Republic's economy slowed in 2008-09 because of the global recession, but still remained one of the fastest growing in the region.

Transnational Issues ::

Disputes - international:

Haitian migrants cross the porous border into the Dominican Republic to find work; illegal migrants from the Dominican Republic cross the Mona Passage each year to Puerto Rico to find better work

Trafficking in persons:

current situation: the Dominican Republic is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; a large number of Dominican women are trafficked into prostitution and sexual exploitation in Western Europe, Australia, Central and South America, and Caribbean destinations; a significant number of women, boys, and girls are trafficked within the country for sexual exploitation and domestic servitude

tier rating: Tier 3 - for its failure to show evidence of increasing efforts to combat human trafficking, particularly in terms of not adequately investigating and prosecuting public officials who may be complicit

with trafficking activity, and inadequate government efforts to protect trafficking victims; the government has taken measures to reduce demand for commercial sex acts with children through criminal prosecutions (2008)

Illicit drugs:

transshipment point for South American drugs destined for the US and Europe; has become a transshipment point for ecstasy from the Netherlands and Belgium destined for US and Canada; substantial money laundering activity in particular by Colombian narcotics traffickers; significant amphetamine consumption

Ecuador

Introduction ::

Background:

What is now Ecuador formed part of the northern Inca Empire until the Spanish conquest in 1533. Quito became a seat of Spanish colonial government in 1563 and part of the Viceroyalty of New Granada in 1717. The territories of the Viceroyalty - New Granada (Colombia), Venezuela, and Quito - gained their independence between 1819 and 1822 and formed a federation known as Gran Colombia. When Quito withdrew in 1830, the traditional name was changed in favor of the

"Republic of the Equator." Between 1904 and 1942, Ecuador lost territories in a series of conflicts with its neighbors. A border war with Peru that flared in 1995 was resolved in 1999. Although Ecuador marked 30 years of civilian governance in 2004, the period has been marred by political instability. Protests in Quito contributed to the mid-term ouster of three of Ecuador's last four democratically elected Presidents. In September 2008, voters approved a new constitution; Ecuador's twentieth since gaining independence. General elections, under the new constitutional framework, were held in April 2009, and voters re-elected President Rafael CORREA.

three horizontal bands of yellow (top, double width), blue, and red with the coat of arms superimposed at the center of the flag; the flag retains the three main colors of the banner of Gran Columbia, the South American republic that broke up in 1830; the yellow color

represents sunshine, grain, and mineral wealth, blue the sky, sea, and rivers, and red the blood of patriots spilled in the struggle for freedom and justice

note: similar to the flag of Colombia, which is shorter and does not bear a coat of arms

National anthem:

name: "Salve, Oh Patria!" (We Salute You Our Homeland)

lyrics/music: Juan Leon MERA/Antonio NEUMANE

note: adopted 1948; Juan Leon MERA wrote the lyrics in 1865; only the chorus and second verse are sung

Economy ::

Economy - overview:

Ecuador is substantially dependent on its petroleum resources, which have accounted for more than half of the country's export earnings and one-fourth of public sector revenues in recent years. In 1999/2000, Ecuador suffered a severe economic crisis, with GDP contracting by more than 6%. Poverty increased significantly, the banking system collapsed, and Ecuador defaulted on its external debt later that year. In March 2000, the Congress approved a series of structural reforms that also provided for the adoption of the US dollar as legal tender. Dollarization stabilized the economy, and positive growth returned in the years that followed, helped by high oil prices, remittances, and increased non-traditional exports. From 2002-06 the economy grew 5.5%, the highest five-year average in 25 years. After moderate growth in 2007, the economy reached a growth rate of 7.2% in 2008, in large part due to high global petroleum prices. President Rafael CORREA, who took office in January 2007, defaulted on Ecuador's sovereign debt in December 2008, refusing to make payment on \$3.2 billion in international bonds, representing over 80% of Ecuador's private external debt. Economic policies under the CORREA administration - including an announcement in late 2009 terminating 13 bilateral investment treaties - have generated economic uncertainty and discouraged private investment. The Ecuadorian economy slowed to 0.4% growth in 2009 due to the global financial crisis, and the sharp decline in world oil prices and remittance flows, but picked up to a 2.4% growth rate in 2010.

Introduction ::

Background:

The regularity and richness of the annual Nile River flood, coupled with semi-isolation provided by deserts to the east and west, allowed for the development of one of the world's great civilizations. A unified kingdom arose circa 3200 B.C., and a series of dynasties ruled in Egypt for the next three millennia. The last native dynasty fell to the Persians in 341 B.C., who in turn were replaced by the Greeks, Romans, and Byzantines. It was the Arabs who introduced Islam and

the Arabic language in the 7th century and who ruled for the next six centuries. A local military caste, the Mamluks took control about 1250 and continued to govern after the conquest of Egypt by the Ottoman Turks in 1517. Following the completion of the Suez Canal in 1869, Egypt became an important world transportation hub, but also fell heavily into debt. Ostensibly to protect its investments, Britain seized control of Egypt's government in 1882, but nominal allegiance to the Ottoman Empire continued until 1914. Partially independent from the UK in 1922, Egypt acquired full sovereignty with the overthrow of the British-backed monarchy in 1952. The completion of the Aswan High Dam in 1971 and the resultant Lake Nasser have altered the time-honored place of the Nile River in the agriculture and ecology of Egypt. A rapidly growing population (the largest in the Arab world), limited arable land, and dependence on the Nile all continue to overtax resources and stress society. The government has struggled to meet the demands of Egypt's growing population through economic reform and massive investment in communications and physical infrastructure.

Flag description:

three equal horizontal bands of red (top), white, and black; the national emblem (a gold Eagle of Saladin facing the hoist side with a shield superimposed on its chest above a scroll bearing the name of the country in Arabic) centered in the white band; the band colors derive from the Arab Liberation flag and represent oppression (black), overcome through bloody struggle (red), to be replaced by a bright future (white)

note: similar to the flag of Syria, which has two green stars in the white band, Iraq, which has an Arabic inscription centered in the white band, and Yemen, which has a plain white band

National anthem:

name: "Bilady, Bilady, Bilady" (My Homeland, My Homeland, My Homeland)

lyrics/music: Younis-al QADI/Sayed DARWISH

note: adopted 1979; after the signing of the 1979 peace with Israel,

Egypt sought to create an anthem less militaristic than its previous one; Sayed DARWISH, commonly considered the father of modern Egyptian music, composed the anthem

Economy ::

Economy - overview:

Occupying the northeast corner of the African continent, Egypt is bisected by the highly fertile Nile valley, where most economic activity takes place. Egypt's economy was highly centralized during the rule of former President Gamal Abdel NASSER but has opened up considerably under former President Anwar EL-SADAT and current President Mohamed Hosni MUBARAK. Cairo from 2004 to 2008 aggressively pursued economic reforms to attract foreign investment and facilitate GDP growth. The global financial crisis has slowed the reform efforts. The budget deficit climbed to over 8% of GDP and Egypt's GDP growth slowed to 4.6% in 2009, predominately due to reduced growth in export-oriented sectors, including manufacturing and tourism, and Suez Canal revenues. In 2010, the government spent more on infrastructure and public projects, and exports drove GDP growth to more than 5%, but GDP growth in 2011 is unlikely to bounce back to pre-global financial recession levels, when it stood at 7%. Despite the relatively high levels of economic growth over the past few years, living conditions for the average Egyptian remain poor.

Introduction ::

Background:

El Salvador achieved independence from Spain in 1821 and from the Central American Federation in 1839. A 12-year civil war, which cost about 75,000 lives, was brought to a close in 1992 when the government and leftist rebels signed a treaty that provided for military and political reforms.

name: "Himno Nacional de El Salvador" (National Anthem of El Salvador)

lyrics/music: Juan Jose CANAS/Juan ABERLE

note: officially adopted 1953, in use since 1879; the anthem of El Salvador is one of the world's longest

Economy ::

Economy - overview:

Despite being the smallest country geographically in Central America, El Salvador has the third largest economy in the region. The economy took a hit from the global recession and real GDP contracted by 3.5%

in 2009. The economy began a slow recovery in 2010 on the back of improved export and remittances figures. Remittances accounted for 16% of GDP in 2009, and about a third of all households receive these transfers. In 2006 El Salvador was the first country to ratify the Dominican Republic-Central American Free Trade Agreement (CAFTA-DR), which has bolstered the export of processed foods, sugar, and ethanol, and supported investment in the apparel sector amid increased Asian competition and the expiration of the Multi-Fiber Agreement in 2005. El Salvador has promoted an open trade and investment environment, and has embarked on a wave of privatizations extending to telecom, electricity distribution, banking, and pension funds. In late 2006, the government and the Millennium Challenge Corporation signed a five-year, \$461 million compact to stimulate economic growth and reduce poverty in the country's northern region, the primary conflict zone during the civil war, through investments in education, public services, enterprise development, and transportation infrastructure. With the adoption of the US dollar as its currency in 2001, El Salvador lost control over monetary policy. Any counter-cyclical policy response to the downturn must be through fiscal policy, which is constrained by legislative requirements for a two-thirds majority to approve any international financing.

Equatorial Guinea

Introduction ::

Background:

Equatorial Guinea gained independence in 1968 after 190 years of Spanish rule. This tiny country, composed of a mainland portion plus five inhabited islands, is one of the smallest on the African continent. President Teodoro OBIANG NGUEMA MBASOGO has ruled the country since 1979 when he seized power in a coup. Although nominally a constitutional democracy since 1991, the 1996, 2002, and 2009 presidential elections - as well as the 1999 and 2004 legislative

elections - were widely seen as flawed. The president exerts almost total control over the political system and has discouraged political opposition. Equatorial Guinea has experienced rapid economic growth due to the discovery of large offshore oil reserves, and in the last decade has become Sub-Saharan Africa's third largest oil exporter. Despite the country's economic windfall from oil production resulting in a massive increase in government revenue in recent years, there have been few improvements in the population's living standards.

Economy ::

Economy - overview:

The discovery and exploitation of large oil reserves have contributed to dramatic economic growth but fluctuating oil prices have produced huge swings in GDP growth in recent years. Forestry, farming, and fishing are also major components of GDP. Subsistence farming is the dominate form of livelihood. Although pre-independence Equatorial Guinea counted on cocoa production for hard currency earnings, the neglect of the rural economy under successive regimes has diminished potential for agriculture-led growth (the government has stated its intention to reinvest some oil revenue into agriculture). A number of aid programs sponsored by the World Bank and the IMF have been cut off since 1993 because of corruption and mismanagement.

Government officials and their family members own most businesses, but corruption is rampant. Undeveloped natural resources include titanium, iron ore, manganese, uranium, and alluvial gold. Growth remained strong in 2008, led by oil, but dropped in 2009-10, as the price of oil fell.

Transnational Issues ::

Disputes - international:

in 2002, ICJ ruled on an equidistance settlement of Cameroon-Equatorial Guinea-Nigeria maritime boundary in the Gulf of Guinea, but a dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River and imprecisely defined maritime coordinates in the ICJ decision delay final delimitation; UN urges Equatorial Guinea and Gabon to resolve the sovereignty dispute over

Gabon-occupied Mbane and lesser islands and to create a maritime boundary in the hydrocarbon-rich Corisco Bay

Trafficking in persons:

current situation: Equatorial Guinea is primarily a destination country for children trafficked for the purpose of forced labor and possibly for the purpose of sexual exploitation; children have been trafficked from nearby countries for domestic servitude, market labor, ambulant vending, and possibly sexual exploitation; women may also be trafficked to Equatorial Guinea from Cameroon, Benin, other neighboring countries, and China for sexual exploitation

tier rating: Tier 2 Watch List - Equatorial Guinea is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to eliminate trafficking, particularly in the areas of prosecuting and convicting trafficking offenders and failing to formalize mechanisms to provide assistance to victims; although the government made some effort to enforce laws against child labor exploitation, it failed to report any trafficking prosecutions or convictions in 2007; the government continued to lack shelters or formal procedures for providing care to victims (2008)

Eritrea

Introduction ::

Background:

The UN awarded Eritrea to Ethiopia in 1952 as part of a federation. Ethiopia's annexation of Eritrea as a province 10 years later sparked a 30-year struggle for independence that ended in 1991 with Eritrean rebels defeating governmental forces; independence was overwhelmingly approved in a 1993 referendum. A two-and-a-half-year border war with Ethiopia that erupted in 1998 ended under UN auspices in December 2000. Eritrea hosted a UN peacekeeping

operation that monitored a 25 km-wide Temporary Security Zone (TSZ) on the border with Ethiopia. Eritrea's denial of fuel to the mission caused the UN to withdraw the mission and terminate its mandate 31 July 2008. An international commission, organized to resolve the border dispute, posted its findings in 2002. However, both parties have been unable to reach agreement on implementing the decision. On 30 November 2007, the Eritrea-Ethiopia Boundary Commission remotely demarcated the border by coordinates and dissolved itself, leaving Ethiopia still occupying several tracts of disputed territory, including the town of Badme. Eritrea accepted the EEBC's "virtual demarcation" decision and called on Ethiopia to remove its troops from the TSZ that it states is Eritrean territory. Ethiopia has not accepted the virtual demarcation decision. In 2009 the UN imposed sanctions on Eritrea after accusing it of backing anti-Ethiopian Islamist insurgents in Somalia.

adopted on 23 May 1997, but has not yet been fully implemented

Legal system:

primary basis is the Ethiopian legal code of 1957 with revisions; new civil, commercial, and penal codes have not yet been promulgated; government also issues unilateral proclamations setting laws and policies; also relies on customary and post-independence-enacted laws and, for civil cases involving Muslims, Islamic law; has not accepted compulsory ICJ jurisdiction

Suffrage:

18 years of age; universal

Executive branch:

chief of state: President ISAIAS Afworki (since 8 June 1993); note - the president is both the chief of state and head of government and is head of the State Council and National Assembly

head of government: President ISAIAS Afworki (since 8 June 1993)

cabinet: State Council the collective executive authority; members appointed by the president

(For more information visit the World Leaders website)

elections: president elected by the National Assembly for a five-year term (eligible for a second term); the most recent and only election held on 8 June 1993 (next election date uncertain as the National

Assembly did not hold a presidential election in December 2001 as anticipated)

election results: ISAIAS Afworki elected president; percent of National Assembly vote - ISAIAS Afworki 95%, other 5%

Legislative branch:

unicameral National Assembly (150 seats; members elected by direct popular vote to serve five-year terms)

elections: in May 1997, following the adoption of the new constitution, 75 members of the PFDJ Central Committee (the old Central Committee of the EPLF), 60 members of the 527-member Constituent Assembly, which had been established in 1997 to discuss and ratify the new constitution, and 15 representatives of Eritreans living abroad were formed into a Transitional National Assembly to serve as the country's legislative body until countrywide elections to a National Assembly were held; although only 75 of 150 members of the Transitional National Assembly were elected, the constitution stipulates that once past the transition stage, all members of the National Assembly will be elected by secret ballot of all eligible voters; National Assembly elections scheduled for December 2001 were postponed indefinitely

Judicial branch:

High Court - regional, subregional, and village courts; also have military and special courts

Political parties and leaders:

People's Front for Democracy and Justice or PFDJ [ISAIAS Afworki] (the only party recognized by the government); note - a National Assembly committee drafted a law on political parties in January 2001, but the full National Assembly has yet to debate or vote on it

Political pressure groups and leaders:

Eritrean Democratic Party (EDP) [HAGOS, Mesfin]; Eritrean Islamic Jihad or EIJ (includes Eritrean Islamic Jihad Movement or EIJM also known as the Abu Sihel Movement); Eritrean Islamic Salvation or EIS (also known as the Arafa Movement); Eritrean Liberation Front or ELF [ABDULLAH Muhammed]; Eritrean National Alliance or ENA (a coalition including EIJ, EIS, ELF, and a number of ELF factions) [HERUY Tedla Biru]; Eritrean Public Forum or EPF [ARADOM Iyob]

Flag description:

red isosceles triangle (based on the hoist side) dividing the flag into two right triangles; the upper triangle is green, the lower one is blue; a gold wreath encircling a gold olive branch is centered on the hoist side of the red triangle; green stands for the country's agriculture economy, red signifies the blood shed in the fight for freedom, and blue symbolizes the bounty of the sea; the wreath-olive branch symbol is similar to that on the first flag of Eritrea from 1952; the shape of the red triangle broadly mimics the shape of the country

National anthem:

name: "Ertra, Ertra, Ertra" (Eritrea, Eritrea, Eritrea)

lyrics/music: SOLOMON Tsehaye Beraki/Isaac Abraham MEHAREZGI
and ARON Tekle Tesfatsion

note: adopted 1993; upon independence from Ethiopia in 1993, Eritrea
adopted its own national anthem

Economy ::

Economy - overview:

Since independence from Ethiopia in 1993, Eritrea has faced the economic problems of a small, desperately poor country, accentuated by the recent implementation of restrictive economic policies. Eritrea has a command economy under the control of the sole political party, the People's Front for Democracy and Justice (PFDJ). Like the economies of many African nations, a large share of the population - nearly 80% - is engaged in subsistence agriculture, but they produce only a small share of total output. Since the conclusion of the Ethiopian-Eritrea war in 2000, the government has maintained a firm grip on the economy, expanding the use of the military and party-owned businesses to complete Eritrea's development agenda. The government strictly controls the use of foreign currency by limiting access and availability. Few private enterprises remain in Eritrea. Eritrea's economy depends heavily on taxes paid by members of the diaspora. Erratic rainfall and the delayed demobilization of agriculturalists from the military continue to interfere with agricultural production, and Eritrea's recent harvests have been unable to meet the food needs of the country. The Government continues to place its hope for additional revenue on the development of several international mining projects. Despite difficulties for international companies in working with the Eritrean Government, a Canadian mining company signed a contract with the government in 2007 and began mineral extraction in 2010. Eritrea's economic future depends upon its ability to master social problems such as illiteracy, unemployment, and low skills, and more importantly, on the government's willingness to support a true market economy.

Transnational Issues ::

Disputes - international:

Eritrea and Ethiopia agreed to abide by 2002 Ethiopia-Eritrea Boundary Commission's (EEBC) delimitation decision but, neither party responded to the revised line detailed in the November 2006 EEBC Demarcation Statement; Sudan accuses Eritrea of supporting eastern Sudanese rebel groups; in 2008 Eritrean troops move across the border on Ras Doumera peninsula and occupy Doumera Island with undefined sovereignty in the Red Sea

Refugees and internally displaced persons:

IDPs: 32,000 (border war with Ethiopia from 1998-2000; most IDPs are near the central border region) (2007)

Trafficking in persons:

current situation: Eritrea is a source country for men, women, and children trafficked for the purposes of forced labor and commercial

sexual exploitation; each year, large numbers of migrant workers depart Eritrea in search of work, particularly in the Gulf States, where some likely become victims of forced labor, including in domestic servitude, or commercial sexual exploitation; thousands of Eritreans flee the country illegally, mostly to Sudan, Ethiopia, and Kenya where their illegal status makes them vulnerable to situations of human trafficking; the government remains complicit in conscripting children into military service

tier rating: Tier 3 - the Government of Eritrea does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the Eritrean government does not operate with transparency and published neither data nor statistics regarding its efforts to combat human trafficking; it did not respond to requests to provide information for this report; the government made no known progress in prosecuting and punishing trafficking crimes over the reporting period and did not appear to provide any significant assistance to victims of trafficking during the reporting period (2009)

Introduction ::

Background:

After centuries of Danish, Swedish, German, and Russian rule, Estonia attained independence in 1918. Forcibly incorporated into the USSR in 1940 - an action never recognized by the US - it regained its freedom in 1991 with the collapse of the Soviet Union. Since the last Russian troops left in 1994, Estonia has been free to promote economic and political ties with the West. It joined both NATO and the EU in the spring of 2004.

Economy ::

Economy - overview:

Estonia, a 2004 European Union entrant, has a modern market-based economy and one of the higher per capita income levels in Central Europe and the Baltic region. Estonia's successive governments have pursued a free market, pro-business economic agenda and have wavered little in their commitment to pro-market reforms. The current government has pursued relatively sound fiscal policies that have resulted in balanced budgets and very low public debt. The economy benefits from strong electronics and telecommunications sectors and strong trade ties with Finland, Sweden, and Germany. Tallinn's priority has been to sustain high growth rates - on average 8% per year from 2003 to 2007. Estonia's economy slowed down markedly

and fell sharply into recession in mid-2008, primarily as a result of an investment and consumption slump following the bursting of the real estate market bubble. GDP dropped nearly 15% in 2009, among the world's highest rates of contraction. A modest recovery began in 2010, but unemployment stands above 13%. Estonia adopted the euro in January 2011.

Transnational Issues ::

Disputes - international:

Russia recalled its signature to the 1996 technical border agreement with Estonia in 2005, rather than concede to Estonia's appending prepared a unilateral declaration referencing Soviet occupation and territorial losses; Russia demands better accommodation of Russian-speaking population in Estonia; Estonian citizen groups continue to press for realignment of the boundary based on the 1920 Tartu Peace Treaty that would bring the now divided ethnic Setu people and parts of the Narva region within Estonia; as a member state that forms part of the EU's external border, Estonia must implement the strict Schengen border rules with Russia

Illicit drugs:

growing producer of synthetic drugs; increasingly important transshipment zone for cannabis, cocaine, opiates, and synthetic drugs since joining the European Union and the Schengen Accord; potential money laundering related to organized crime and drug trafficking is a concern, as is possible use of the gambling sector to launder funds; major use of opiates and ecstasy

Introduction ::

Background:

Unique among African countries, the ancient Ethiopian monarchy maintained its freedom from colonial rule with the exception of a short-lived Italian occupation from 1936-41. In 1974, a military junta, the Derg, deposed Emperor Haile SELASSIE (who had ruled since 1930) and established a socialist state. Torn by bloody coups, uprisings, wide-scale drought, and massive refugee problems, the regime was finally toppled in 1991 by a coalition of rebel forces, the

Ethiopian People's Revolutionary Democratic Front (EPRDF). A constitution was adopted in 1994, and Ethiopia's first multiparty elections were held in 1995. A border war with Eritrea late in the 1990s ended with a peace treaty in December 2000. In November 2007, the Eritrea-Ethiopia Border Commission remotely demarcated the border by geographical coordinates, but final demarcation of the boundary on the ground is currently on hold because of Ethiopian objections to an international commission's finding requiring it to surrender territory considered sensitive to Ethiopia.

Economy ::

Economy - overview:

Ethiopia's poverty-stricken economy is based on agriculture, accounting for almost 45% of GDP, and 85% of total employment. The agricultural sector suffers from frequent drought and poor cultivation practices. Coffee is critical to the Ethiopian economy with exports of some \$350 million in 2006, but historically low prices have seen many farmers switching to qat to supplement income. Under Ethiopia's constitution, the state owns all land and provides long-term leases to the tenants; the system continues to hamper growth in the industrial sector as entrepreneurs are unable to use land as collateral

for loans. In November 2001, Ethiopia qualified for debt relief from the Highly Indebted Poor Countries (HIPC) initiative, and in December 2005 the IMF forgave Ethiopia's debt. The global economic downturn led to balance of payments pressures, partially alleviated by recent emergency funding from the IMF. While GDP growth has remained high, per capita income is among the lowest in the world.

Transnational Issues ::

Disputes - international:

Eritrea and Ethiopia agreed to abide by the 2002 Eritrea-Ethiopia Boundary Commission's (EEBC) delimitation decision, but neither

party responded to the revised line detailed in the November 2006 EEBC Demarcation Statement; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia's Ogaden and southern Somalia's Oromo region; Ethiopian forces invaded southern Somalia and routed Islamist Courts from Mogadishu in January 2007; "Somaliland" secessionists provide port facilities in Berbera and trade ties to landlocked Ethiopia; civil unrest in eastern Sudan has hampered efforts to demarcate the porous boundary with Ethiopia

Illicit drugs:

transit hub for heroin originating in Southwest and Southeast Asia and destined for Europe, as well as cocaine destined for markets in southern Africa; cultivates qat (khat) for local use and regional export, principally to Djibouti and Somalia (legal in all three countries); the lack of a well-developed financial system limits the country's utility as a money laundering center

Falkland Islands (Islas Malvinas)

Introduction ::

Background:

Although first sighted by an English navigator in 1592, the first landing (English) did not occur until almost a century later in 1690, and the first settlement (French) was not established until 1764. The colony was turned over to Spain two years later and the islands have since been the subject of a territorial dispute, first between Britain and Spain, then between Britain and Argentina. The UK asserted its claim to the islands by establishing a naval garrison there in 1833.

Argentina invaded the islands on 2 April 1982. The British responded with an expeditionary force that landed seven weeks later and after fierce fighting forced an Argentine surrender on 14 June 1982.

Economy ::

Economy - overview:

The economy was formerly based on agriculture, mainly sheep farming, but today fishing contributes the bulk of economic activity. In 1987, the government began selling fishing licenses to foreign trawlers operating within the Falkland Islands' exclusive fishing zone.

These license fees total more than \$40 million per year, which help support the island's health, education, and welfare system. Squid accounts for 75% of the fish taken. Dairy farming supports domestic consumption; crops furnish winter fodder. Foreign exchange earnings come from shipments of high-grade wool to the UK and the sale of postage stamps and coins. The islands are now self-financing except for defense. The British Geological Survey announced a 200-mile oil exploration zone around the islands in 1993, and early seismic surveys suggest substantial reserves capable of producing 500,000 barrels per day; to date, no exploitable site has been identified. An agreement between Argentina and the UK in 1995 seeks to defuse licensing and sovereignty conflicts that would dampen foreign interest in exploiting potential oil reserves. Political tensions between the UK and Argentina rose in early 2010 after a UK company began oil drilling activities in the waters around the Falkland Islands but abated somewhat when the drilling operation failed to discover commercially exploitable oil reserves. Tourism, especially eco-tourism, is increasing rapidly, with about 30,000 visitors in 2001. Another large source of income is interest paid on money the government has in the bank. The British military presence also provides a sizeable economic boost.

Faroe Islands

Introduction ::

Background:

The population of the Faroe Islands is largely descended from Viking settlers who arrived in the 9th century. The islands have been connected politically to Denmark since the 14th century. A high degree of self government was granted the Faroese in 1948, who have autonomy over most internal affairs while Denmark is responsible for justice, defense, and foreign affairs. The Faroe Islands are not part of the European Union.

Economy ::

Economy - overview:

The Faroese economy is dependent on fishing, which makes the

economy vulnerable to price swings. The sector accounts for about 95% of exports and nearly half of GDP. In early 2008 the Faroese economy began to slow as a result of smaller catches and historically high oil prices that continue to trouble the economy. Though oil prices have come down, reduced catches, especially of cod and haddock, have continued to strain the Faroese economy. GDP grew 0.5% in 2008-09. The slowdown in the Faroese economy followed a strong performance since the mid-1990s with annual growth rates averaging close to 6%, mostly a result of increased fish landings and salmon farming, and high export prices. Unemployment reached its lowest level in the first half of 2008, but increased to 3.9% in 2009 and is rising. The Faroese Home Rule Government produced increasing budget surpluses that helped to reduce the large public debt, most of it to Denmark. However, total dependence on fishing and salmon farming make the Faroese economy very vulnerable to fluctuations in world demand. In addition, budget surpluses turned to deficits in 2008-09, and the economy at both the country and local level is running large deficits. Initial discoveries of oil in the Faroese area give hope for eventual oil production, which may provide a foundation for a more diversified economy and less dependence on Danish economic assistance. Aided by an annual subsidy from Denmark amounting to about 6% of Faroese GDP, the Faroese have a standard of living almost equal to that of Denmark and Greenland.

Fiji

Introduction ::

Background:

Fiji became independent in 1970 after nearly a century as a British colony. Democratic rule was interrupted by two military coups in 1987 caused by concern over a government perceived as dominated by the Indian community (descendants of contract laborers brought to the islands by the British in the 19th century). The coups and a 1990 constitution that cemented native Melanesian control of Fiji led to heavy Indian emigration; the population loss resulted in economic

difficulties, but ensured that Melanesians became the majority. A new constitution enacted in 1997 was more equitable. Free and peaceful elections in 1999 resulted in a government led by an Indo-Fijian, but a civilian-led coup in May 2000 ushered in a prolonged period of political turmoil. Parliamentary elections held in August 2001 provided Fiji with a democratically elected government led by Prime Minister Laisenia QARASE. Re-elected in May 2006, QARASE was ousted in a December 2006 military coup led by Commodore Voreqe BAINIMARAMA, who initially appointed himself acting president but in January 2007 became interim prime minister. Since taking power BAINIMARAMA has neutralized his opponents, crippled Fiji's democratic institutions, and refused to hold elections.

Economy ::

Economy - overview:

Fiji, endowed with forest, mineral, and fish resources, is one of the most developed of the Pacific island economies though still with a large subsistence sector. Sugar exports, remittances from Fijians working abroad, and a growing tourist industry - with 400,000 to 500,000 tourists annually - are the major sources of foreign exchange. Fiji's sugar has special access to European Union markets but will be harmed by the EU's decision to cut sugar subsidies. Sugar processing makes up one-third of industrial activity but is not efficient. Fiji's

tourism industry was damaged by the December 2006 coup and is facing an uncertain recovery time. In 2007 tourist arrivals were down almost 6%, with substantial job losses in the service sector, and GDP dipped. The coup has created a difficult business climate. The EU has suspended all aid until the interim government takes steps toward new elections. Long-term problems include low investment, uncertain land ownership rights, and the government's inability to manage its budget. Overseas remittances from Fijians working in Kuwait and Iraq have decreased significantly. Fiji's current account deficit reached 23% of GDP in 2006.

Introduction ::

Background:

Finland was a province and then a grand duchy under Sweden from the 12th to the 19th centuries, and an autonomous grand duchy of Russia after 1809. It won its complete independence in 1917. During World War II, it was able to successfully defend its freedom and resist invasions by the Soviet Union - albeit with some loss of territory. In the subsequent half century, the Finns made a remarkable transformation from a farm/forest economy to a diversified modern industrial economy; per capita income is now among the highest in Western Europe. A member of the European Union since 1995, Finland was the only Nordic state to join the euro system at its initiation in January 1999. In the 21st century, the key features of Finland's modern welfare state are a high standard of education, equality promotion, and national social security system - currently challenged by an aging population and the fluctuations of an export-driven economy.

Economy ::

Economy - overview:

Finland has a highly industrialized, largely free-market economy with per capita output roughly that of Austria, Belgium, the Netherlands, and Sweden. Trade is important with exports accounting for over one third of GDP in recent years. Finland is strongly competitive in manufacturing - principally the wood, metals, engineering, telecommunications, and electronics industries. Finland excels in high-tech exports such as mobile phones. Except for timber and several minerals, Finland depends on imports of raw materials, energy, and some components for manufactured goods. Because of the climate, agricultural development is limited to maintaining self-sufficiency in basic products. Forestry, an important export earner, provides a secondary occupation for the rural population. Finland had been one of the best performing economies within the EU in recent years and its banks and financial markets avoided the worst of global financial crisis. However, the world slowdown hit exports and domestic demand hard in 2009, with Finland experiencing one of the deepest contractions in the euro zone. A recovery of exports stimulated economic growth in 2010, and led to a lowering of unemployment. The recession left a deep mark on general government finances and the debt ratio, turning previously strong budget surpluses into deficits. In the next few years, the great challenge of economic policy will be to implement a post-recession exit strategy in which measures supporting growth will be combined with general government adjustment measures. Longer-term, Finland must address a rapidly aging population and decreasing productivity that threaten competitiveness, fiscal sustainability, and economic growth.

Introduction ::

Background:

Although ultimately a victor in World Wars I and II, France suffered extensive losses in its empire, wealth, manpower, and rank as a dominant nation-state. Nevertheless, France today is one of the most modern countries in the world and is a leader among European nations. Since 1958, it has constructed a hybrid presidential-parliamentary governing system resistant to the instabilities experienced in earlier more purely parliamentary administrations. In

recent years, its reconciliation and cooperation with Germany have proved central to the economic integration of Europe, including the introduction of a common exchange currency, the euro, in January 1999.

note: adopted 1795, restored 1870; originally known as "Chant de Guerre pour l'Armee du Rhin" (War Song for the Army of the Rhine), the National Guard of Marseille made the song famous by singing it while marching into Paris in 1792 during the French Revolutionary Wars

Economy ::

Economy - overview:

France is in the midst of transition from a well-to-do modern economy

that has featured extensive government ownership and intervention to one that relies more on market mechanisms. The government has partially or fully privatized many large companies, banks, and insurers, and has ceded stakes in such leading firms as Air France, France Telecom, Renault, and Thales. It maintains a strong presence in some sectors, particularly power, public transport, and defense industries. With at least 75 million foreign tourists per year, France is the most visited country in the world and maintains the third largest income in the world from tourism. France's leaders remain committed to a capitalism in which they maintain social equity by means of laws, tax policies, and social spending that reduce income disparity and the impact of free markets on public health and welfare. France has weathered the global economic crisis better than most other big EU economies because of the relative resilience of domestic consumer spending, a large public sector, and less exposure to the downturn in global demand than in some other countries. Nonetheless, France's real GDP contracted 2.5% in 2009, but recovered somewhat in 2010, while the unemployment rate increased from 7.4% in 2008 to 9.5% in 2010. The government pursuit of aggressive stimulus and investment measures in response to the economic crisis, however, are contributing to a deterioration of France's public finances. The government budget deficit rose sharply from 3.4% of GDP in 2008 to 7.8% of GDP in 2010, while France's public debt rose from 68% of GDP to 84% over the same period. Paris is terminating stimulus measures, eliminating tax credits, and freezing most government spending to bring the budget deficit under the 3% euro-zone ceiling by 2013, and to highlight France's commitment to fiscal discipline at a time of intense financial market scrutiny of euro zone debt levels. President SARKOZY - who secured passage of pension reform in 2010 - is expected to seek passage of some tax reforms in 2011, but he may delay additional, more costly, reforms until after the 2012 election.

French Polynesia

>

Introduction ::

Background:

The French annexed various Polynesian island groups during the 19th century. In September 1995, France stirred up widespread protests by resuming nuclear testing on the Mururoa atoll after a three-year moratorium. The tests were suspended in January 1996. In recent years, French Polynesia's autonomy has been considerably expanded.

Government - note:

under certain acts of France, French Polynesia has acquired autonomy in all areas except those relating to police and justice, monetary policy, tertiary education, immigration, and defense and foreign affairs; the duties of its president are fashioned after those of the French prime minister

Economy ::

Economy - overview:

Since 1962, when France stationed military personnel in the region, French Polynesia has changed from a subsistence agricultural economy to one in which a high proportion of the work force is either employed by the military or supports the tourist industry. With the halt of French nuclear testing in 1996, the military contribution to the economy fell sharply. Tourism accounts for about one-fourth of GDP and is a primary source of hard currency earnings. Other sources of income are pearl farming and deep-sea commercial fishing. The small manufacturing sector primarily processes agricultural products. The territory benefits substantially from development agreements with France aimed principally at creating new businesses and strengthening social services.

French Southern and Antarctic Lands

(map)

Introduction ::

Background:

In February 2007, the Iles Eparses became an integral part of the French Southern and Antarctic Lands (TAAF). The Southern Lands are now divided into five administrative districts, two of which are archipelagos, Iles Crozet and Iles Kerguelen; the third is a district composed of two volcanic islands, Ile Saint-Paul and Ile Amsterdam; the fourth, Iles Eparses, consists of five scattered tropical islands around Madagascar. They contain no permanent inhabitants and are visited only by researchers studying the native fauna, scientists at the various scientific stations, fishermen, and military personnel. The fifth district is the Antarctic portion, which consists of "Adelie Land," a thin slice of the Antarctic continent discovered and claimed by the French in 1840.

Ile Amsterdam: Discovered but not named in 1522 by the Spanish, the island subsequently received the appellation of Nieuw Amsterdam from a Dutchman; it was claimed by France in 1843. A short-lived attempt at cattle farming began in 1871. A French meteorological station established on the island in 1949 is still in use.

Ile Saint Paul: Claimed by France since 1893, the island was a fishing industry center from 1843 to 1914. In 1928, a spiny lobster cannery was established, but when the company went bankrupt in 1931, seven workers were abandoned. Only two survived until 1934 when rescue finally arrived.

Iles Crozet: A large archipelago formed from the Crozet Plateau, Iles Crozet is divided into two main groups: L'Occidental (the West), which includes Ile aux Cochons, Ilots des Apotres, Ile des Pingouins, and the reefs Brisants de l'Heroine; and L'Oriental (the east), which includes Ile d'Est and Ile de la Possession (the largest island of the Crozets). Discovered and claimed by France in 1772, the islands were used for seal hunting and as a base for whaling. Originally administered as a dependency of Madagascar, they became part of the TAAF in 1955.

Iles Kerguelen: This island group, discovered in 1772, is made up of one large island (Ile Kerguelen) and about 300 smaller islands. A permanent group of 50 to 100 scientists resides at the main base at Port-aux-Francais.

Adelie Land: The only non-insular district of the TAAF is the Antarctic claim known as "Adelie Land." The US Government does not recognize it as a French dependency.

Bassas da India: A French possession since 1897, this atoll is a volcanic rock surrounded by reefs and is awash at high tide.

Europa Island: This heavily wooded island has been a French possession since 1897; it is the site of a small military garrison that staffs a weather station.

Glorioso Islands: A French possession since 1892, the Glorioso Islands are composed of two lushly vegetated coral islands (Ile Glorieuse and Ile du Lys) and three rock islets. A military garrison operates a weather and radio station on Ile Glorieuse.

Juan de Nova Island: Named after a famous 15th century Spanish navigator and explorer, the island has been a French possession since 1897. It has been exploited for its guano and phosphate. Presently a small military garrison oversees a meteorological station.

Tromelin Island: First explored by the French in 1776, the island came under the jurisdiction of Reunion in 1814. At present, it serves as a sea turtle sanctuary and is the site of an important meteorological station.

Geography ::

Location:

southeast and east of Africa, islands in the southern Indian Ocean, some near Madagascar and others about equidistant between Africa, Antarctica, and Australia; note - French Southern and Antarctic Lands include Ile Amsterdam, Ile Saint-Paul, Iles Crozet, Iles Kerguelen, Bassas da India, Europa Island, Glorioso Islands, Juan de Nova Island, and Tromelin Island in the southern Indian Ocean, along with the French-claimed sector of Antarctica, "Adelie Land"; the US does not recognize the French claim to "Adelie Land"

Natural resources:

fish, crayfish

note: Glorioso Islands and Tromelin Island (Iles Eparses) have guano, phosphates, and coconuts

Land use:

Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul) - 100% trees, grasses, ferns, and moss; Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul) - 100% grass, ferns, and moss; Iles Crozet - 100% tussock grass, heath, and fern; Iles Kerguelen - 100% tussock grass and Kerguelen cabbage; Bassas da India (Iles Eparses) - 100% rock, coral reef, and sand; Europa Island (Iles Eparses) - 100% mangrove swamp and dry woodlands; Glorioso Islands (Iles Eparses) - 100% lush vegetation and coconut palms; Juan de Nova Island (Iles Eparses) - 90% forest, 10% other; Tromelin Island (Iles Eparses) - 100% grasses and scattered brush (2005)

Irrigated land:

0 sq km

Natural hazards:

Ile Amsterdam and Ile Saint-Paul are inactive volcanoes; Iles Eparses

subject to periodic cyclones; Bassas da India is a maritime hazard since it is under water for a period of three hours prior to and following the high tide and surrounded by reefs

volcanism: Reunion Island - Piton de la Fournaise (elev. 2,632 m, 8,635 ft), which has erupted many times in recent years, including 2010, is one of the world's most active volcanoes; although rare, eruptions outside the volcano's caldera could threaten nearby cities

Environment - current issues:

introduction of foreign species on Iles Crozet has caused severe damage to the original ecosystem; overfishing of Patagonian toothfish around Iles Crozet and Iles Kerguelen

Geography - note:

islands component is widely scattered across remote locations in the southern Indian Ocean

Bassas da India (Iles Eparses): the atoll is a circular reef that sits atop a long-extinct, submerged volcano

Europa Island and Juan de Nova Island (Iles Eparses): wildlife sanctuary for seabirds and sea turtles

Glorioso Island (Iles Eparses): the islands and rocks are surrounded by an extensive reef system

Tromelin Island (Iles Eparses): climatologically important location for forecasting cyclones in the western Indian Ocean; wildlife sanctuary (seabirds, tortoises)

no indigenous inhabitants

Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul): has no permanent residents but has a meteorological station

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): is uninhabited but is frequently visited by fishermen and has a scientific research cabin for short stays

Iles Crozet: are uninhabited except for 18 to 30 people staffing the Alfred Faure research station on Île de la Possession

Iles Kerguelen: 50 to 100 scientists are located at the main base at Port-aux-Français on Île Kerguelen

Bassas da India (Îles Éparses): uninhabitable

Europa Island, Glorioso Islands, Juan de Nova Island (Îles Éparses): a small French military garrison and a few meteorologists on each possession; visited by scientists

Tromelin Island (Îles Éparses): uninhabited, except for visits by scientists

Introduction ::

Background:

Until recently, only two autocratic presidents had ruled Gabon since its independence from France in 1960. The recent president of Gabon, El Hadj Omar BONGO Ondimba - one of the longest-serving heads of state in the world - had dominated the country's political scene for four decades. President BONGO introduced a nominal multiparty system and a new constitution in the early 1990s. However, allegations of electoral fraud during local elections in 2002-03 and the

presidential elections in 2005 exposed the weaknesses of formal political structures in Gabon. President BONGO died in June 2009. New elections in August 2009 brought Ali Ben BONGO, son of the former president, to power. Despite political conditions, a small population, abundant natural resources, and considerable foreign support have helped make Gabon one of the more prosperous and stable African countries. In January 2010, Gabon assumed a nonpermanent seat on the UN Security Council for the 2010-11 term.

Economy ::

Economy - overview:

Gabon enjoys a per capita income four times that of most sub-Saharan African nations, but because of high income inequality, a large proportion of the population remains poor. Gabon depended on timber and manganese until oil was discovered offshore in the early 1970s. The oil sector now accounts for more than 50% of GDP although the industry is in decline as fields pass their peak production. Gabon continues to face fluctuating prices for its oil, timber, and manganese exports and the global recession led to a GDP contraction of 1.4% in 2009. Despite the abundance of natural wealth, poor fiscal management hobbles the economy. In 1997, an IMF mission to Gabon criticized the government for overspending on off-budget items, overborrowing from the central bank, and slipping on its schedule for privatization and administrative reform. The rebound of oil prices from 1999 to 2008 helped growth, but drops in production have hampered Gabon from fully realizing potential gains. Gabon signed a 14-month Stand-By Arrangement with the IMF in May 2007, and later that year issued a \$1 billion sovereign bond to buy back a sizable portion of its Paris Club debt.

Introduction ::

Background:

The Gambia gained its independence from the UK in 1965. Geographically surrounded by Senegal, it formed a short-lived federation of Senegambia between 1982 and 1989. In 1991 the two nations signed a friendship and cooperation treaty, but tensions have flared up intermittently since then. Yahya A. J. J. JAMMEH led a military coup in 1994 that overthrew the president and banned political activity. A new constitution and presidential elections in 1996, followed by parliamentary balloting in 1997, completed a nominal return to civilian rule. JAMMEH has been elected president in all subsequent elections including most recently in late 2006.

Economy ::

Economy - overview:

The Gambia has sparse natural resource deposits and a limited agricultural base, and relies in part on remittances from workers overseas and tourist receipts. About three-quarters of the population depends on the agricultural sector for its livelihood. Small-scale manufacturing activity features the processing of peanuts, fish, and hides. The Gambia's natural beauty and proximity to Europe has made it one of the larger markets for tourism in West Africa, boosted by government and private sector investments in eco-tourism and upscale facilities. In the past few years, The Gambia's re-export trade - traditionally a major segment of economic activity - has declined, but its banking sector has grown rapidly. Unemployment and underemployment rates remain high; economic progress depends on sustained bilateral and multilateral aid, on responsible government economic management, and on continued technical assistance from multilateral and bilateral donors. The quality of fiscal management, however, is weak. The government has promised to raise civil service wages over the next two years and the deficit is projected to worsen.

Gaza Strip

Introduction ::

Background:

The September 1993 Israel-PLO Declaration of Principles on Interim Self-Government Arrangements provided for a transitional period of Palestinian self-rule in the West Bank and Gaza Strip. Under a series of agreements signed between May 1994 and September 1999, Israel transferred to the Palestinian Authority (PA) security and civilian responsibility for many Palestinian-populated areas of the West Bank and Gaza Strip. Negotiations to determine the permanent status of the West Bank and Gaza Strip stalled following the outbreak of an intifada in September 2000. In April 2003, the Quartet (US, EU, UN, and Russia) presented a roadmap to a final settlement of the conflict by 2005 based on reciprocal steps by the two parties leading to two states, Israel and a democratic Palestine. Following Palestinian leader

Yasir ARAFAT's death in late 2004, Mahmud ABBAS was elected PA president in January 2005. A month later, Israel and the PA agreed to the Sharm el-Sheikh Commitments in an effort to move the peace process forward. In September 2005, Israel unilaterally withdrew all its settlers and soldiers and dismantled its military facilities in the Gaza Strip and withdrew settlers and redeployed soldiers from four small northern West Bank settlements. Nonetheless, Israel still controls maritime, airspace, and most access to the Gaza Strip; and it enforces a restricted zone along the border inside Gaza. In January 2006, the Islamic Resistance Movement, HAMAS, won control of the Palestinian Legislative Council (PLC). HAMAS took control of the PA government in March 2006, but President ABBAS had little success negotiating with HAMAS to present a political platform acceptable to the international community so as to lift economic sanctions on Palestinians. Violent clashes between Fatah and HAMAS supporters in the Gaza Strip in 2006 and early 2007 resulted in numerous Palestinian deaths and injuries. In February 2007, ABBAS and HAMAS Political Bureau Chief MISHAL signed the Mecca Agreement in Saudi Arabia that resulted in the formation of a Palestinian National Unity Government (NUG) headed by HAMAS member Ismail HANIYA. However, fighting continued in the Gaza Strip, and in June 2007, HAMAS militants succeeded in a violent takeover of all military and governmental institutions in the Gaza Strip. ABBAS dismissed the NUG and through a series of presidential decrees formed a PA government in the West Bank led by independent Salam FAYYAD. HAMAS rejected the NUG's dismissal, and despite multiple rounds of Egyptian-brokered reconciliation negotiations, the two groups have failed to bridge their differences. Late November 2007 through June 2008 witnessed a substantial increase in Israeli-Palestinian violence. An Egyptian-brokered truce in June 2008 between Israel and HAMAS brought about a five-month pause in hostilities, but spiraling end-of-year violence resulted in the deaths of an estimated 1,100 to 1,400 Palestinians and left tens of thousands of people homeless. International donors pledged \$4.5 billion in aid to rebuild the Gaza Strip, but by the end of 2010 large-scale reconstruction had not begun.

Economy ::

Economy - overview:

High population density, limited land and sea access, continuing isolation, and strict internal and external security controls have degraded economic conditions in the Gaza Strip - the smaller of the two areas in the Palestinian Territories. Israeli-imposed crossings closures, which became more restrictive after HAMAS violently took over the territory in June 2007, and fighting between HAMAS and Israel during December 2008-January 2009, resulted in the near collapse of most of the private sector, extremely high unemployment, and high poverty rates. Shortages of goods are met through large-scale humanitarian assistance - led by UNRWA - and the HAMAS-regulated black market tunnel trade that flourishes under the Gaza Strip's border with Egypt. However, changes to the blockade in 2010 included moving from a white list - in which only approved items were allowed into Gaza through the crossings - to a black list, where all but non-approved items were allowed into Gaza through the crossings. Israeli authorities have recently signaled that exports from the territory might be possible in the future, but currently regular exports from Gaza are not permitted.

Georgia

(map)

Introduction ::

Background:

The region of present day Georgia contained the ancient kingdoms of Colchis and Kartli-Iberia. The area came under Roman influence in the first centuries A.D. and Christianity became the state religion in the 330s. Domination by Persians, Arabs, and Turks was followed by a Georgian golden age (11th-13th centuries) that was cut short by the Mongol invasion of 1236. Subsequently, the Ottoman and Persian empires competed for influence in the region. Georgia was absorbed into the Russian Empire in the 19th century. Independent for three years (1918-1921) following the Russian revolution, it was forcibly incorporated into the USSR until the Soviet Union dissolved in 1991. An attempt by the incumbent Georgian government to manipulate national legislative elections in November 2003 touched off widespread protests that led to the resignation of Eduard

SHEVARDNADZE, president since 1995. New elections in early 2004 swept Mikheil SAAKASHVILI into power along with his National Movement party. Progress on market reforms and democratization has been made in the years since independence, but this progress has been complicated by Russian assistance and support to the breakaway regions of Abkhazia and South Ossetia. After a series of Russian and separatist provocations in summer 2008, Georgian military action in South Ossetia in early August led to a Russian military response that not only occupied the breakaway areas, but large portions of Georgia proper as well. Russian troops pulled back from most occupied Georgian territory, but in late August 2008 Russia unilaterally recognized the independence of Abkhazia and South Ossetia. This action was strongly condemned by most of the world's nations and international organizations.

Economy ::

Economy - overview:

Georgia's economy sustained GDP growth of more than 10% in 2006-07, based on strong inflows of foreign investment and robust government spending. However, GDP growth slowed in 2008 following the August 2008 conflict with Russia, and turned negative in 2009 as foreign direct investment and workers' remittances declined in the wake of the global financial crisis, but rebounded in 2010. Georgia's main economic activities include the cultivation of agricultural products such as grapes, citrus fruits, and hazelnuts; mining of manganese and copper; and output of a small industrial sector producing alcoholic and nonalcoholic beverages, metals, machinery, aircraft and chemicals. Areas of recent improvement include growth in the construction, banking services, and mining sectors, but reduced availability of external investment and the slowing regional economy are emerging risks. The country imports nearly all its needed supplies of natural gas and oil products. It has sizeable hydropower capacity, a growing component of its energy supplies. Georgia has overcome the chronic energy shortages and gas supply interruptions of the past by renovating hydropower plants and by increasingly relying on natural gas imports from Azerbaijan instead of from Russia. The construction on the Baku-T'bilisi-Ceyhan oil pipeline, the Baku-T'bilisi-Erzerum gas pipeline, and the Kars-Akhalkalaki Railroad are part of a strategy to capitalize on Georgia's strategic location between Europe and Asia and develop its role as a transit point for gas, oil and other goods. Georgia has historically suffered from a chronic failure to collect tax revenues; however, the government, since coming to power in 2004, has simplified the tax code, improved tax administration, increased tax enforcement, and cracked down on petty corruption. However, the economic downturn of 2008-09 eroded the tax base and led to a decline in the budget surplus and an increase in public borrowing needs. The country is pinning its hopes for renewed growth on a determined effort to continue to liberalize the economy by reducing regulation, taxes, and corruption in order to attract foreign investment, but the economy faces a more difficult investment climate both domestically and internationally.

Germany

Introduction ::

Background:

As Europe's largest economy and second most populous nation (after Russia), Germany is a key member of the continent's economic, political, and defense organizations. European power struggles immersed Germany in two devastating World Wars in the first half of the 20th century and left the country occupied by the victorious Allied powers of the US, UK, France, and the Soviet Union in 1945. With the advent of the Cold War, two German states were formed in 1949: the

western Federal Republic of Germany (FRG) and the eastern German Democratic Republic (GDR). The democratic FRG embedded itself in key Western economic and security organizations, the EC, which became the EU, and NATO, while the Communist GDR was on the front line of the Soviet-led Warsaw Pact. The decline of the USSR and the end of the Cold War allowed for German unification in 1990. Since then, Germany has expended considerable funds to bring Eastern productivity and wages up to Western standards. In January 1999, Germany and 10 other EU countries introduced a common European exchange currency, the euro. In January 2011, Germany assumed a nonpermanent seat on the UN Security Council for the 2011-12 term.

Flag description:

three equal horizontal bands of black (top), red, and gold; these colors have played an important role in German history and can be traced back to the medieval banner of the Holy Roman Emperor - a black eagle with red claws and beak on a gold field

National anthem:

name: "Lied der Deutschen" (Song of the Germans)

lyrics/music: August Heinrich HOFFMANN VON FALLERSLEBE/Franz Joseph HAYDN

note: adopted 1922, restored 1990; the anthem, also known as "Deutschlandlied" (Song of Germany), was abolished in 1945 because of the Nazi's use of the first verse, specifically the phrase, "Deutschland, Deutschland uber alles" (Germany, Germany above all) to promote nationalism; since restoration in 1990, only the third verse is sung

Economy ::

Economy - overview:

The German economy - the fifth largest economy in the world in PPP terms and Europe's largest - is a leading exporter of machinery, vehicles, chemicals, and household equipment and benefits from a highly skilled labor force. Like its western European neighbors, Germany faces significant demographic challenges to sustained long-term growth. Low fertility rates and declining net immigration are increasing pressure on the country's social welfare system and necessitate structural reforms. The modernization and integration of the eastern German economy - where unemployment can exceed 20% in some municipalities - continues to be a costly long-term process,

with annual transfers from west to east amounting in 2008 alone to roughly \$12 billion. Reforms launched by the government of Chancellor Gerhard SCHROEDER (1998-2005), deemed necessary to address chronically high unemployment and low average growth, contributed to strong growth in 2006 and 2007 and falling unemployment, which in 2008 reached a new post-reunification low of 7.8%. These advances, as well as a government subsidized, reduced working hour scheme, help explain the relatively modest increase in unemployment during the 2008-09 recession - the deepest since World War II - and its healthy decrease in 2010. GDP contracted nearly 5% in 2009 but grew by 3.3% in 2010. Germany crept out of recession thanks largely to rebounding manufacturing orders and exports - primarily outside the Euro Zone - and relatively steady consumer demand. Stimulus and stabilization efforts initiated in 2008 and 2009 and tax cuts introduced in Chancellor Angela MERKEL's second term increased Germany's budget deficit to 3.3% in 2009 and to 3.6% in 2010. The EU has given Germany until 2013 to get its consolidated budget deficit below 3% of GDP. A new constitutional amendment likewise limits the federal government to structural deficits of no more than 0.35% of GDP per annum as of 2016.

Introduction ::

Background:

Formed from the merger of the British colony of the Gold Coast and the Togoland trust territory, Ghana in 1957 became the first sub-Saharan country in colonial Africa to gain its independence. Ghana endured a long series of coups before Lt. Jerry RAWLINGS took power in 1981 and banned political parties. After approving a new constitution and restoring multiparty politics in 1992, RAWLINGS won presidential elections in 1992 and 1996, but was constitutionally

prevented from running for a third term in 2000. John KUFUOR succeeded him and was reelected in 2004. John Atta MILLS took over as head of state in early 2009.

Economy ::

Economy - overview:

Ghana is well endowed with natural resources and agriculture accounts for roughly one-third of GDP and employs more than half of the workforce, mainly small landholders. The services sector accounts for 50% of GDP. Gold and cocoa production and individual remittances are major sources of foreign exchange. Oil production at Ghana's offshore Jubilee field began in mid-December and is expected to boost economic growth. Ghana signed a Millennium Challenge Corporation (MCC) Compact in 2006, which aims to assist in transforming Ghana's agricultural sector. Ghana opted for debt relief under the Heavily Indebted Poor Country (HIPC) program in 2002, and is also benefiting from the Multilateral Debt Relief Initiative that took effect in 2006. In 2009 Ghana signed a three-year Poverty Reduction and Growth Facility with the IMF to improve macroeconomic stability, private sector competitiveness, human resource development, and good governance and civic responsibility. Sound macro-economic management along with high prices for gold and cocoa helped sustain GDP growth in 2008-10. In early 2010 President John Atta MILLS targeted recovery from high inflation and current account and budget deficits as his priorities.

Gibraltar

>

Introduction ::

Background:

Strategically important, Gibraltar was reluctantly ceded to Great Britain by Spain in the 1713 Treaty of Utrecht; the British garrison was formally declared a colony in 1830. In a referendum held in 1967, Gibraltarians voted overwhelmingly to remain a British dependency. The subsequent granting of autonomy in 1969 by the UK led to Spain closing the border and severing all communication links. A series of talks were held by the UK and Spain between 1997 and 2002 on

establishing temporary joint sovereignty over Gibraltar. In response to these talks, the Gibraltar Government called a referendum in late 2002 in which the majority of citizens voted overwhelmingly against any sharing of sovereignty with Spain. Since late 2004, tripartite talks among Spain, the UK, and Gibraltar have been held with the aim of cooperatively resolving problems that affect the local population, and work continues on cooperation agreements in areas such as taxation and financial services; communications and maritime security; policy, legal and customs services; environmental protection; and education and visa services. Throughout 2009, a dispute over Gibraltar's claim to territorial waters extending out three miles gave rise to periodic non-violent maritime confrontations between Spanish and UK naval patrols. A new noncolonial constitution came into effect in 2007, and the European Court of First Instance recognized Gibraltar's right to regulate its own tax regime in December 2008, but the UK retains responsibility for defense, foreign relations, internal security, and financial stability.

Economy ::

Economy - overview:

Self-sufficient Gibraltar benefits from an extensive shipping trade, offshore banking, and its position as an international conference center. Tax rates are low to attract foreign investment. The British military presence has been sharply reduced and now contributes about 7% to the local economy, compared with 60% in 1984. The financial sector, tourism (almost 5 million visitors in 1998), gaming revenues, shipping services fees, and duties on consumer goods also generate revenue. The financial sector, tourism, and the shipping sector contribute 30%, 30%, and 25%, respectively, of GDP.

Telecommunications, e-commerce, and e-gaming account for the remaining 15%. In recent years, Gibraltar has seen major structural change from a public to a private sector economy, but changes in government spending still have a major impact on the level of employment.

Introduction ::

Background:

Greece achieved independence from the Ottoman Empire in 1829. During the second half of the 19th century and the first half of the 20th century, it gradually added neighboring islands and territories, most with Greek-speaking populations. In World War II, Greece was first invaded by Italy (1940) and subsequently occupied by Germany (1941-44); fighting endured in a protracted civil war between supporters of the king and other anti-Communists and Communist

rebels. Following the latter's defeat in 1949, Greece joined NATO in 1952. In 1967, a group of military officers seized power, establishing a military dictatorship that suspended many political liberties and forced the king to flee the country. In 1974, democratic elections and a referendum created a parliamentary republic and abolished the monarchy. In 1981, Greece joined the EC (now the EU); it became the 12th member of the European Economic and Monetary Union in 2001. In 2010, the prospect of a Greek default on its euro-denominated debt created severe strains within the EMU and raised the question of whether a member country might voluntarily leave the common currency or be removed.

Economy ::

Economy - overview:

Greece has a capitalist economy with the public sector accounting for about 40% of GDP and with per capita GDP about two-thirds that of the leading euro-zone economies. Tourism provides 15% of GDP. Immigrants make up nearly one-fifth of the work force, mainly in agricultural and unskilled jobs. Greece is a major beneficiary of EU aid, equal to about 3.3% of annual GDP. The Greek economy grew by nearly 4.0% per year between 2003 and 2007, due partly to infrastructural spending related to the 2004 Athens Olympic Games, and in part to an increased availability of credit, which has sustained record levels of consumer spending. But the economy went into recession in 2009 as a result of the world financial crisis, tightening credit conditions, and Athens' failure to address a growing budget deficit, which was triggered by falling state revenues, and increased government expenditures. The economy contracted by 2% in 2009, and 4.8% in 2010. Greece violated the EU's Growth and Stability Pact budget deficit criterion of no more than 3% of GDP from 2001 to 2006, but finally met that criterion in 2007-08, before exceeding it again in 2009, with the deficit reaching 15.4% of GDP. Austerity measures reduced the deficit to 9.4% of GDP in 2010. Public debt, inflation, and unemployment are above the euro-zone average while per capita income is below; unemployment rose to 12% in 2010. Eroding public finances, a credibility gap stemming from inaccurate and misreported statistics, and consistent underperformance on following through with reforms prompted major credit rating agencies in late 2009 to downgrade Greece's international debt rating, and has led the country into a financial crisis. Under intense pressure by the EU and international market participants, the government has adopted a medium-term austerity program that includes cutting government spending, reducing the size of the public sector, decreasing tax evasion, reforming the health care and pension systems, and improving competitiveness through structural reforms to the labor and

product markets. Athens, however, faces long-term challenges to push through unpopular reforms in the face of often vocal opposition from the country's powerful labor unions and the general public. Greek labor unions are striking over new austerity measures, but the strikes so far have had a limited impact on the government's will to adopt reforms. An uptick in widespread unrest, however, could challenge the government's ability to implement reforms and meet budget targets, and could also lead to rioting or violence. In April 2010 a leading credit agency assigned Greek debt its lowest possible credit rating; in May, the International Monetary Fund and Eurozone governments provided Greece emergency short- and medium-term loans worth \$147 billion so that the country could make debt repayments to creditors. In exchange for the largest bailout ever assembled, the government announced combined spending cuts and tax increases totaling \$40 billion over three years, on top of the tough austerity measures already taken. Greece, however, struggled to boost revenues and cut spending to meet 2010 targets set by the EU and the IMF, especially after Eurostat - the EU's statistical office - revised upward Greece's deficit and debt numbers for 2009 and 2010. Greece's lenders are calling on Athens to step up efforts in 2011 to increase tax collection, shore up public enterprises, and rein in health spending, and are planning to give Greece more time to repay its EU-IMF loan. Greece responded by introducing major structural reforms, but investors still question whether Greece can sustain fiscal efforts in the face of a bleak economic outlook and public discontent.

Introduction ::

Background:

Greenland, the world's largest island, is about 81% ice capped. Vikings reached the island in the 10th century from Iceland; Danish colonization began in the 18th century, and Greenland was made an integral part of Denmark in 1953. It joined the European Community (now the EU) with Denmark in 1973 but withdrew in 1985 over a dispute centered on stringent fishing quotas. Greenland was granted self-government in 1979 by the Danish parliament; the law went into effect the following year. Greenland voted in favor of increased self-rule in November 2008 and acquired greater responsibility for internal affairs in June 2009. Denmark, however, continues to exercise control of Greenland's foreign affairs, security, and financial policy in consultation with Greenland's Home Rule Government.

Economy ::

Economy - overview:

The economy remains critically dependent on exports of shrimp and fish and on a substantial subsidy - about \$650 million in 2009 - from the Danish Government, which supplies nearly 60% of government revenues. The public sector, including publicly owned enterprises and the municipalities, plays the dominant role in Greenland's economy. Greenland's GDP contracted about 2% in 2009 as a result of the global economic slowdown. Budget surpluses turned to deficits beginning in 2007 and unemployment has risen. During the last decade the Greenland Home Rule Government (GHRG) pursued conservative fiscal and monetary policies, but public pressure has increased for better schools, health care and retirement systems. The Greenlandic economy has benefited from increasing catches and exports of shrimp, Greenland halibut and, more recently, crabs. Due to Greenland's continued dependence on exports of fish - which account for 82% of exports - the economy remains very sensitive to foreign developments. International consortia are increasingly active in exploring for hydrocarbon resources off Greenland's western coast, and international studies indicate the potential for oil and gas fields in northern and northeastern Greenland. In May 2007 a US aluminum

producer concluded a memorandum of understanding with the Greenland Home Rule Government to build an aluminum smelter and a power generation facility, which takes advantage of Greenland's abundant hydropower potential. Within the area of mining, olivine sand continues to be produced and gold production has resumed in south Greenland. Tourism also offers another avenue of economic growth for Greenland, with increasing numbers of cruise lines now operating in Greenland's western and southern waters during the peak summer tourism season.

Grenada

(map)

Introduction ::

Background:

Carib Indians inhabited Grenada when COLUMBUS discovered the island in 1498, but it remained uncolonized for more than a century. The French settled Grenada in the 17th century, established sugar estates, and imported large numbers of African slaves. Britain took the island in 1762 and vigorously expanded sugar production. In the 19th century, cacao eventually surpassed sugar as the main export crop; in the 20th century, nutmeg became the leading export. In 1967, Britain

gave Grenada autonomy over its internal affairs. Full independence was attained in 1974 making Grenada one of the smallest independent countries in the Western Hemisphere. Grenada was seized by a Marxist military council on 19 October 1983. Six days later the island was invaded by US forces and those of six other Caribbean nations, which quickly captured the ringleaders and their hundreds of Cuban advisers. Free elections were reinstituted the following year and have continued since that time. Hurricane Ivan struck Grenada in September of 2004 causing severe damage.

Flag description:

a rectangle divided diagonally into yellow triangles (top and bottom) and green triangles (hoist side and outer side), with a red border around the flag; there are seven yellow, five-pointed stars with three centered in the top red border, three centered in the bottom red border, and one on a red disk superimposed at the center of the flag; there is also a symbolic nutmeg pod on the hoist-side triangle (Grenada is the world's second-largest producer of nutmeg, after Indonesia); the seven stars stand for the seven administrative divisions, with the central star denoting the capital, St. George; yellow represents the sun and the warmth of the people, green stands for vegetation and agriculture, and red symbolizes harmony, unity, and courage

National anthem:

name: "Hail Grenada"

lyrics/music: Irva Merle BAPTISTE/Louis Arnold MASANTO

note: adopted 1974

Economy ::

Economy - overview:

Grenada relies on tourism as its main source of foreign exchange especially since the construction of an international airport in 1985. Hurricanes Ivan (2004) and Emily (2005) severely damaged the agricultural sector - particularly nutmeg and cocoa cultivation - which had been a key driver of economic growth. Grenada has rebounded from the devastating effects of the hurricanes but is now saddled with the debt burden from the rebuilding process. Public debt-to-GDP is nearly 110%, leaving the THOMAS administration limited room to engage in public investments and social spending. Strong performances in construction and manufacturing, together with the development of tourism and an offshore financial industry, have also contributed to growth in national output; however, economic growth

was stagnant in 2010 after a sizeable contraction in 2009, because of the global economic slowdown's effects on tourism and remittances.

Introduction ::

Background:

The Mayan civilization flourished in Guatemala and surrounding regions during the first millennium A.D. After almost three centuries as a Spanish colony, Guatemala won its independence in 1821. During the second half of the 20th century, it experienced a variety of military and civilian governments, as well as a 36-year guerrilla war. In 1996, the government signed a peace agreement formally ending the conflict, which had left more than 100,000 people dead and had

created, by some estimates, some 1 million refugees.

Natural hazards:

numerous volcanoes in mountains, with occasional violent earthquakes; Caribbean coast extremely susceptible to hurricanes and other tropical storms

volcanism: Guatemala experiences significant volcanic activity in the Sierra Madre range; Santa Maria (elev. 3,772 m, 12,375 ft) has been deemed a "Decade Volcano" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to its explosive history and close proximity to human populations; Pacaya (elev. 2,552 m, 8,373 ft), which erupted in May 2010 causing an ashfall on Guatemala City and prompting evacuations, is one of the country's most active volcanoes; the volcano has frequently been in eruption since 1965; other historically active volcanoes include Acatenango, Almolonga, Atitlan, Fuego, and Tacana

Environment - current issues:

deforestation in the Peten rainforest; soil erosion; water pollution

Environment - international agreements:

party to: Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Wetlands, Whaling

signed, but not ratified: none of the selected agreements

Economy ::

Economy - overview:

Guatemala is the most populous of the Central American countries with a GDP per capita roughly one-half that of the average for Latin America and the Caribbean. The agricultural sector accounts for nearly 15% of GDP and half of the labor force; key agricultural exports include coffee, sugar, and bananas. The 1996 peace accords, which ended 36 years of civil war, removed a major obstacle to foreign investment, and since then Guatemala has pursued important reforms and macroeconomic stabilization. The Central American Free Trade Agreement (CAFTA) entered into force in July 2006 spurring increased investment and diversification of exports, with the largest increases in ethanol and non-traditional agricultural exports. While CAFTA has helped improve the investment climate, concerns over security, the lack of skilled workers and poor infrastructure continue to hamper foreign direct investment. The distribution of income remains highly unequal with the richest decile comprising over 40% of Guatemala's overall consumption. More than half of the population is below the national poverty line and 15% lives in extreme poverty. Poverty among indigenous groups, which make up 38% of the population, averages 76% and extreme poverty rises to 28%. 43% of children under five are chronically malnourished, one of the highest malnutrition rates in the world. President COLOM entered into office with the promise to increase education, healthcare, and rural development, and in April 2008 he inaugurated a conditional cash transfer program, modeled after programs in Brazil and Mexico, that provide financial incentives for poor families to keep their children in school and get regular health check-ups. Given Guatemala's large expatriate community in the United States, it is the top remittance recipient in Central America, with inflows serving as a primary source of foreign income equivalent to nearly two-thirds of exports. Economic growth fell in 2009 as export demand from US and other Central

American markets fell and foreign investment slowed amid the global recession, but the economy recovered gradually in 2010 and will likely return to more normal growth rates by 2012. President COLOM, in his last year in office, will likely face opposition to economic reform, particularly over a long-delayed tax reform and an IMF-recommended reform to strengthen the banking sector. Larger budget deficits and increased debt can be expected in 2011.

Transnational Issues ::

Disputes - international:

annual ministerial meetings under the OAS-initiated Agreement on the Framework for Negotiations and Confidence Building Measures continue to address Guatemalan land and maritime claims in Belize and the Caribbean Sea; the Line of Adjacency created under the 2002 Differendum serves in lieu of the contiguous international boundary to control squatting in the sparsely inhabited rain forests of Belize's border region; Mexico must deal with thousands of impoverished Guatemalans and other Central Americans who cross the porous border looking for work in Mexico and the United States

Refugees and internally displaced persons:

IDPs: undetermined (the UN does not estimate there are any IDPs, although some NGOs estimate over 200,000 IDPs as a result of over three decades of internal conflict that ended in 1996) (2007)

Trafficking in persons:

current situation: Guatemala is a source, transit, and destination country for Guatemalans and Central Americans trafficked for the purposes of commercial sexual exploitation and forced labor; human trafficking is a significant and growing problem in the country; Guatemalan women and children are trafficked within the country for commercial sexual exploitation, primarily to Mexico and the United States; Guatemalan men, women, and children are also trafficked within the country, and to Mexico and the United States, for forced labor

tier rating: Tier 2 Watch List - for a second consecutive year, Guatemala is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat trafficking in persons, particularly with respect to ensuring that trafficking offenders are appropriately prosecuted for their crimes; while prosecutors initiated trafficking prosecutions, they continued to face problems in court with application of Guatemala's comprehensive anti-trafficking law; the government made modest improvements to its protection efforts, but assistance remained inadequate overall in 2007 (2008)

Illicit drugs:

major transit country for cocaine and heroin; in 2005, cultivated 100 hectares of opium poppy after reemerging as a potential source of opium in 2004; potential production of less than 1 metric ton of pure heroin; marijuana cultivation for mostly domestic consumption;

proximity to Mexico makes Guatemala a major staging area for drugs (particularly for cocaine); money laundering is a serious problem; corruption is a major problem

Guernsey

>

Introduction ::

Background:

Guernsey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy, which held sway in both France and England. The islands were the only British soil occupied by German troops in World War II. Guernsey is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government is constitutionally responsible for its defense and international representation.

Economy ::

Economy - overview:

Financial services - banking, fund management, insurance - account for about 23% of employment and about 55% of total income in this tiny, prosperous Channel Island economy. Tourism, manufacturing, and horticulture, mainly tomatoes and cut flowers, have been declining. Financial services, construction, retail, and the public sector have been growing. Light tax and death duties make Guernsey a popular tax haven. The evolving economic integration of the EU nations is changing the environment under which Guernsey operates.

Introduction ::

Background:

Guinea has had a history of authoritarian rule since gaining its independence from France in 1958. Lansana CONTE came to power in 1984 when the military seized the government after the death of the first president, Sekou TOURE. Guinea did not hold democratic elections until 1993 when Gen. CONTE (head of the military government) was elected president of the civilian government. He was reelected in 1998 and again in 2003, though all the polls were marred

by irregularities. History repeated itself in December 2008 when following President CONTE's death, Capt. Moussa Dadis CAMARA led a military coup, seizing power and suspending the constitution. His unwillingness to yield to domestic and international pressure to step down led to heightened political tensions that culminated in September 2009 when presidential guards opened fire on an opposition rally killing more than 150 people, and in early December 2009 when CAMARA was wounded in an assassination attempt and evacuated to Morocco and subsequently to Burkina Faso. A transitional government led by General Sekouba KONATE held democratic elections in 2010 and Alpha CONDE was elected president in the country's first free and fair elections since independence.

Economy ::

Economy - overview:

Guinea is a poor country that possesses major mineral, hydropower, and agricultural resources. The country has almost half of the world's bauxite reserves. The mining sector accounts for more than 70% of exports. Long-run improvements in the management of the economy, literacy, and the legal framework are needed if the country is to move out of poverty. Investor confidence has been sapped by rampant corruption, a lack of electricity and other infrastructure, a lack of skilled workers, and the political uncertainty resulting from the death of President Lansana CONTE in December 2008. International donors, including the G-8, the IMF, and the World Bank, cut their development programming significantly in response to the coup, and international partners have said that a resumption of aid will be

contingent on a successful democratic transition with a democratically elected president and a functioning National Assembly. Growth rose slightly in 2006-08, primarily due to increases in global demand and commodity prices on world markets, but bauxite and alumina exports were negatively affected by the global economic downturn and the economy in 2009 contracted. International investors expressed renewed interest in Guinea's iron ore mines in 2010.

Transnational Issues ::

Disputes - international:

conflicts among rebel groups, warlords, and youth gangs in neighboring states have spilled over into Guinea resulting in domestic instability; Sierra Leone considers Guinea's definition of the flood plain limits to define the left bank boundary of the Makona and Moa rivers excessive and protests Guinea's continued occupation of these lands, including the hamlet of Yenga, occupied since 1998

Refugees and internally displaced persons:

refugees (country of origin): 21,856 (Liberia); 5,259 (Sierra Leone); 3,900 (Cote d'Ivoire)

IDPs: 19,000 (cross-border incursions from Cote d'Ivoire, Liberia, Sierra Leone) (2007)

Trafficking in persons:

current situation: Guinea is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; the majority of victims are children, and internal trafficking is more prevalent than transnational trafficking; within the country, girls are trafficked primarily for domestic

servitude and sexual exploitation, while boys are trafficked for forced agricultural labor, and as forced beggars, street vendors, shoe shiners, and laborers in gold and diamond mines; some Guinean men are also trafficked for agricultural labor within Guinea; transnationally, girls are trafficked into Guinea for domestic servitude and likely also for sexual exploitation

tier rating: Tier 2 Watch List - Guinea is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to eliminate trafficking over 2006; Guinea demonstrated minimal law enforcement efforts for a second year in a row, while protection efforts diminished over efforts in 2006; the government did not report any trafficking convictions in 2007; due to a lack of resources, the government does not provide shelter services for trafficking victims; the government took no measures to reduce the demand for commercial sexual exploitation (2008)

Guinea-Bissau

Introduction ::

Background:

Since independence from Portugal in 1974, Guinea-Bissau has experienced considerable political and military upheaval. In 1980, a military coup established authoritarian dictator Joao Bernardo 'Nino' VIEIRA as president. Despite setting a path to a market economy and multiparty system, VIEIRA's regime was characterized by the suppression of political opposition and the purging of political rivals. Several coup attempts through the 1980s and early 1990s failed to

unseat him. In 1994 VIEIRA was elected president in the country's first free elections. A military mutiny and resulting civil war in 1998 eventually led to VIEIRA's ouster in May 1999. In February 2000, a transitional government turned over power to opposition leader Kumba YALA after he was elected president in transparent polling. In September 2003, after only three years in office, YALA was ousted by the military in a bloodless coup, and businessman Henrique ROSA was sworn in as interim president. In 2005, former President VIEIRA was re-elected president pledging to pursue economic development and national reconciliation; he was assassinated in March 2009. Malam Bacai SANHA was elected in an emergency election held in June 2009.

Economy ::

Economy - overview:

One of the poorest countries in the world, Guinea-Bissau's legal economy depends mainly on farming and fishing, but trafficking narcotics is probably the most lucrative trade. Cashew crops have increased remarkably in recent years. Guinea-Bissau exports fish and seafood along with small amounts of peanuts, palm kernels, and timber. Rice is the major crop and staple food. However, intermittent fighting between Senegalese-backed government troops and a military junta destroyed much of the country's infrastructure and caused widespread damage to the economy in 1998; the civil war led to a 28% drop in GDP that year, with partial recovery in 1999-2002. In December 2003, the World Bank, IMF, and UNDP were forced to step in to provide emergency budgetary support in the amount of \$107

million for 2004, representing over 80% of the total national budget. The combination of limited economic prospects, a weak and faction-ridden government, and favorable geography have made this West African country a way station for drugs bound for Europe.

Guyana

Introduction ::

Background:

Originally a Dutch colony in the 17th century, by 1815 Guyana had become a British possession. The abolition of slavery led to black settlement of urban areas and the importation of indentured servants from India to work the sugar plantations. This ethnocultural divide has persisted and has led to turbulent politics. Guyana achieved independence from the UK in 1966, and since then it has been ruled mostly by socialist-oriented governments. In 1992, Cheddi JAGAN was

elected president in what is considered the country's first free and fair election since independence. After his death five years later, his wife, Janet JAGAN, became president but resigned in 1999 due to poor health. Her successor, Bharrat JAGDEO, was reelected in 2001 and again in 2006.

Economy ::

Economy - overview:

The Guyanese economy exhibited moderate economic growth in recent years and is based largely on agriculture and extractive industries. The economy is heavily dependent upon the export of six commodities - sugar, gold, bauxite, shrimp, timber, and rice - which represent nearly 60% of the country's GDP and are highly susceptible to adverse weather conditions and fluctuations in commodity prices. Guyana's entrance into the Caricom Single Market and Economy (CSME) in January 2006 has broadened the country's export market,

primarily in the raw materials sector. Economic recovery since a 2005 flood-related contraction was buoyed by increases in remittances and foreign direct investment in the sugar and rice industries as well as the mining sector. Chronic problems include a shortage of skilled labor and a deficient infrastructure. The government is juggling a sizable external debt against the urgent need for expanded public investment. In March 2007, the Inter-American Development Bank, Guyana's principal donor, canceled Guyana's nearly \$470 million debt, equivalent to nearly 48% of GDP, which along with other Highly Indebted Poor Country (HIPC) debt forgiveness brought the debt-to-GDP ratio down from 183% in 2006 to 120% in 2007. Guyana became heavily indebted as a result of the inward-looking, state-led development model pursued in the 1970s and 1980s. Growth slowed in 2009-10 as a result of the world recession. The slowdown in the domestic economy and lower import costs helped to narrow the country's current account deficit, despite generally lower earnings from exports.

Transnational Issues ::

Disputes - international:

all of the area west of the Essequibo River is claimed by Venezuela preventing any discussion of a maritime boundary; Guyana has

expressed its intention to join Barbados in asserting claims before UNCLOS that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks arbitration under provisions of the UN Convention on the Law of the Sea (UNCLOS) to resolve the long-standing dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Trafficking in persons:

current situation: Guyana is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; most trafficking appears to take place in remote mining camps in the country's interior; some women and girls are trafficked from northern Brazil; reporting from other nations suggests Guyanese women and girls are trafficked for sexual exploitation to neighboring countries and Guyanese men and boys are subject to labor exploitation in construction and agriculture; trafficking victims from Suriname, Brazil, and Venezuela transit Guyana en route to Caribbean destinations

tier rating: Tier 2 Watch List - for a second consecutive year, Guyana is on the Tier 2 Watch List for failing to provide evidence of increasing efforts to combat trafficking, particularly in the area of law enforcement actions against trafficking offenders; the government has yet to produce an anti-trafficking conviction under the comprehensive Combating of Trafficking in Persons Act, which became law in 2005; the government operates no shelters for trafficking victims, but did include limited funding for anti-trafficking NGOs in its 2008 budget; the government did not make any effort to reduce demand for commercial sex acts during 2007 (2008)

Illicit drugs:

transshipment point for narcotics from South America - primarily Venezuela - to Europe and the US; producer of cannabis; rising money laundering related to drug trafficking and human smuggling

Introduction ::

Background:

The native Taino Amerindians - who inhabited the island of Hispaniola when it was discovered by COLUMBUS in 1492 - were virtually annihilated by Spanish settlers within 25 years. In the early 17th century, the French established a presence on Hispaniola. In 1697, Spain ceded to the French the western third of the island, which later became Haiti. The French colony, based on forestry and sugar-related industries, became one of the wealthiest in the Caribbean but

only through the heavy importation of African slaves and considerable environmental degradation. In the late 18th century, Haiti's nearly half million slaves revolted under Toussaint L'OUVERTURE. After a prolonged struggle, Haiti became the first black republic to declare independence in 1804. The poorest country in the Western Hemisphere, Haiti has been plagued by political violence for most of its history. After an armed rebellion led to the forced resignation and exile of President Jean-Bertrand ARISTIDE in February 2004, an interim government took office to organize new elections under the auspices of the United Nations Stabilization Mission in Haiti (MINUSTAH). Continued violence and technical delays prompted repeated postponements, but Haiti finally did inaugurate a democratically elected president and parliament in May of 2006. A massive magnitude 7.0 earthquake struck Haiti in January 2010 with an epicenter about 15 km southwest of the capital, Port-au-Prince. An estimated 2 million people live within the zone of heavy to moderate structural damage. The earthquake is assessed as the worst in this region over the last 200 years and massive international assistance will be required to help the country recover.

Economy ::

Economy - overview:

Haiti's economy suffered a severe setback when a 7.1 magnitude earthquake damaged its capital city, Port-au-Prince, in January 2010. Already the poorest country in the Western Hemisphere with 80% of the population living under the poverty line and 54% in abject poverty, the damage to Port-au-Prince caused the country's GDP to contract an estimated 8% in 2010. Two-thirds of all Haitians depend on the agricultural sector, mainly small-scale subsistence farming, and remain vulnerable to damage from frequent natural disasters, exacerbated by the country's widespread deforestation. US economic engagement under the Haitian Hemispheric Opportunity through Partnership Encouragement (HOPE) Act, passed in December 2006, has boosted apparel exports and investment by providing tariff-free access to the US. Congress voted in 2010 to extend the legislation until 2020 under the Haitian Economic Lift Act (HELP); the apparel sector accounts for three-quarters of Haitian exports and nearly one-tenth of GDP. Remittances are the primary source of foreign exchange, equaling nearly a quarter of GDP and more than twice the earnings from exports. Haiti suffers from a lack of investment because of insecurity and limited infrastructure, and a severe trade deficit. In 2005, Haiti paid its arrears to the World Bank, paving the way for reengagement with the Bank. Haiti received debt forgiveness for over \$1 billion of its debt through the Highly-Indebted Poor Country (HIPC) initiative in 2009. The remainder of its outstanding external debt was cancelled by donor countries in early 2010 but has since climbed back to about \$500 million. The government relies on formal international economic assistance for fiscal sustainability.
